RAINFALL STOPS DEVELOPMENT IN MINERVA FIELD

LEE OIL COMPANY NOW HAS
THIRTEEN PRODUCING
WELLS.

The heavy rain that has fallen in this section in the past week, has curtailed operations in the shallow and deep fields, a few wells in the Minerva fields that were ready to be drilled in were delayed and drilling will be resumed again. The Lee Oil Company lead the field in the number of completions, having two wells on the Neihous tract, both wells are rated as 20 barrel producers. The Lee Company now have 13 producing wells on this tract and are the largest producers of Milam county crude oil in the field.

McIntosh, Hefley & Thomas, have their number 4 well completed for a 10 barrel well and are preparing to drill on number 5.

Coyle and Concord who recently purchased the Newell and Clifton Brothers properties, are drilling on their number 6 Neihous around 500 feet.

The Owens Petroleum Company and the Baggett and House interests have stopped drilling for the present. The Erie Investment Company are drilling on their number 4, Ben McClellan, which is expected will be a completion soon. Their is the usual activity in the shallow area and the wildcat districts are attracting the attention of the oil clan from all over the country.

The S. A. Guiberson number one Posey, six miles northeast of Cameron is rigging up with standard tools and are preparing to drill out cement plug in the 6 and 5-8 inch casing. This well is being watched very closely by the larger companies who have purchased protection acreage. The casing was set around the 3298 foot level on what is believed to be the top of the Georgetown lime. The Frederick C. Nelson number one Laferri, near Tracy is shut down waiting for a 20 inch bit. The U. S. Tex Oil Corporation number one Looney, east of Branchville is a location and the contract calls for a deep test well to be started by December 10th. The Milano Uplift Oil Syndicate number one Ashley, near Milano is waiting for tools.

The production of the Milam county pool is around 400 barrels daily.

330 CHILDREN FOR CONFIRMATION IN CATHOLIC CHURCH

174 GIRLS AND 156 BOYS FORM
CONGREGATION AT ST. MONICA CHURCH.

A class of 330 Mexican children received the Sacrament of Confirmation in the Church of St. Monica last Sunday afternoon, this city. Rt. Rev. C. E. Byrne, D. D. Bishop of Galveston, officiated at the impressive ceremony, assisted by the Rev. Charles Zoephechten, O. M. I. Rev. D. Deanti, O. M. I. of Houston, Texas, Rev. S. A. Zientek of Marlin, Texas, and the local pastor, the Rev. S. Spinnewebber. The class was made up of the children of the city of Cameron, the Watt farm, Riverside farm and Maysfield, there were 174 girls and 156 boys in the class. Rev. M. Heitzelman of Wespallia and Robert P. Shertz of Lott, Texas, were also present. Solemn Benediction of the Blessed Sacrament brought the services to a fitting close.

TWO SMALL GIRLS WANT GOOD HOME.

Judge Jeff T. Kemp has requested Herald to say in its issue this week that two small girls aged 11 and 8 years are in charge of the county and he is seeking to obtain a good home for them in the county. These little girls will bring happiness to the home and all who care to help them will get in touch with Mr. Kemp at once and arrange the matter.

KILLING FROST EXTENDS OVER MUCH OF TEXAS

CLOUDY WEATHER EXPECTED
TO SAVE SAN ANTONIO
TRUCK FOR TIME

With a killing frost extending over North Texas and the Panhandle, San Antonio this morning is scheduled to have a light frost if clear weather prevailed through the night.

At any rate last night marked the coldest temperatures of the season so far, and San Antonio is not out of frost danger tonight. The forecast issued late yesterday by J. H. Jarboe local meteorologist was for a temperature ranging from 34 to 40 degrees this morning and for generally fair weather today with temperatures growing warmer of course during the day.

The huge area of high pressure that has spread out over almost the whole half of the country and is centered over Montana brought freezing temperatures as far south as the Texas Panhandle yesterday. Amarillo reported a clear weather and a temperature 16 degrees, Abilene 34 and Dallas 38 degrees. Even Brownsville got in the running temperature of 58 degrees. Denver Colorado, reported a temperature of 4 degrees below zero and 10 inches of snow yesterday morning the coldest temperature for the United States so far. Montana reported 8 degrees where the high pressure area is centered.

Cloudy weather saved San Antonio and its vicinity from much lower temperatures than would have prevailed otherwise. The minimum here was 41 degrees and 2.8 inches of rain fell.

LAUSANNE PARLEY POSTPONED; FACES HOLDUP.

London, Nov. 13.—Although the Lausanne conference for the making of peace in the Near East has been postponed a week until November 20, officials take the view another postponement will be necessary if Great Britain fails to win her point that a preliminary conference must be held by the representatives of Great Britain, Italy and France.

The British government is insisting on some sort of consultation with the other allies in order to learn exactly where Great Britain stands before she enters the conference.

Now that the Lausanne conference has been postponed to November 20, the question most urgently asked here is whether it will be possible to maintain peace in Constantinople in the interim. Restoration of communication has revealed such an ugly situation that it is thought the utmost tact and skill will be necessary to prevent violent outbursts.

CHRISTMAS STORIES IN BOOK BEING PUBLISHED.

Miss Mollie Moore of Cameron is having issued a Christmas story book to contain two of her most famous stories of Christmas and will offer them for sale to dealers during the Holiday season. This book is being published by the Herald and will be ready for distribution about December.

The book will be illustrated and will make a very desirable gift for children.

Respectfully,
J. E. ROBINSON.

Mrs. John Hays has been quite sick with the dengue fever.

Mr. and Mrs. Dave Wilson and little son spent Friday night in Cameron on their way to Temple to visit relatives.

Practical example of the use of First Aid in accidents as taught by the Red Cross. The picture shows assistance being given a housewife who has been severely burned while cooking.

BAPTISTS COMING TO CAMERON FOR DISTRICT MEET

B. Y. P. U. MEMBERS FROM DISTRICT TO GATHER HERE
NOV. 23 AND 24.

Hundreds of delegates to the district meeting of the Baptist Young Peoples Union are expected to be in Cameron on November 23 and 24 when the local church entertains the visitors and aids in the meeting.

Announcement of the coming meeting has been made by Rev. R. C. White pastor of the church who has closed a successful revival meeting here.

The meeting will have to do with the work of the Unions in this section of the state and will be important from many angles and it is the plan of the church to entertain a large number of delegates.

The fullest co-operation of the church is asked by the pastor and the officials. The local B. Y. P. U. members are asked to get behind the plans for the meeting and give the entire support and co-operation to the work.

It is seldom that this city has the opportunity to thus entertain conventions and every possible effort should be made by the entire citizenship to see that the meeting is a success and that all the delegates are comfortably situated and are entertained.

"VOTE FOR McADOO" SAYS WORDING ON CAR OF LUMBER.

"Vote for McAdoo for President, the working man's friend" read a sign scrawled in large letters with white crayon on the side of a car of lumber consigned to the Jeter Lumber Company in Cameron last week.

This bit of sentence is indicative of the feeling of those who toil in this country and ambitious Democrats are wont to translate this into a national sentiment for 1924. Let's go for McAdoo.

FLORIDA ANNOUNCES FORMULA TO DEFEAT BOLL WEEVIL CURSE

STRIPPING BRACCS CLAIMED
HARMLESS TO STAPLE.
GETS ALL EGGS.

Gainesville, Florida, Nov. 13.—Bulletins were sent out today by the State Plant Board of Florida detailing at length the improved method of controlling the boll weevil as evolved by Dr. George D. Smith, assistant entomologist of the board, and announced Saturday night by Wilmon Newell, director.

While expressing confidence that Florida growers of upland cotton by following the new method, are assured of at least 90 per cent of a normal crop, Dr. Newell points out at the outset that Dr. Smith's experiments were made under Florida conditions and the method evolved is adapted to this state but there seems to be no reason "on theoretical grounds at least" why the method can not be successfully be adopted to all sections of the cotton belt.

The substance of Dr. Sewell's plan is to clear the fields of weevil infestation early in June and then give the staple free growth until August when the annual immigration of the weevil sets in. The staple has grown however, to such an extent by this time, that harm from the weevil then is inconsequential.

Dr. Smith recognizes in the beginning of his experiments that the boll weevil could be effectively poisoned before it reached the "spares" or flower bracts of plants. His investigation, therefore, had to do with ridding the plant of the last of the overwintering weevils which appear later and deposit their eggs on the squares.

The plan he evolves meets this obstacle by the simple process of removing early squares and then thoroughly disinfecting the boll itself with poison. His experiments disproved the belief that removal of the early squares would lower the cotton yield.

RETAIL MERCHANTS PLAN MEETING HERE FOR NOVEMBER 23

STATE HEAD QUARTERS WILL
SEND SPEAKER FOR BANQUET GATHERING.

The Retail Merchants Association of Cameron will hold a meeting on November 23 at 8 o'clock p. m. at which time a representative of the state organization will address the members and invited guests.

President J. W. Coleman and Secretary Chas. Sprott are now arranging the details of this meeting. The decision to hold this special meeting was made at the regular meeting of the association which was held on last Thursday Night in the office of The Herald. The matters pertaining to this special gathering were gone over at this meeting and the officers were instructed to proceed with the details.

Mr. Sprott is arranging the banquet and has written Adolph Grasso, state secretary of the association for a speaker. The meeting will be for the purpose of stimulating bigger interest in the association and bring the local merchants into closer contact with the state organization. The meeting will be strictly social and it likely that a number of local speakers will be present.

The retail merchants association has been of great service to the merchants of Cameron in increasing collections and keeping down the practices of those who abuse the credit system.

COURT TO CANVASS RETURNS IN COUNTY.

The Commissioners Court is in session today and will canvass the returns from the general election held on November 7. As soon as the canvass is available the Herald will publish the result of the election.

MAGAZINE SECTION OF HERALD IS DELAYED.

The Magazine section of the Herald was delayed in transit and could not be used in the last issue of the paper. However the publishers are including the section in this issue despite the fact that the date is November 9.

PRESBYTERIAN CHURCH.

This is "Home Mission Week" and we are observing it with a lecture on Home Mission each evening at 7:30. Come out for these meetings.

We are having some interesting work these days in the Sunday school. We are studying a "Life of Christ," arranged by the pastor. This will be completed the last of February. First Sunday in January, we will have an examination. The school offers \$50 in prizes for the four best grades. For the contest the school is divided into two grades, those under, and those over twelve years.

Come out for Bible school and church next Sunday.

H. R. McFadyen, Minister.

Miss Nell Kennon who is attending Southwest Texas Normal College at San Marcos spent Armistice Day at home with her parents, Mr. and Mrs. C. B. Kennon.

Mr. and Mrs. Miller Bradberry, Mr. and Mrs. Alford Bradberry, Mrs. Putter and Miss Constance Bradberry were over to see their brother, Mr. Bradberry who has been quite ill with dengue fever.

Mr. and Mrs. Leo Wilkerson and little daughter Zora, visited their grandparents, Capt. and Mrs. Clarke of San Gabriel who are sick with the dengue fever.

Charlie Frank Green was down from Austin and spent a few days with his parents, Mr. and Mrs. C. N. Green.

Mr. Oxsheer Smith left last week to join Miss Aetna Smith in accompanying their brother, Goodhue Smith, to his home in Waco. Goodhue has been a patient in the John Hopkins Hospital for several weeks, and his many friends will be glad to learn he is now on the road to recovery.

WILL ASK MEETING OF CONFERENCE IN CAMERON FOR 1923

REV. IRA F. KEY AND JUDGE
JEFF T. KEMP GO TO MARSHALL
SHALL MEETING.

The pastor of the Methodist church and Judge Jeff T. Kemp will leave Monday for the session of the Texas Annual Conference which convenes next week in Marshall, Texas. They will go bearing a unanimous invitation from the church here for the conference to hold its next session in the fall of 1923 in Cameron. The church feels very hopeful that the conference will comply with the request because of the fact that when the Texas and East Texas conferences were combined some years ago the Texas conference that year was to come to Cameron and Cameron gateway to Crockett on the agreement that when Cameron requested the conference it would come here.

With the new church completed it will furnish a commodious place for holding the conference. There are about 350 delegates to this conference and if the conference is secured it will be a great credit to the church and a help to the community at large.

The church is hopeful that Rev. Key will be returned to Cameron for another conference year. His work here stands out as one of the most constructive achievements in local church history.

RED CROSS CHRISTMAS ROLL CALL.

The big drive in the Red Cross Christmas Roll Call is well under way. City Director W. O. Triggs has carefully planned his campaign, and for the next few days committees will canvass the entire town for members. At the meeting of the Commercial Club last week the President was instructed to appoint all necessary committees to assist in the drive and President C. W. Lawrence has already selected the men who are to put over this biggest undertaking of the year. Immediately prior to the canvass the town will be "billed" with Red Cross literature and posters to remind us that the time is at hand.

Nothing that Cameron has undertaken in years—nothing that she can do—even approaches in importance the Red Cross Christmas Roll Call. It is a great work of humanity, a work for the suffering millions across the seas, for the homeless victims of disaster in our own country, but most of all for the people of Milam county. About nine tenths of the money raised this year will be spent in the Public Health Service of the Red Cross in our county; only a small proportion will be sent away to the national organization. At least Twenty-five Hundred dollars will be raised to support this Service; it must be raised—Milam county cannot abandon this great humanitarian work.

To raise this money by securing membership in the Red Cross is an almost insurmountable task; it would take five thousand members—one person out of every eight in the county, to raise twenty five hundred dollars for Milam county's share. Under the new scheme, however, the necessary funds can and will be raised, by the members of the "Twenty Five Dollar Club." It is planned to organize these clubs in each community of the county, securing at least One Hundred members in the county. Every member of the "Twenty-Five Dollar Club" will contribute twenty-five dollars to the Milam County Red Cross Chapter. Of this sum fifty cents will go to the national organization, and the remaining twenty-four fifty will be the property of the local chapter to be used to carry on the Public Health Service work. And in order to make it easy on the friends of the Red Cross who wish to help and have not the entire sum of twenty-five dollars at the time the solicitor calls on them, it has been decided to divide these subscriptions so that one fourth of six dollars an

(Continued on page 8.)

TWO WOMEN ARE HELD
IN POISON INQUIRY

Chicago, Nov. 2.—Investigators Saturday night were trying to connect up almost a score of deaths which have occurred in one Chicago neighborhood within the last ten years, with what has been described as the most amazing poisoning plot Chicago has ever known.

Two women Mrs. Tillie Klimek and Mrs. Nellie Sturmer-Koulik, a relative, already are held on murder charges. Bodies of the former husbands of the two women exhumed have shown distinct arsenical traces authorities have said. In addition Mrs. Klimek has admitted she fed "white powder" secured from Mrs. Sturmer-Koulik to her fourth husband, Anton Klimek, now in serious condition in a local hospital.

Three more bodies were dug up Saturday for examination, those of Mrs. Klimek's two other husbands and a cousin of Mrs. Klimek, Mrs. Rose Wyieskowski, who died mysteriously after she had quarreled with Mrs. Klimek.

Others whom the poison plot may have reached according to the authorities of three children of Mrs. Frances Zakrzewski who died suddenly after their mother quarreled with Mrs. Klimek.

The death of John Guszowski is also being investigated. Police say he jilted Mrs. Klimek and died soon afterward.

Relatives have asked for an inquiry into the death of Mrs. Rose Chudzinski. She was the cousin of Mrs. Sturmer-Koulik and died soon after she had quarreled with the latter.

Six of the 15 children born to Mrs. Sturmer-Koulik are dead, it was learned and their deaths will also be investigated. Authorities secured this information from the dead children's brothers and sisters.

Assistant State Attorney William F. McLaughlin was assigned to the case to give it full attention until the mysterious deaths are cleared up. He said that he would probably present the evidence against Mrs. Klimek and Mrs. Sturmer-Koulik to the grand jury next week. He intimated however that he would not stop there but would investigate the deaths of husbands of several other women who lived in the neighborhood of Mrs. Klimek and Mrs. Sturmer-Koulik.

VAST DAMAGES BROUGHT BY
EARTHQUAKE IN NORTH CHILI

Santiago, Chili, Nov. 11.—An earthquake of great magnitude and far spread effect rocked Chili from end to end today. It was accompanied by a tidal wave and the combined forces of the earth tremore and the sweep of water did vast damage, the extent of which it is impossible to estimate because telegraphic lines were carried down at various places, cutting off communication.

The provinces of Antofagasta, Atacama and Coquimbo suffered most, the central points of the quake lying in the latter two provinces, and so far as advices shown, Copiapo in Atacama has the largest casualty list with about 100 killed and many seriously injured.

It was for a time feared that the city of Antofagasta had suffered the great disaster, but most of the damage done at that place was due to a tidal wave which drove the people out of their homes over a considerable area. No report of loss of life has yet come from Antofagasta.

Chanaral, in Attacama, has virtually been abandoned by the inhabitants, as many of the buildings were wrecked by the immense seas sweeping in when the earth shocks had ceased. The greater part of the town was destroyed.

Throughout the province of Coquimbo hundreds of houses were leveled while the residents fled to the hills. At the port of Coquimbo a tidal wave beat over the entire sea front flooding a large section and wrecking many buildings.

From the southern part of Chili comes reports of severe shocks, but little damage.

Another earthquake was felt here at 4:45 o'clock this afternoon. It was of ten seconds duration.

Report from Concepcion and Talcahuano to the south make no mention of damage or casualties. At Concepcion a strong earth movement from east to west was felt for about three minutes at midnight. At Talcahuano a tidal wave occurred, following the subsidence of which the water level was lower than normal. The movement was steady and caused no damage.

The Quinine That Does Not Affect The Head
Because of its tonic and laxative effect, LAXATIVE BROMO QUININE (Tablets) can be taken by anyone without causing nervousness or ringing in the head. F.W. GROVE'S signature on box. 30c

ITALY PLANS TO PAY
U. S. WAR DEBT

Rome, Nov. 11.—Premier Benito Mussolini head of the Fascisti government sent word to the United States today that Italy regards the war debt to America as an honorable obligation to be met, but at the same time he outlined some of the things Italy desires the United States to do.

In a statement to International News Service, the premier said:

"My opinion is that the questions of interallied war debts and reparations are inseparable Italy regards her debt one of honor, but, of course it is possible that the viewpoint of the United States may undergo changes in the future."

PLAN TO DISMISS LATEST
ACTION IN MAYFIELD CASE

Austin, Texas, Nov. 13.—A motion to dismiss the application for writ of error from the decision of the Dallas court of civil appeals in the Grosebeck injunction suit seeking to keep Earle B. Mayfield's name off the general election ballot was received by the clerk of the supreme court today. The application was filed in the supreme court following the election. The motion probably will be acted upon Wednesday.

You Do More Work.

You are more ambitious and you get more enjoyment out of everything when your blood is in good condition. Impurities in the blood have a very depressing effect on the system, causing weakness, laziness, nervousness and sickness.

GROVE'S TASTELESS Chill TONIC restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value.

GROVE'S TASTELESS Chill TONIC is not a patent medicine, it is simply IRON and QUININE suspended in Syrup. So pleasant even children like it. The blood needs Quinine to Purify it and IRON to Enrich it. These reliable tonic properties never fail to drive out impurities in the blood.

The Strength-Creating Power of **GROVE'S TASTELESS Chill TONIC** has made it the favorite tonic in thousands of homes. More than thirty-five years ago, folks would ride a long distance to get **GROVE'S TASTELESS Chill TONIC** when a member of their family had Malaria or needed a body-building, strength-giving tonic. The formula is just the same today, and you can get it from any drug store. 60c per bottle.

THE STATE OF TEXAS
County of Milam.

To those indebted to or holding claims against the estate of Joe F. Mondrik, deceased:

The undersigned having been duly appointed independent executor of the will of the estate of Joe Mondrik deceased, late of Milam County, Texas, by Jeff T. Kemp, Judge of the County court of Milam County on the 3rd day of October A. D. 1922 during the regular term thereof hereby notifies all persons indebted to said estate to come forward and make settlement, and those having claims against said estate to present them to him within the time prescribed by law at his residence in Cameron, Milam County, Texas, where he receives

his mail, this the 26th day of October 1922.

F. C. MONDRICK,

Independent executor of the will of the estate of Joe F. Mondrik, deceased.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Medicine, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, is taken internally and acts thru the Blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Medicine fails to cure. Send for circulars and testimonials.

SOUTHWESTERN DIVISION LOOKS AFTER SOLDIERS

Red Cross Workers in That Section Assist, Care For and Entertain Men in Camps and Hospitals.

Approximately 30,000 able-bodied soldiers and more than 5,000 invalided soldiers and ex-service men in the hospitals in the United States have been assisted in obtaining compensation and in the solution of their other problems by the American Red Cross, according to E. S. Transue, director of war service of the Southwestern Division of the American Red Cross.

"Red Cross workers in the camps and hospitals in the Southwestern Division are rendering much-needed service to the men who are in the army at the present time," said Transue. "Those service men undergoing hospital treatment for one cause or another and ex-service men who have been hospitalized both in the army hospitals and hospitals operated by the Veterans' Bureau, are some of the men in need of this service.

"The army camps and hospitals in this division covered by Red Cross workers are located at Jefferson Barracks, St. Louis, Mo.; Camp Travis, Tex., including Ft. Sam Houston Hospital; Ft. Bliss, Tex.; including Wm. A. Beaumont General Hospital; Ft. Leavenworth, Kan., including the U. S. Disciplinary Barracks at that point; Ft. Riley, Kan.; Ft. Sill, Okla.; Fitzsimons General Hospital, Fitzsimons, Colo.; Camp Furlong, New Mex.; Camp Harry J. Jones, Douglas, Ariz.; and the Army and Navy General Hospital at Hot Springs, Ark.

"The Veterans' Bureau hospitals served by the Southwestern Division of the Red Cross are: U. S. Veterans' Hospital No. 35, St. Louis, Mo.; Veterans' Hospital No. 25, Logan, Tex.; U. S. Veterans' Hospital No. 55, Ft. Bayard, N. Mex.; U. S. Veterans' Hospital No. 67, Kansas City, Mo.; U. S. Veterans' Hospital No. 78, N. Little Rock, Ark.; and U. S. Veterans' Hospital No. 80, Fort Lyon, Colo.

"Of the 5,000 patients, approximately 75 per cent are undergoing treatment for tuberculosis and mental diseases. This makes the work one of considerable difficulty, inasmuch as it is oftentimes a real problem to provide proper recreation or to connect the man's present condition with his service.

"There are three phases of the Red Cross program for service and ex-service men in the camps and hospitals—Home Service, Recreation and Medical Social Service. Our regular camp service program consists of what is known as home service work. This calls for co-operation between the Red Cross worker in the camp and governmental and chapter agencies in taking care of problems of the enlisted man in the army. Difficulties relating to allotments, allowances, insurance, compensation, state bonus, travel pay, etc., are all brought to the Red Cross by the enlisted man. The Red Cross also contacts the families through the chapters in case of distress, sickness or death.

"The recreational and entertainment program in the hospital brings movies for the boys, amateur theatricals, dances, parties and those many other things that the sick man longs for, but which he could not have were it not for the Red Cross.

"The Red Cross medical and social service program calls for a study of the individual needs of the man, to help him in solving his personal and family difficulties, to aid him by material assistance when he is without resources, to aid the doctor in his treatment of the patient by obtaining former medical or social histories which may lead to an accurate diagnosis and to interpret the whole situation to the Red Cross.

Chapter home service workers of the man's home community, so that not only will the proper attention be given to the family during the man's absence, but he may be free in mind and thus derive a maximum amount of benefit from his treatment.

"In carrying out our work for the ex-service man undergoing hospitalization the Red Cross has constantly borne in mind that the great object has been to play the right part in the period of adjustment through which the ex-service man must safely pass if he is to continue to be a good citizen. This work has required personnel who are not only sympathetic in the dealing with patients but who must have an understanding of the social problems of civil life.

"Just as it has always been recognized that the time spent in a government hospital is only a brief episode in the life of a patient, so has it been recognized that the activities of the hospital worker are only a part of the responsibility of the Red Cross to the ex-service man; that the hospital work can be successful only as it correlates itself closely with the work of the Red Cross as a whole. The hospital worker is the outpost detailed to special duty. It is his endeavor to interpret the present condition of the man in the hospital to the home people and as each of us, as individuals, watched the men who marched away to service, as each one of us, helped to "keep the home fires burning" while the boys served in the front line trenches, so does it become our duty today to render a very definite service to these men, who are still fighting the great battle of humanity, begun in 1917, and in which to date no armistice has been declared. Through the Red Cross you are helping them to hold the line."

MISSOURI JUNIOR RED CROSSERS GIVE CHILD SUNDAY CLOTHES

The Junior Red Cross members of Harrisonville, Mo., are very proud of the fact that they have enabled a little girl to go to Sunday School once more. The child had stayed at home for lack of proper clothes and the Juniors found it out and used some surplus funds, which they had earned at a bazaar, to purchase her the outfit.

This little girl now is the proud owner of a pink organdie dress, a pink ribbon, a blue gingham dress, hose and underwear. The gingham dress was made by one of the Juniors.

The children are enthusiastic over home work and tell the secretary that if ever she needs more help to "just whistle" and they will be right there.

TWELVE-YEAR-OLD GIRL WINS RED CROSS LIFE SAVING CERTIFICATE

Ruth Elberfeld, 12 years old, daughter of "Kid" Elberfeld, manager of the Little Rock (Ark.) Baseball Club, has just received a certificate in the Red Cross Life Saving Course, which is usually issued only to adults. Ruth took the course in a class of girls, but her work was so far ahead of her age that she finally was put in the adult class. One of the extraordinary feats in the course was the bringing in of a 160-pound man through the water for a distance of 50 yards, towing him and handling him in four different ways, according to the requirements of the course.

No Worms in a Healthy Child

All children troubled with Worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS chill TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a General Strengthening Tonic to the whole system. Nature will then throw off or dispel the worms, and the Child will be in perfect health. Pleasant to take. 75c per bottle.

Proposed Traffic Regulations For Cameron

MAKING CAMERON STREETS SAFE FOR AUTO. MOBILES.

Pedestrian traffic, please observe the following rules:

1. Pedestrians shall be held liable for all damages done to automobiles or their occupants by collision, or the cutting of tires by sharp instruments carried in their pockets while being run over.
2. On approaching a crossing they shall give three short blasts on a horn not less than three inches in diameter.
3. Pedestrians crossing street at night shall wear a white light in front and a red light in the rear.
4. On dodging automobiles, pedestrians shall not run faster than 10 miles per minute.
5. When an experienced automobile driver is made nervous by a pedestrian, he shall indicate the same and the pedestrian shall disappear behind a telephone pole until the car has passed. In case of temporary absence of a telephone pole they shall park themselves in the gutter parallel with the curb.
6. Pedestrians must register at the beginning of each year and pay a license fee of \$5 for the privilege of walking. There will be no rebate if they do not walk through the year. Before receiving their license they shall demonstrate before an examining board their skill in dodging, leaping, vaulting, crawling and extracting themselves from machinery.
7. Pedestrians shall carry their

seal number in front securely attached with a piece of hay wire and their register number securely attached to rear bumper with stove bolts. In case of collision with an automobile at fast speed, the driver of the car shall get the pedestrian's number and report it promptly to the coroner.

8. Pedestrians and automobilists are both safe when they purchase their accident insurance policies from Fred Henry, Agent for Federal Life Insurance Company, Cameron, Texas.

Piles Cured in 6 to 14 Days

Druggists refund money if PAZO OINTMENT fails to cure Itching, Blind, Bleeding or Protruding Piles. Instantly relieves Itching Piles, and you can get restful sleep after first application. 60c.

A TONIC

Grove's Tasteless chill Tonic restores Energy and Vitality by Purifying and Enriching the Blood. When you feel it strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value. Grove's Tasteless chill Tonic is simply Iron and Quinine suspended in syrup. So pleasant even children like it. The blood needs QUININE to Purify it and IRON to Enrich it. Destroys Malarial germs and Grip germs by its Strengthening, Invigorating Effect. 75c.

SON-IN-LAW OF BEAL SNEED IS SHOT TWICE.

Paducah, Nov. 10.—Wood Barton, son-in-law of J. Beal Sneed was shot this afternoon at 3:30 o'clock by C. B. Berry. Barton was shot twice. Berry immediately surrendered to Sheriff. An examining trial has not yet been held.

Berry will make no statement. Barton is not expected to live.

WHAT CAUSES GAS ON THE STOMACH?

It is caused by fermenting, sour waste matter in the intestines. This

old, foul matter should be thoroughly cleaned out with simple buckthorn bark, glycerine, etc., as mixed in Adler-i-ka. This acts on BITH upper and lower bowel, removing old accumulated matter you never thought

was in your system. Adler-i-ka relieves ANY CASE gas on the stomach. EXCELLENT for sour stomach and chronic constipation. Guards against appendicitis. For sale by the New Cameron Drug Company.

It Pays To Plant IMPROVED Cotton Seed

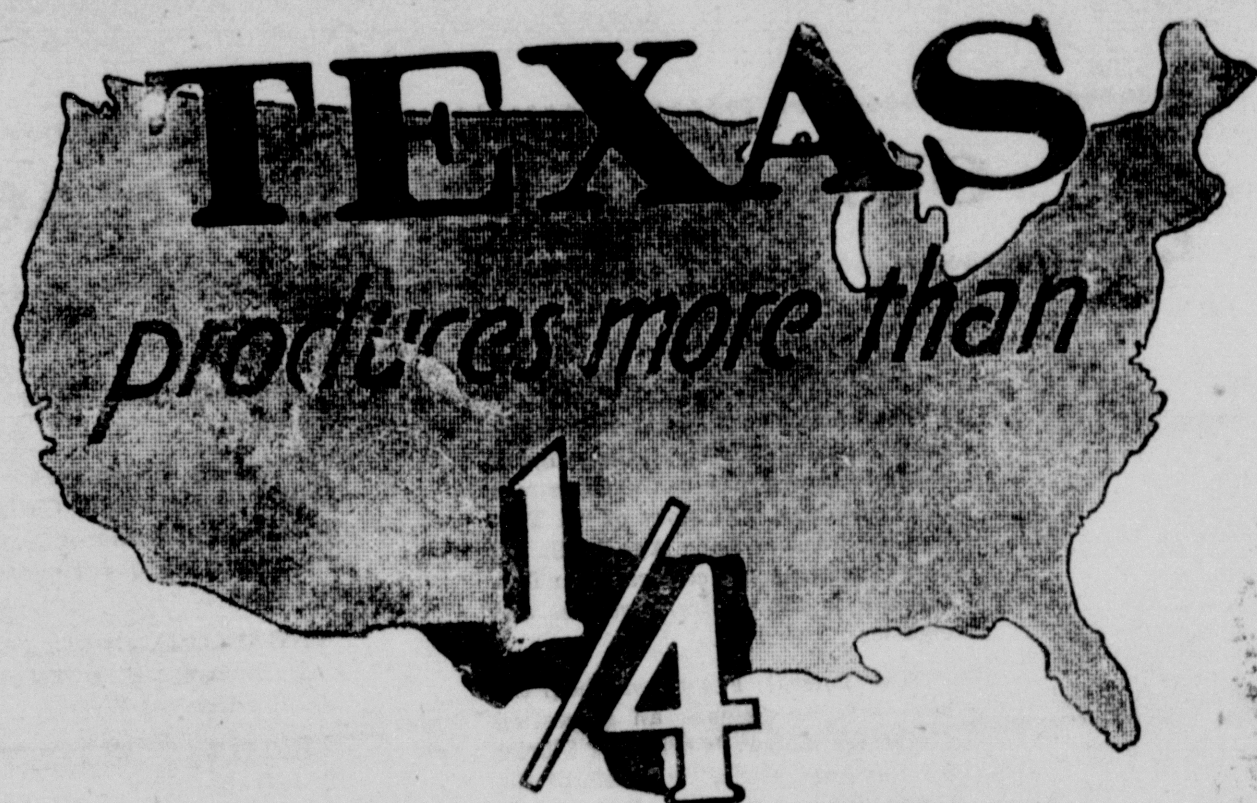

Four thousand bushels Kasch Cotton Seed grown on one farm and ginned on private gin where no other than Kasch Cotton was ginned this season. Sacked three bushels the bag. The price is \$1.50 the bushel for orders received prior to December the first.

After December the first price will be advanced.

This Cotton averaged 38 to 40 per cent lint this season.

A. N. GREEN

Cameron, Texas.

the Nation's
COTTON

ALTHOUGH Texas produces considerably more than One-fourth of All Cotton raised in the United States, we are milling less than one-half of one per cent of that Cotton Ourselves.

We send our Cotton North and East, and when it comes back to us made up, the price we pay then includes freight both ways and a profit for the mills besides.

Let's mill it ourselves!

We have the raw material at hand. We have cheaper labor than the East. We have the proper power facilities. And a year 'round market for our output.

The Planters' and Merchants' Mill No. 1 at New Braunfels, Texas, is now one-third completed and will be devoted to the manufacture of "Blue Bonnet" Gingham. Cheap water power and modern improved machinery will give it an immediate

Let's
mill it
ourselves!

advantage over other mills now in operation. It is the only gingham mill in Texas.

We are offering you an opportunity to profit by this enterprise. The earnings of this mill are going to be paid to somebody. Why not you?

OUR DECEMBER MAGAZINE SECTION

OUR CHRISTMAS EDITION.

The Christmas Edition of the Cameron Herald will cover a wide range of subjects appropriate to the Christmas week holidays. The story of "A Texas Christmas of Long Ago," will tell how Christmas was celebrated in Texas back in the sixties, seventies and eighties.

"The Yuletide Feast" will help the housewife to prepare an interesting Christmas dinner. "Christmas Stories for Boys and Girls," will delight the young folks. "In Little Bethlehem," you will read about the Church of the Nativity built over the manger where Jesus was laid when He was born, which is the oldest church in the Christian world, and was built by Helena, the wife of Emperor Constantine, of the Roman Empire.

Contents, in full, of our Christmas Edition:

"A TEXAS CHRISTMAS OF THE LONG AGO."—How Christmas was Celebrated in Texas Back in the Sixties, Seventies and Eighties. By W. N. Beard.

"THE HEALING OF MASTERSON."—A Christmas Story of the Rugged and Big-Hearted West.

"CHRISTMAS REFLECTIONS."—By J. H. Lowry.

"DIFFERENT FESTIVITIES IN DIFFERENT CLIMES."—Celebrating Christmas in Foreign Lands.

"A CHRISTMAS MESSAGE."—By William T. Ellis.

"IN LITTLE BETHLEHEM"—Scenes

in and Near the Birthplace of Christ
"TABLE DECORATIONS."—Christmas wreaths, "Snowball Tables," "Cranberry Trees," "Poinsettias," "Pine Cones," etc.

"PLANING CHRISTMAS GIFTS."—Have Handy a Notebook and Pencil and Use Your Head Thoughtfully.

"WORK-BAG CHAT."—How to make Some Gifts at Home with Needlecraft.

"THE YULETIDE FEAST."—What to prepare in order to serve your family or guests with a real Christmas dinner.

"BOYS AND GIRLS' CHRISTMAS STORIES."—"How Ellen Cooked the Christmas Turkey," "Pueblo Indians Commemorating Christ's Birthday."

TEXAS TRAPPER LEADS COUNTRY IN CATCH OF PREDATORY ANIMALS

Washington, Nov. 12.—The highest record of an individual catch of predatory animals made in one month is held by a Texan whose name is not given in a statement issued tonight by the United States Department of Agriculture. The hunter working near Eagle Pass, is reported to have caught 104 coyotes and ten bob-cats in twenty four days trapping operations. The work is a part of the effort of the Biological survey to aid ranchmen in control of dangerous and destructive animals throughout the State. Previous to September of last year State funds are available for this purpose, but since that time only funds from the Federal Government amounting to \$15,000 have been available to carry on the work.

5,715,000 CASES OF EGGS HELD IN COLD STORAGE

Austin, Nov. 11.—Cold storage holdings of eggs on Nov. 1, as reported by the Federal Bureau of Agricultural Economics and released by the Texas Radio Market News Service, shows this year's holdings as estimated by the preliminary report to be 5,715,000 cases an increase from the figures of Nov 1 a year ago of 1,335,000 cases and from those of the five-year average of 1,360,000 cases.

Recent movement of supplies out of cold storage, however, in the markets of the New York and Chicago have been pronounced. On Nov. 8 in the former market 16,655 cases were with drawn from 927 cases going into storage and in the latter market on that day 18,825 cases were withdrawn for 695 cases that moved into the cooler. This has been typical of the cold storage movement for the last 10 days it was stated.

MAN SUBSIDES BULL'S ATTACK WITH KNIFE.

Belton, Nov. 11.—Presence of mind probably saved the life of J. F. Doley of this city, when he was attacked by a bull in a pasture here last evening. Rushing up from behind, the animal attacked Doley, knocking him to the ground. He continued the attack, but the victim had presence of mind enough to get out his pocket knife and cut the bull on the nose and in the face until the animal subdued. Several of Doley's ribs were broken and he was injured internally. It required him two hours to make a distance of a mile to his home and he fainted several times on the way.

Medical aid was rendered and he is reported to be resting nicely.

Good red seed oats for sale, 80c per bushel, free of Johnson Grass.
29-2t Batt's Grain & Fuel Co.

RED PEPPERS END RHEUMATIC PAINS

When you are suffering with rheumatism so you can hardly get around just try Red Pepper Rub and you will have the quickest relief known.

Nothing has such concentrated, penetrating heat as red peppers. Instant relief. Just as soon as you apply Red Pepper Rub you feel the tingling heat. In three minutes it warms the sore spot through and through. Frees the blood circulation, breaks up the congestion—and the old rheumatism torture is gone.

Rowles Red Pepper Rub, made from red peppers, costs little at any drug store. Get a jar at once. Use it for lumbago, neuritis, backache, stiff neck, sore muscles, colds in chest. Almost instant relief awaits you. Be sure to get the genuine, with the name Rowles on each package.

CALOMEL GOOD BUT TREACHEROUS.

Next Dose May Salivate, Shock Liver or Attack Your Bones

You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into your bile like dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tone for a few cents which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. No salts necessary. Give it to the children because it is perfectly harmless and can not salfate. (Adv.)

DEATH OF W. C. COVAN.

The subject of this sketch was born in Leesburg, Ohio, the 16th of Jan. 1876, died in Houston, November 2th, 1922.

Mr. Covan came to Texas early in life; was married to Miss Beatrice Marshall, daughter of Geo. Marshall of this place, January 31st, 1906. The past five years they made their home in Houston.

Mr. George Marshall accompanied his daughter and family, with the remains from Houston to Minerva where the funeral services were conducted at the Methodist church, by Rev. Ira F. Key.

Mr. Covan leaves a wife and four children, Alice Elizabeth, George Thomas, Lauramay and W. C., Jr., to mourn their said loss.

Mrs. Covan returned to Houston this week to settle up her business, after which she will make her home in Minerva.

BEAUMONTS NEWS WILL START MORNING EDITION

Beaumont, Texas, Nov. 12.—Official announcement that the Beaumont News would begin issuing a morning edition in addition to their regular afternoon papers was made this morning by the management. The proposed paper is scheduled to appear January 1, 1923, will be circulated only through the State. It will be offered for sale locally.

SPEED BOATS TO HELP NEW ORLEANS DRY

NEW ORLEANS, LA., Nov. 12.—A fleet of four speed boats and two seaplanes have been ordered to help keep New Orleans dry, it was learned today on the arrival of the first boat. Each craft will be equipped with a machine gun and will guard Lake Pontchartrain and the Mississippi river against liquor smuggling.

Piles Cured in 5 to 14 Days

Druggists refund money if PAZO OINTMENT fails to cure itching, blind, bleeding or protruding piles. It cures itching piles, and you

ACTRESS WORTH \$50,000 STARVES SELF TO DEATH

Syracuse, N. Y., Nov. 11.—Commanding property worth \$50,000 and having received \$500 cash less than two weeks ago, Miss Kathleen Smoot of Boston a former actress known professionally as Muriel Brandt, deliberately starved herself to death due to the obsessions of a disordered mind. She died this week in a local hospital after being removed from a hotel where she lived like a hermit for a year.

This was revealed by Edgar N. Wilson attorney who represented her in action in which she sought to establish herself as the widow of wealthy Samuel C. Smith, furniture manufacturer, who committed suicide by jumping from an ocean liner in 1908.

ENTIRE OIL TANK FARM THREATENED AT HUMBLE.

Houston, Texas, Nov. 17.—The entire Gulf Production Company's tank near Humble is threatened by a fierce fire caused from lighting striking a tank this afternoon.

Reports from the farm at 6:30 p. m. say that twenty tanks probably will burn, with 2,000,000 barrels loss.

Wind is said to be blowing over the farm in such a manner as to make heading off the blaze almost impossible.

A second tank caught shortly after 6:30 p. m. reports say.

The tanks are built to the ground and rain during the day may cause the fire to spread rapidly, as the burning oil boils over and spreads along the artificial lake.

No banks or other protection can be thrown up because of the extreme heat from the fire.

The tanks are of 55,000 capacity.

Habitual Constipation Cured in 14 to 21 Days

"LAX-FOS WITH PEPSIN" is a specially-prepared Syrup Tonic-Laxative for Habitual Constipation. It relieves promptly but should be taken regularly for 14 to 21 days to induce regular action. It stimulates and regulates. Very Pleasant to Take. 60c per bottle.

PUT CREAM IN NOSE AND STOP CATARRH.

Tells How to Open Clogged Nostrils and End Head-Colds.

You feel fine in a few moments. Your cold in head or catarrh will be gone. Your clogged nostrils will open. The air passages of your head will clear and you can breathe freely. No more dullness, headache; no hawking, snuffling, mucous discharges or dryness; no struggling for breath at night.

Tell your druggist you want a small bottle of Ely's Cream Balm. Apply a little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, and relief comes instantly.

It is just what every cold and catarrh sufferer needs. Don't stay stuffed-up and miserable. (Adv.)

No Worms in a Healthy Child

All children troubled with Worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS CHILL TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a General Strengthening Tonic to the whole system. Nature will then throw off or dispel the worms, and the Child will be in perfect health. Pleasant to take. 60c per bottle.

NOSE CLOGGED FROM A COLD OR CATARRH

Apply Cream in Nostrils To Open Up Air Passages.

Ah! What relief! Your clogged nostrils open right up, the air passages of your head are clear and you can breathe freely. No more hawking, snuffling, mucous discharge, headache, dryness—no struggling for breath at night, your cold or catarrh is gone.

Don't stay stuffed up! Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, giving you instant relief. Ely's Cream Balm is just what every cold and catarrh sufferer has been seeking. It's just splendid.

WHAT A DEMOCRAT VOTE MEANS THIS YEAR.

There has never been a national mid-election in which there were so many important domestic issues directly affecting the interests and welfare of all the people.

A vote for Democratic candidates this year will mean that the voter is voting against:

An extortionate profiteers' tariff act which taxes the American people between \$3,000,000,000 and \$4,000,000,000 and increases the already high cost of living.

A revenue act which relieved the big taxpayers of over a half billion dollars with no corresponding relief for the smaller taxpayers.

A proposed Ship subsidy bill which would dispose of \$3,000,000,000 worth of merchant ships for less than one-tenth of their cost and gives a bonus of \$750,000,000 to private interests commonly known as the Shipping Trust together with a loan of \$125,000,000 at 2 per cent and exemption from taxation.

Newberryism, Daughertyism and Nat Goldsteinism and the scandalous appointments by this administration.

A policy which created a treasury deficit of \$850,000,000 for this fiscal year in which the administration makes a pretense of economy.

A policy which caused the loss of our foreign trade and foreign markets, resulting in bankruptcy to farmers and others.

The rejection of Henry Ford's Muscle Shoals proposal to the great injury of agriculture.

The spoils system of appointments and the assassination of the Civil Service.

A lack of foreign policies and a lack of sound business, economic and industrial policies.

A continuance of the Republican industrial panic of 1921-1922.

These are but some of the things against which Democratic voters will cast their ballots.

Republican leaders and spokesmen have tried to dodge these and other issues of campaign, and where it was not possible to dodge, to misrepresent them but the voters themselves have selected the issues this year and will vote accordingly.

Those who vote the Democratic ticket will be voting for something as well as against something. They will be voting to restore the legislative branch of the government to the Democratic party, which opposes the tariff robbery and all forms of profiteering; which favors rigid economy in appropriations and expenditures of public moneys; which favors clean elections of United States Senators and a drastic Corrupt Practices Act; which favors reciprocal market conditions abroad for the benefit of farmers and other producers or surplusmen in the United States; which poses special privilege and its lobby at Washington; which favors an intelligent and honest Merchant Marine policy which favors constructive legislation to revive agriculture; to insure justice to labor and to re-service men; and to restore sound, stable prosperity in America such as that which the country enjoyed under eight years of Democratic rule, prior to its destruction under two years of Republican rule.

RESOLUTIONS ALONE MEAN LITTLE.

At a meeting of the livestock men of Milam county following an open session of the Commissioners Court at which time the matter of tick eradication was discussed and it was decided by the court to resume the work, the stockmen passed a resolution pledging their support.

Following this the stockmen in convention assembled appointed aides in each of the vat precincts to assist the inspector and to report such cases as tend to obstruct the law. All of this was fine and no doubt had the effect of inducing the Court to resume the work.

Now, it will be impossible for the county to clean up the tick and save the livestock industry if the policy of leniency heretofore exercised toward certain rebellious stockmen is continued. At the same time if the stockmen repeat their performance of two years ago when they met and

"passed a resolution" and then gave little active assistance, nothing will be accomplished and the Commissioners Court will be amply justified in stopping all expenditures for this work.

The action of the court in voting to stop the work with the subsequent publicity given the ill affects of such a move proved to be a sort of hyperdemic because it got under lots of skins and the big demonstration of protest before the court resulted.

Conservative people on both sides must realize that the court has exercised every possible means to get results and to carry out the work. That the court made a mistake in voting to discontinue this work is evidenced by the rescinding of its vote which was unanimous.

The matter of cleaning up the county is now in the hands of the stockmen.

The Herald has taken an active stand for the livestock industry of the county having been the first newspaper to champion the cause of the stockmen against the action of the Commissioners Court. The Herald said in its first editorial that great difficulties are experienced always in law enforcement because of the apathy of the public. Officers cannot do all that is to be done in enforcing this tick law so the matter is squarely up to both the county and the people.

If for any reason the stockmen do not get behind this movement as indicated in the resolution, the court would be justified in refusing further funds next year.

The facts controvert statements already made ridiculing the progress made by the county. As a matter of fact there are less infections in the county now than two years ago or one year ago according to inspector in charge, Raymond Beard. So lets not discourage the work, even though we are not in sympathy with it, by leading the public to believe no progress has been made.

Resolutions mean little unless backed up by one hundred per cent co-operation.

HOW ABOUT THE 1923 FAIR?

Those who see the benefits of the Fair and Stock Show as a means of stimulating industry and building the town are at a loss to understand the delay in carrying out the instructions of the Commercial Club relative to the formation of the proposed Fair Association to promote the 1923 attraction.

That valuable time is being lost is apparent to everyone. If the performance of the committee is repeated in waiting to the very last possible time to begin, we cannot expect the fair to be a success nor will the business men and farmers and stockmen feel under obligations to respond to the financial program.

Stockmen and farmers have come to the point where they want to give the fullest co-operation and have been willing to bring their exhibits here under the most unfavorable circumstances. Will they come to Cameron in 1923 with no show grounds or equipment?

The Commercial Club has shown its interest at the proper time and in the most practical way. President Lawrence has appointed a committee to form this association and to handle the details of the fair and stock show. The responsibility is now up to the committee. When the chairman chooses he may call this committee together and begin the work but until this is done nothing will be accomplished along constructive lines.

It is hard to believe that Cameron will overlook this great opportunity. Good roads have given us trade. Resources have made possible a greater city but all will be lost of undeveloped and the city fails in these essential civic duties so necessary to progress.

What is the answer of the Club to the proposition that we have here in 1923 a great fair and stock exhibit?

DRYING UP THE BOOZE STREAM AT ITS SOURCES.

There are four sources of supply of the liquor trade in this country.

1. Bonded liquor now in ware-

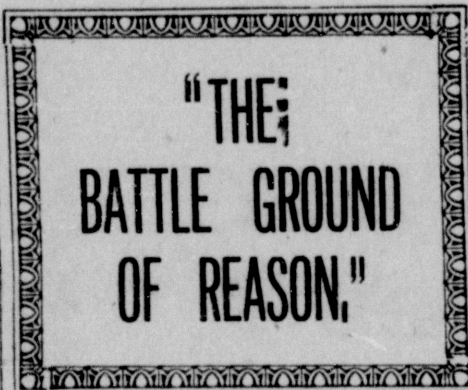

2. Imported and smuggled liquors, houses, released on permit.
3. Home brew.
4. Moonshine.

The bonded liquor source is now effectually controlled. Practically no "red" liquor is being sold in this country. Much that is supposed to be "red" liquor is sold but it is really moonshine.

Smuggling is a source of much trouble, especially on the Canadian border and on the Atlantic Coast. The amount thus brought in is not known. The quantity is large, but would hardly make one swallow for every person in the United States in a year. The smuggling source will be effectually controlled when arrangements are perfected with Great Britain by which the territory of that country shall no longer be used as a base of supplies for criminals and enemies of the United States. The United States should assert the doctrine that it has a right to prevent the sea bootleg trade no matter how far from shore it is necessary to strike at these pirates. When a boat establishes contact with the American shore, it is in fact in American waters and as soon as it is clear that a ship intends to establish contact with the American shore for illegal purposes, it should become amenable to United States law. The Christian people of Great Britain would not permit that Government to do anything to protect a trade which can only be compared to the African slave trade, which the British navy fought wherever it was located.

The home brew source has become negligible. The output of beer in American homes is absolutely infinitesimal at the present time. Foreign speaking people, not yet Americanized, make a good deal of wine.

The production of moonshine is at present the most troublesome factor. Stills, however, are usually very small, operated for only a limited time and the aggregate production, while large, would hardly equal the output of one well equipped distillery. The character of moonshine, its poisonous qualities, raw and violent taste, and the filth attending its production are so well known by the general population that a few people of average intelligence will risk its consumption.

ELECTION RESULTS, ETC.

The Cameron Herald.

Dear Sirs:

Well it wusent dun fare.

First. They run ruf shod over our injunctions and put Mayfealds name on the ticket in several countys any how. Hit was a shameful affair the way they fooled them wimin up and got them to vote for Mayfeald.

Second. They made a lot of our voters think it was a little disonable, not to "support the ticket." Oh shaw and didnt I try to explain to them as how that agreement was only gess a little ole "scrap of paper."

Hit shon is strange as how some people look at things. Third. Hit seams to be a shore thing that them devilsh K. K.'s got in sum sneekin under handed covered up work. If tha hadnt tha couldnt a beet our own deer Gorge so bad. W'll boys some body reniged shore as Adam and I believe that dam K. K. sentiment is at the bottom of the hole thing. Well truth is mity and will riz agin. So less study our selv and get our heds together and come agin.

"Freadum and Pusernel Libberty" can not be crushed from the earth.

I sea several of the States have got it back already.

Now what move shal we make next. Shal we go back and revive the "American Party" or shal we run sum more injunctions. What shal we do? It behooves all free born luvvers of freadum and pusernel libberty to rally to the standard. We have sum mity fine lawyears an gedges on our side. Oh, yes, of course they agreed to do all in their power to hold and enforce the "Law" but then that is just a "scrap of paper." You no realy tha are good fellows and will do all in their power for "Freadum and Pusernel Libberty." Sure Bill, we should have the rite to do as we please for it is no bodys buziness.

Now boys let us continue the fite for Freadum and Pusernel Libberty, Law or no Law.

OLE FREADUM.

T. C. STAFFORD, Agent.

NEGRO EXTENSION AGENTS MAKES REPORT HERE.

Having been assigned my work effective September 5th, I left my home, in Houston, in order to reach Cameron, my headquarters, at least two days prior to my beginning.

After having met with the Chamber of Commerce and other officials of the City, I began my plans for an organization of the county.

To organize the county for effective work, I saw the need of a central committee hence, I called on some of the leading citizens of the City called a meeting and from which selected a temporary central committee. I might say just here, well was my selection, because, the men proved to be well known, very influential and had a splendid conception of the communities and team work.

I with the help of the committee, arranged an itinerary of fifteen or 20 days drive for organization.

This is a very large county, with the people living in prepared communities and yet the composition of the soil differ considerably in these various localities, ranging from bottom to prairie, loam and clay, which give rise to a variation in production.

I have traveled over two thousand miles during these two months, speaking to more than three thousand people, organized twelve community councils and clubs among the farmers and farmers wives, visited nine schools and organized ten boys clubs.

The meetings have been very enthusiastically attended and most of the farmers have accepted our message.

I have stressed the need of fall plowing, as well as, the clearing of the fence rows and ditches, also the cutting of both cotton and corn stalks to help eliminate the boll weevil.

The care of the stock has been emphasized both from feed and a treatment stand point, while no little pains were spread in cautioning the car of the farming implements, planting of winter grazing for stock and poultry, seed selection and breeding of live stock. Many have become enthusiastic in breeding and are beseeing the agent for the location of dairy cows.

The banking system has been installed in many of the public schools with an end in view of saving enough funds to at least give themselves a normal course when they have finished the public schools.

In my drive I have visited the homes as well as the farms and found many homes very unsightly and open to germ carriers. I have stressed the need of beautifying the home and home premises with special stress on the location of the wells for drinking water and screening their houses.

I am especially pleased with these two months work with my central committee and am planning on recommending to the community councils to elect them for the following year to co-operate with me in my work.

Too much cannot be said just here of the splendid highways of this county, which shows a progressive people.

A. M. SMITH,
Negro, County Agent.

ELECTION NOTICE

State of Texas.

County of Milam. The petition of G. C. Black and others for a stock law election having been presented to the Honorable Commissioners Court of Milam County, Texas, on October 11, 1922, the same being a regular term

of said court, the court having ascertained that said petition contained the requisite number of freehold voters ordered an election to be held at Hanover and Marlow on Monday November 27th. 1922 for the purpose of determining whether horses, mules, jacks, jennets and cattle shall be permitted to run at large in the following described territory, in Milam County, to-wit:

Beginning at the S. bank of Little River in Milam County, Texas, at the Faubion bridge across said river on the Gause and Branchville public road, thence down Little River with its meanders to the N. W. corner of Wash Davis 27 acre tract on the S. bank of said River, same being the N. W. corner of the Pedro Lopez Grant; thence Westward with the line of said Pedro Lopez Grant to its S. W. Corner on the N. line of the Francisco Ruiz TwoLeague Grant; Thence S. 60 W. with said N. line of the Ruiz Grant to the N. E. corner of the T. S. Henderson 500 acre tract on said grant; thence S. 30 E. with the E. line of T. S. Henderson 500 acre tract and the E. line of Minnie B. Henderson 347 acre tract to her S. E. Cor. in the S. line of the F. Ruiz Two League Grant; thence S. 60 W. with S. line of said Ruiz Grant to S. W. Corner of A. P. Phillips tract being the S. E. Corner of Geo. Wise 268 tract on said Ruiz grant thence N. 30W. with the west line of the A. P. Phillips tract and T. S. Hen-

derson 90 acre tract to the N. W. corner of said 90 acre tract on the N. line of said Ruiz grant; thence with the said N. line S. 60 W. to the N. W. corner of said Ruiz Two League Grant thence S. 30 E to L. M. York's S. E. Cor. thence N. 71 W to L. M. York's S. W. corner; thence N. 19 E. to the S. E. Corner of L. M. York's 113 acre tract; thence N. 71 W. to the S. W. Cor. or said 113 acre tract in the W. line of J. K. McLennan Grant; hence S. 19 W. to the S. E. corner of Frank Fisher's 127 acre tract on the Wm. Moore Grant; thence N. 71 W. to the S. W. Cor. of H. E. Black 127 acre tract; thence N. 19 E. to Wm. Ingham's S. E. cor.; thence N. 71 W. to S. W. corner of T. G. Kirks 125 acre tract; thence N. 19 E. with the N. line of said 125 acre tract and the N. line of the Wm. Moore Grant to Cameron and Gause public road; thence with said road to the McCown bridge on Little River; thence down Little River with its meanders to the beginning.

G. C. Black is appointed manager of said election at Hanover and S. W. McClaren is appointed manager of said election at Marlow. Said election to be held as before mentioned on Monday November 27, 1922.

Given under my hand and seal of office this the 22nd day of October A. D. 1922.

Jeff T. Kemp,
County Judge, Milam County, Texas.

Chiropractic

—the new method of analyzing the symptoms and eliminating the physical cause of disease.

Chiropractic is based upon a knowledge of the structure and function of the human body, especially that of the brain, vertebral column, spinal cord and the nerves emanating therefrom. The brain is the power plant of the body, the nerves are the wires which conduct its power. Pressure on a nerve at the opening where it leaves the vertebral column will permit disease in that organ or tissue at which the nerve ends, for power it can not either live or function.

Call and investigate this science. It is a pleasure to tell you about it. CONSULTATION FREE.

PETE AND PINTO

The Cowkids of O-Joy Ranch

By M. M. BRANNER

A Country Boy in the "Black Waxy"

By GEO. C. PENDLETON

Read at Annual Meeting of Old Settlers at Belton, Texas, Sept. 27, 1902.

In the presence of so many persons whose residence here is of longer duration, or who are to the manor born, I should feel highly honored to be an "old settler," yet it appears presumptuous on my part to address you as an old settler; but when I am asked to discuss the experience of "A Country Boy in the Black Waxy," I feel more at home. To be a country boy, or any sort of boy, I had first to be born, and that interesting event occurred in Coffee county, Tennessee, on the 23rd day of April, 1845.

Next, to be in the Black Waxy, I had to come to Texas, and in October, 1857, my father, with mother and six of us children, started overland in wagons on our long and weary journey. We had with us, John A. George and family, one of his brothers-in-law, Mark Alexander, being a grown man, also John M. Young, son of Rev. Alpha Young, and Henry French and family, also P. H. Coffee.

We crossed the Tennessee at Savannah and the Mississippi river at Memphis and came through on the Military road by Little Rock and Fulton, and stopped a day or two at Clarksville, Texas, to see an old Tennessee friend, Rev. Stone.

At or near this place, we had our first experience with the Black Waxy in a wet condition. Our wagons ballooned up, and the wheels became solid and we had to stop and dig it off with a hoe. A day or two later, we met our first Texas norther. It was a regular blue whistler and went through our flesh to the bones. All the fires we could make and all the clothing we could put on, would not make us comfortable. Afterwards, we had many similar experiences.

Shoots Deer When 12 Years Old.

Early in December, we arrived on Chambers Creek in Ellis county and camped near old man Nicholas Sims's. Here I had my first shot at a deer. I broke his fore leg, but did not kill him. However, I thought that was doing pretty well for a 12-year-old boy with a bad

attack of the buck ague.

In a few days, father bought land about five miles from John Westbrook and we settled down as Texans. Our neighbors were Wilkinsons, Mabrys, James McCulloch and J. M. Weakly. We had been visited by a great drouth and corn was \$1.00 a bushel, but we did not need much for the whole prairie was open, wild rye grew in the creek bottoms, and there were a few green wheat fields, and into them we turned our tired Tennessee stock. The prairies were covered with cattle, but there was no milk or butter. If any man had talked about feeding a cow, they would have regarded him as a Yankee and too smart for the country.

Mother was a very domestic woman and next summer she put up a winter supply of butter, but when we came to eat it, it was like the negro said about the bacon, "quite ransome." Corn and bacon were quite scarce, but we had flour and beef. Lard was hard to get, so the biscuit were often shortened with tallow and it was a joke told on hearty eaters that they carried a hot brick on their heads to melt the tallow out of their mouths. The neighbors would club in and kill a beef every few days, each one taking a quarter. The bottoms were full of wild bees and we would put out bee bait and follow the bees to their homes and rob them.

The prairies and timber were full of deer, turkeys, wolves and wildcats, and we had royal sport. I killed my first deer when not quite fourteen years old, and on my way home for a horse to carry it, shot at another, and returning with the horse, found it dead also.

On the 26th day of August, 1860, after a long drouth, we had an extraordinary rain. A few days afterwards, while hunting, I found some deer lying down on the head of a little branch. I waded up the branch and got within twenty feet and fired. One deer spun right around like a dog. This so excited me, that I ran to it and broke the breach of my gun over its head.

It was great sport in the early fall

to take dogs and chase turkeys out of the prairie branches and over the prairie ridges and catch the half-grown ones before they could get to timber. We fried the breasts which made a feast for an epicure. The turkeys sometimes ate wild onions, and this would make their flesh unpalatable.

Before the great rain of 1860, the prairie was worse cracked than I have ever seen it since. The rain came suddenly, and the snakes disappeared. We always supposed that they had crawled into the cracks to keep cool and were suffocated by the rain and mud. Be-

We used the primitive appliances, the sickle and the cradle, but about that time they began to get in the reaper, which was the ancestor of the improved machine of today. We bought one made by Geo. H. Rugg of Chicago.

The team was hitched with heads to the machine, and pushed or pulled it in front of them and the raking was done by hand. We thought it quite a fine machine. Now its appearance in action would only excite amusement and ridicule.

We raised horses and in the fall of 1858 went to Mexico to buy mares,

"Our Principal Crop Was Wheat, and When Harvesting, We Tied It By Hand."

fore the big rain they were very numerous, especially the Prairie rattler, a little snake, about two feet long, very active and poisonous.

Primitive Harvesting.

Our principal crop was wheat, and when harvesting we tied it by hand. When the bundles would lay a little while, the prairie rattlers would crawl under them to get into the shade, and in shocking, we were in constant danger of being bitten.

camping at the Silas Baggett Spring near Howard. Returning, in February, 1859, we stopped with Hiram Christian on Cedar Creek. He was an old Tennessee friend. We reached home in Ellis county on the 13th day of February, 1859, and planted corn on the 14th.

In those days, the only possible chance to raise corn was to plant early. Our nearest postoffice was Milford, ten miles away. I was mail boy, and once a week would gallop over with the sack

of mail on a little Black Indian pony called Sam.

No Daily Papers.

We had no daily papers and were glad enough to get a weekly. From some cause during the heat and drouth of 1860, there were many fires and the towns of Dallas, Georgetown and Brenham were burned. Many persons believed that it was the work of Northern abolitionists, who were laying plans for an uprising of the negroes. I read a circular issued by John Henry Brown, who lived in Belton, to show the alarm that was felt. Churches and even school houses were very scarce and religious services were generally held at the homes of the people.

We hauled our pine lumber from Anderson county, over 100 miles distant, in ox wagons. It took from a month to six weeks to make the trip, and of course, lumber was scarce and high. In the absence of our parents, we boys amused ourselves in saddling up and riding steer yearlings. After putting on the saddle, we would attach a long rope to the steer's horns, the rider would take off his shoes and get into the saddle, the blinds would be raised from the steer's eyes, and then you could see some of the finest pitching that was ever done—for a steer is an expert in that line. In that way I learned to break wild horses, a very valuable accomplishment in those days.

Hospitality was the rule. The coffee pot was kept on the fire and the visitor was offered a cup as soon as he came in. Stock hunters did not ask for dinner, or to stay all night, but took it as a matter of course to stake their horses on the grass near the house and then to walk up and sit down and wait until called to the table.

I could discuss our ways, conditions and manner of living to much greater length, but fear to weary you. In the evolution of time and events, we have many comforts and conveniences that we lacked then, but we will never have a better time or more manly people. Peace to their memory.

Mineral Resources of Texas

Non-Metallic Minerals

By E. H. SELLARDS

Geologist Bureau of Economic Geology of the University of Texas.

Fullers Earth.

Fullers earth is a clay which has the property of absorbing basic colors and removing these from solution in animal, vegetable and mineral oils, as well as from water and certain other liquids. In commerce the earth finds its chief use in clarifying oils, although it has in addition a number of minor uses, among which are the removal of the excess of coloring from water in dyeing cloth; as an ingredient in talcum powders; as a detergent in fulling cloth; and to some extent for medical purposes, having been used in poultices for swelling, ulcers and sores. Fuller's earth has also been used recently in the preparation of a new reagent, known as Lloyd's reagent for alkaloids. This reagent, used for the removal of alkaloids from the aqueous solution of their salts, is reported to be more efficient for that purpose than charcoal or freshly precipitated aluminum, heretofore chiefly used for that purpose. The action of the reagent is supposed to be due to the presence of hydrous aluminum silicate.

Fuller's earth, like other clays, is complex and consists not of a single mineral, but of a variety of minerals, the mineral particles being mixed in different earths in widely differing proportions, resulting in a varying chemical and mineralogical composition. The ultimate analysis does not differ materially from that of other clays, although fuller's earth has as a rule a rather high percentage of combined water. The properties of the earth arise apparently from the physical condition of the clay and can be detected only by a filtering test by which its practical utility in clarifying oils is determined.

In testing an earth for clarifying a mineral oil the earth is dried, powdered and placed in a tube. The mineral oil is then passed through the tube and will be more or less perfectly clarified, depending upon the quality of the earth. A different test is necessary for a vegetable oil. In testing vegetable oils, according to Wesson, a weighed amount of the oil and the fuller's earth are stirred together for a regular period at a temperature of 100 degrees C. The oil is then filtered and compared with other known fullers earth treated under exactly the same conditions.

Various other properties are assigned to fuller's earth, but all, aside from the actual bleaching tests, are so variable, or are common to such a variety of clays as to be of only secondary value as a means of identification. Non-plasticity is often given as a property of fuller's earth, but it appears from the investigations of Porter and others that some of the fullers earths are distinctly plastic when mixed with a large proportion of water. Some of the fullers earths will disintegrate in water, although others are little affected thereby. Most fullers earths on account of their porosity when dry will adhere firmly to the tongue, but some other clays will do the same. In color fullers

earth is as variable as other clays, and while buff and blue clays predominate, others are brown, gray or almost white. As a rule fullers earths are light in weight owing to their porosity, although there are exceptions, and the specific gravity is much the same as that of other clays. These secondary properties, although of value in tracing any particular bed after this has been located, are not to be relied upon as a complete test.

Fullers earth is produced in Texas in Bexar county, and is known to occur in Burleson, Fayette and other counties in the state. Mining is by the open pit method, the overburden being removed down to the fullers earth stratum. After being taken from the earth the clay is dried and pulverized. It is then bolted and sacked for shipment. When used to clarify mineral oils the clay is ground usually to pass from 30 to 60 mesh sieves, while for vegetable oils it is ground much finer, to pass 100 mesh or 200 mesh sieves.

Potash.

One of the undeveloped resources of Texas is potash, a substance of great value as a fertilizer. This mineral is known to occur underlying an extensive area in West Texas, where it is found at varying depths. In addition it is present as a constituent of the so-called alkali lakes, occurring particularly throughout the Panhandle section of the state. The underground deposits of potash, known up to the present time, have been located chiefly as a result of drilling deep wells as test wells of oil. Under these conditions little is known as yet as to the thickness and extent of the potash beds. As to the richness, however, analyses of numerous samples have now been recorded indicating that the mineral, whether existing in large or small quantities, is at least in places of commercial grade. Well drillings are now under way designed to test the quantity and quality of the potash deposits underlying certain areas in the Great Plains.

Near the town of Odessa, Texas, there is being put down by a private company, but under the close surveillance of the United States geological survey, a core drilling to determine the thickness of the vast potash beds that are found in that region. Indications and experiments by chiefs of the survey point to potash deposits in the Odessa region of great commercial value.

The potash of the alkali lakes has not been utilized in Texas. However, in Nebraska lakes of this kind have presented a source of no inconsiderable amount of potash. At the present time investigations are under way looking into the utilization of the Texas alkali lakes. Bulletin 17 of the University of Texas relating to the potash deposits is now out of print, but can be consulted in many of the libraries. A bulletin relating to the possible utilization of potash in the alkali lakes of the Panhandle district is now being published and will be known as the University of Texas Bulletin, 2284.

Salt.

Salt in Texas is found in large quantities in the salt domes of the Gulf Coastal Plains and likewise in bedded deposits in the Permian formations of West Texas. The salt domes, in the past, have been, in no small degree, a geologic puzzle. The origin of these domes is difficult to explain and at the present time there is much that is unaccounted for in these peculiar structural features. Nothing like them is found elsewhere in the United States, although their counterpart exists in some of the countries of the eastern hemisphere. A salt dome is a mass or plug projecting up into or through the underlying formations. In some of the domes, the salt core rises to the surface, or very close to the surface. The location of such domes is usually indicated by a depression showing seeps of salty water. It is from such depressions, known as salines, that the salt of Texas is being chiefly obtained at the present time. Others of these domes in which the salt core fails to reach the surface may be represented by an actual dome-like elevation on the ground, such as Damon Mound in Brazoria county.

In the coastal belt of Texas, no less than five or six domes have been shown, by drilling, to contain a core of salt and numerous others are believed, with little doubt, to also contain a core of salt, although buried to a greater depth.

Near the inner margin of the Coastal Plains are domes probably of the same type as those near the coast and it is from these inland salt domes of Texas that salt is being produced at the present time. Among the domes of this type are Grand Saline, in Van Zandt county, Palestine Saline in Anderson county, Steen and Brook's Salines in Smith county. All of these salines either are now or have been utilized as a source of salt, the salt being obtained by evaporating water taken from shallow wells.

The Permian formations in West Texas are known to contain thick beds of salt. This salt was formerly worked at Colorado City in Mitchell county, but is not being worked at the present time. In addition to these salt deposits there are found in West Texas, salt basins in which the salt accumulates at the surface owing to the evaporation of the surface waters to such an extent as to form salt deposits which have been utilized to some extent in obtaining salt for cattle and other purposes.

The salt produced in Texas in 1920 amounted to 91,103 tons, valued at \$755,585. Available publications relating to salt in Texas include Bulletin 669 of the United States Geological Survey, known as the "Salt Resources of the United States," and Bulletin 44 of the University of Texas.

Sulphur.

Both in its occurrence and in the methods of mining, sulphur appeals with special interest. That which is now being mined in Texas, is found in the salt domes of the Gulf Coast coun-

try. While the central core of such domes is salt, there is frequently found above or around this core of salt, a deposit of sulphur, and it is from such domes that practically all of the sulphur that has been produced for commerce in the United States is taken. The method of mining is likewise unique. Hot steam is conducted into the earth through pipes and there melts the sulphur. The melted sulphur is then pumped out and is allowed to cool in large reservoirs, provided for that purpose. In this way mountains of sulphur are brought to and piled upon the surface for use as occasion demands.

In addition to the sulphur of the salt domes of the Coastal Plains, some sulphur has been found under somewhat different conditions in Culberson and Reeves counties. These sulphur deposits which have been described in Bulletin 1722 of the University of Texas are not being mined at present.

The sulphur produced in the United States during 1918 amounted to 1,266,709 tons, having a value of \$27,868,000. Figures on actual production in Texas are not available, but it is known that fully ninety-nine per cent of this total was produced by mines located in Louisiana and in Texas, the greater production coming from Texas. During the war period, sulphur reached in the point of value of production second for the state being exceeded in value only by petroleum.

Copper, Gold, Lead, Molybdenum Tin and Zinc.

The minerals copper, gold, lead, molybdenum tin and zinc have been produced only in very limited quantities in Texas. A number of them, however, are somewhat widely distributed. Copper is also found in several counties of northwest Texas where it occurs as native copper in the Permian formations. Copper in this form has been reported from Clay, Archer, Haskell, Wichita, Baylor, Taylor, Foard, Knox and perhaps other counties, and has, in the past, been mined to some extent.

Gold has been produced only in very limited quantities and chiefly as a by-product, although in Llano county gold was for a time mined.

Molybdenum has been reported from some localities in Llano county. Zinc has been found in limited quantities in El Paso and Presidio and Culberson counties. Tin was at one time mined from the Franklin Mountains about twelve miles north of El Paso. The total value of gold, silver, copper and lead produced in Texas in 1918 was \$580,802, of which the greater part was silver.

Iron.

Iron ore is found in Texas in the pre-Cambrian formations of the Central Mineral region and in the Tertiary formations of the Gulf Coastal Plains. The Tertiary iron ores are found in the Mt. Selman and Cook Mountain formations, chiefly in Northeast Texas, being found in Anderson, Cass, Cherokee, Gregg, Henderson, Marion, Morris, Smith, Upshur, Wood and other counties. This

ore is chiefly in the form of limonite and carbonate. It occurs as laminated and as nodular deposits as well as in conglomerate masses. Since the iron ore is hard and resistant to wear, it is commonly found at the present time capping the top of hills, indicating that the ore body has resisted erosion longer than the surrounding sediments. The metallic content of these ores averages from 30 to 35 per cent, although occasional deposits are higher in iron. The Tertiary iron ores have been worked to some extent, although no mines are in operation at the present time.

The iron ores of the Pre-Cambrian of Llano, Mason and Burnett counties are found chiefly in shistose rocks and include magnetite, hematite and soft ores. These ores, which vary from 25 to 65 per cent metallic iron, have not been developed on a commercial scale.

Silver.

Silver has been produced in Texas from at least five counties, namely, Brewster, Culberson, El Paso, Hudspeth and Presidio. The greater part of the production, however, is from the Shafter district in Presidio county, where the silver ore is found filling cavities and crevasses in Permian limestones. The principal ore is in the form of silver chloride, although some of the silver is associated with galena. Culberson county ranks second in the production of silver. At the Hazel mine in this county, the silver ore is found in veins in Cambrian sandstones. The amount of silver produced from the other counties mentioned is relatively small.

The silver produced in Texas during 1919 is valued at \$604,690. Among publications should be mentioned Bulletin 24 of the University of Texas, which related to the geology of the Shafter Mining district.

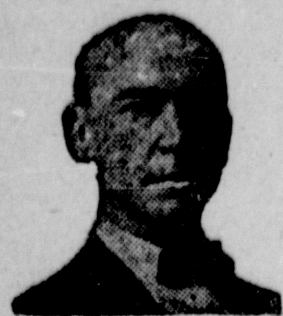

Quicksilver.

The quicksilver in Texas is obtained from mines located in Brewster county. The mineral is very largely cinnabar, a sulphide of mercury, also known as natural vermilion. The ore is found in dikes and fissures which cut through the Cretaceous formations. In these deposits there has been observed, by Udden, a relationship between structural features and quicksilver deposits. Thus the richest deposits are found in domes, anticlines or terraces, in this respect resembling the accumulation of oil and gas in similar structures. Aside from the structural feature, accumulation is affected likewise by variations in the character of the rocks. Thus the mercury minerals accumulate in limestone at the point of contact with overlying shales or other impervious rock. The deposit of mercury ore is not confined to any one formation, but is found in successive formations where the conditions are favorable to accumulation particularly at the contact of limestone with shale. The veins in which the mineral is found are frequently fault planes representing breaks and displacements of the rocks. The production of the quicksilver began in Texas in 1900, and in 1918 (Continued on Page 7.)

CURRENT COMMENT

By J. H. LOWRY

STYLES.

People who write for newspapers these days must be very careful and guarded, not only in what they write, but in the subjects they choose for discussion. It is always out of place, as well as very dan-

gerous, to undertake a discussion of religious matters, for with us religion and church are synonymous terms, and if something be written, or some hint be dropped, that gives some person's church the "worst of it," a subscriber will be lost and that person will become an enemy for life. No matter if a person doesn't care enough for a church to attend its services once a year, or put more than a nickel in its collection plate when he does attend, his bristles will stand up straight and he will spout venom even as an inflated balloon spouts smoke the minute you intimate that the doctrines of his church do not square with Biblical teaching, or that the adherents of his church's doctrines are not on the straight and narrow way that leads to the abode of the blessed. People sometimes admit error in their views on other matters, and occasionally one will admit wrong in act or deed, but let a fellow select his route to the great white throne, and he will neither admit error nor stand for criticism. It is getting almost as dangerous these latter days to discuss politics, and we all have learned better than to touch the Ku Klux question in our writings or speech; and so the fellow who seizes his pencil to write for newspapers finds a very circumscribed field, with daggers lining the boundary lines and hundreds of bloody-eyed people warning him to stay out.

The safest question to discuss at present is styles of dress, provided, of course, that one makes his discussion general rather than personal. You may say with impunity that skirts are worn too short or too long, too tight or with too much fullness, but it would be rank madness and foolhardiness to single out some maid or madame and remark upon the brevity, the length or the tightness of her skirt. But the skirt styles have changed, whether for better or for worse. Whether in the interest of modesty or to the destruction of legitimate scenery, the styles of skirts have undergone a drastic change, and every person may express his opinion of the change without doing violence to the

proprieties or giving offense to wearers, for wearers are only the obedient servants of the style-makers. I do not wish to take any foolish positions or make any rash statements on the changes in styles or what brought the changes about, but hope to approach the question in the same safe, sane way that I would employ in the discussion of any other great economic question. I am convinced, however, that the oculists and opticians were responsible for the short skirts, which had a long and eventful reign, but are now taking their departure. Business was running light with the professions named, and the representatives of said professions paid the style makers handsomely to decree short skirts. Whether or not the bonus paid by the oculists and opticians was a legitimate investment I shall not stop to discuss. It is hard to draw a line of demarcation and say just where legitimate overhead expense of a business or profession ends and graft begins; suffice it to say that the investment proved a very profitable one. Such an epidemic of eye-strain, astigmatism, myopia, strabismus and other optic troubles as followed the introduction of the short skirt was never before known to the world. But what is one business or profession's gain is another business or profession's loss, and no profession or combination of professions can long remain in control and fill its tills to overflowing when other professions or lines of business are suffering loss and facing bankruptcy. Business fell off with the milliners and the astronomers while money poured into the tills of the oculists and opticians. Nobody paid any attention to headwear, neither did anybody gaze at the stars that twinkle in the arched vault. The milliners and the astronomers could not sit still and witness the destruction of their means of livelihood. They got in touch with the style-makers and the modistes, paid the required fee, and lo, long skirts were decreed. Today people do not pity the blind as they did two months ago, neither do they shed tears over the sorrowful fate of the near-sighted; and the demand for high-powered spectacles has fallen off to almost nothing. Furthermore, people are beginning to discuss millinery again, and occasionally one hears something about the glory of the stars that stud the great celestial concave.

For one, I have never been a harsh critic of the styles of dress, or of the wearers thereof. I have said some hard things about men who wear coats with belts on the back, and these things I shall be very slow to retract. Men are supposed to deal only with the utilitarian in their wearables. If there be

buttons, they are to button something; if there be strings, they are to tie something, and if there are belts, the belts are to hold something in place. A coat will stay on without the aid of a belt, therefore the coat-belt must be classed as an ornament, and when man invades the ornamental or artistic in his vestments he is a fright to behold. Enough money has gone into belts for men's coats the last few years to have built thousands of miles of pike roads or to have made heavy inroads on payment of the public debt, and yet every belted coat would have remained anchored to its moorings without the aid of the belt, and surely the men who wore the belted coats would have looked a blamed sight better. There is fully as much need for a belt around the trouser leg as there is for a belt at the back of a coat, and I live in constant fear that some tailor will start the style of belts on trouser legs and thus further impoverish the country and make man look a little more like the animal. Darwin claims was the original ancestor of us all.

But, as stated above, I have never been a harsh critic of woman's wear. Woman finds her greatest delight in wearing things; and woe unto him who undertakes to tell her what she shall wear, or what she wears shall look like. Mother Eve's first drapery was of fig leaves, and I am sure she was supremely happy when she donned the costume and went down to the lake to see herself mirrored in the limpid waters thereof. I am also sure that she took the trail that afforded Adam and the serpent the best possible view of her, and that if Adam or the serpent was foolish enough to suggest that she ought to add a few more leaves to the costume, or that oak leaves would have been more becoming to her complexion, there was a row in Eden that the Good Book tells not of. Of course, some other kind of leaves was in vogue the next season, and doubtless to the leaves were added sprigs of grass, as ornaments, but I can not help thinking a great deal of the fig leaf, and bowing before it in lavish homage, for from the fig leaf came the idea of the evolution to the glorious costume lovely woman wore last season—perhaps the nearest approach to the Edenic dress the world has known since the flood. Let others do and talk as they may, but as for me there shall be no harsh criticism of woman's wear. I may grow ultra bold some fateful day and march bravely up to a whirling cyclone, and tell the terrible destroyer to untwist itself and wind up the other way; a foolish spell may come over me some time during which I may tell a Kentucky colonel that the bourbon he

used to quaff was of a poor quality, but so long as reason sits enthroned and wields the sceptre of discretion and good judgment I shall never be guilty of trying to dictate to lovely woman what she shall wear nor wherewithal she shall be clothed. While others are inviting feminine wrath by criticising feminine apparel I shall say carte blanche for women in matters of dress. And why not? I have seen woman in dress of every length, width, shape and cost, and however appareled, she was a feast for the eye and a joy to the soul. I saw her in the old-fashioned cotton checks, that reached to her bare feet, as beside her I hoed cotton and corn in the long ago, and I saw her in the highly-colored and artistically checked calicoes of which her Sunday and party costumes were made. I saw her in the hoop-skirt days, when no two women could turn around simultaneously in a small room, but even then I saw beauty and not bulk. I saw her in the tight skirt days, when her skirt fit her form as closely as an umbrella cover fits a canvas ham. Of course, I wondered how she got into the skirt, and how once in it she managed to take steps of more than two inches, but my admiration was far greater than my wonder. When the skirt of ultra abbreviation came, and the world saw more of women than it had ever seen before, I went forth to frown my awfulest upon it; but I was one of many who went to scoff who remained to look—who went to frown, but remained to feast and smile. I am constrained to believe that mankind is slow to concede woman her rights in matters of dress, that men accord to others far greater privileges and rights in other matters than they accord to woman in matters of dress. I remember well that a few years ago, when skirts reached the limit in tightness, men said awful things about the styles and the women who were stylishly robed. The skirts did fit somewhat closely, but as I remember they did not fit closer than an umbrella cover fits an umbrella or than the sacking fits a canvas ham. Isn't it uncharitable, and ungallant, in man to concede a pork packer or an umbrella manufacturer greater rights and privileges than he will grant to lovely woman?

But the fashion-makers have turned the kaleidoscope of dress, the styles have been ordered changed and skirts are longer. The change will have its influence upon many industries and many professions, but whether it will injure or benefit economic conditions as a whole I venture no opinion at this time. There must be more of fabric, at an increased cost of dress material, but the

making of more cloth will put more spindles and more looms in operation and give employment to many who are now idle. The demand for cottonades and worsteds and silks will increase, yielding a better profit to growers and manufacturers, and thousands of pairs of silk hose that were useless under the short skirt regime will be worn without any one suspecting the holes and runners. Eye-strain, astigmatism and other optic troubles will cease, oculists and opticians who have enjoyed such a lucrative business will sustain heavy financial losses, but their loss will not be greater than the gain of the milliners and the waist makers and those who teach the science of astronomy.

Whatever the gains and losses that shall follow the drastic change of styles, whatever the joys or sorrows that may result from turning man's vision upward, lovely woman will still be the central figure and the crowning glory of this world of ours. Fashions will come and go, and styles will change, revealing a little more or a little less of the form divine, but ever, even as the sunflower turns to the sun, will the eyes of the world turn to her whom God gave to gladden and bless mankind. The world is truly rich in beauty and wonders, but beside lovely woman all other beauties and wonders are as the lowly foothills to the giant peaks or as the plain weeds of the garden to the stately palm. Man may see beauty in the coming of Aurora, when the sun purples and crimson the eastern horizon and throws open the everlasting gates of morning; he stands entranced when the west is streaked with ribbons of fire and the fan-shaped bars of the King of Day turn the ocean's blue to gold. When the curtains of night have been drawn and the angels pin them back with stars, man may go forth and let the astral glories minister unto his love for the beautiful and the true, for truly these silvered ornaments of the central blue do sing to us the glad song that "the hand that made us is divine." Yes, man sees beauty in the majestic mountains as their coronets of snow are kissed by the morning sun; his eyes delight to linger on the limpid waters as they rush over golden sands; the oceans and the continents, the glow of the ruby and the topaz, the constellations in the canopy of blue and the flowers of field and garden are to his soul angels of beauty and loveliness, brightening his eye and gladdening his heart, but of all earth's beauties and glories there is none to compare with the beauty of a pure, good woman, before whom man will ever bow in lavish homage. Let her dress as she will—man will look, and admire, and love.

Divorce Hurrying America to Ruin

By HON. J. E. RANDELL
U. S. Senator From Louisiana.

It is my intention to discuss what in my opinion is one of the most important problems facing the American people—the divorce evil. For many years I have given the deepest thought to this subject and have watched with a heavy heart our steadily and ominously increasing divorce rate, which today is greater than that of any other nation. We lead the world in divorces today. Japan, which for many years had this unenviable distinction, has yielded to the Christian United States of America.

In the United States divorce is spreading with alarming rapidity. It has permeated every walk of life and is prevalent among every class of people. The total number of divorces in 1867 was 9,937, or 27 per 100,000 population. Forty years later, in 1906, there were 72,062 divorces, or 86 per 100,000 population. Fifty years later, in 1916, there were 112,036 divorces, or 112 per 100,000 population. Thus in actual numbers there were more than eleven times as many divorces granted in 1916 as in 1867, or, allowing for the increased population, divorce had increased 415 per cent. To put it in another way, in 1867 there was one divorce for every 3,666 people, while in 1916 there was one for every 895 people.

If divorces multiply at the same rate in the future as in the past—and there is every indication that they will increase faster—then before the middle of this century we will have annually in the United States 275 divorces per 100,000 population, or one divorce for every five marriages. In 1887 there was one divorce for every seventeen marriages; in 1906, one for every twelve marriages; in 1916, one for every nine marriages, and at the same rate we will have in 1946 the appalling figure of one divorce for every five marriages.

England stands in bold contrast with this country. In 1910, with a population of 88,000,000, she granted only 5,763 divorces, or fifteen per 100,000, while the United States in 1916 granted 112,036 divorces, or 112 per 100,000 population. During the twenty years ending 1906 Ireland granted only nineteen divorces, or an average of less than one absolute divorce a year for her entire population of about 4,500,000 souls. These are the latest statistics available. I have recently seen statements to the effect that countries having stringent

divorce laws or laws absolutely prohibiting divorce have a greater number of illegitimate births than countries having easy divorce laws. These statements are not sustained by citation of authority or by accurate census reports and I unhesitatingly deny their correctness. Statistics on this subject are very hard to secure, but so far as I can ascertain, they not only disprove the assertion, but show that illegitimacy is greater in countries where divorce is easy. In fact, Ireland, which has practically no divorce, has the lowest illegitimacy rate among all the countries of Europe.

It cannot be gainsaid that divorce destroys the home and the home is the base and foundation of the state. Hence, we must stop divorce or ruin the state, which cannot continue to exist if its base is allowed to crumble and fall. While many excellent people are divorced and some of them make new homes, the inevitable trend of divorce is to break up many more homes than it builds up and to materially reduce the number of children.

Let us turn to the history of Rome, the greatest republic and empire of the ancient world, examine her customs, take warning from her example and try to profit by her experience. A careful and painstaking research into the history of Rome convinces the investigator that during the early times of that nation the marriage tie was considered inviolate. For 520 years there was no such thing as divorce in Rome.

The early patriarchal family occupied a prominent and powerful position in Rome. It was the bone and sinew of the nation, the temple where the husband and wife and children worshiped the household gods. Around it was cast the sacred mantle of religion and one of the essential elements of the religious marriage was its indissolubility. The family was the integral unit of the government, a state within a state, and Rome owed its primitive solidarity and strength in a great measure to the unity and perpetuity of the Roman family.

But gradually the wealth of the world was poured into the lap of Rome. Philosophical skepticism and Oriental superstitions undermined the morals of the people. Luxury and sensuality went hand-in-hand and the Romans, enervated by a life of ease, became victims of the most depraved vices. Conjugal fi-

delity became the scoff of the poet, marriage vows the target for the shafts of the satirist and womanly virtue the laughing stock of the servile courtier.

Shortly before the Christian era, after marriage had become a civil contract, things went from bad to worse. Cicero repudiates his wife, Terrentia, while Augustus forces the husband of Lydia to divorce her that he may have her himself. One woman has ten husbands, according to Martial. Another, relates Juvenal, has eight husbands in five years, while St. Jerome states that there is in Rome a woman who has married her twenty-third husband, she herself being his twenty-first wife. Ovid and Pliny and Pliny the younger had three wives, Caesar and Anthony four, Sulla and Pompey five.

The evil was national in prevalence. It existed not only among the great, but also among the lowly. It permeated every stratum of society and was widespread in every class of people. While doubtless there were many instances of the practice of the domestic virtues, the Roman life, as a whole, was rotten to its very core. From this time on to the reign of Constantine the depravity of the morals of the empire of the Caesars baffles description.

As a result of this riot of divorce and immorality, celibacy, childlessness and infanticide rivaled one another as the reigning evils. "The marriage relation," says Professor Seeley, "became so intolerably disagreeable that men shunned it as they would have shunned the plague." Not only were the Romans weakened physically and mentally, not only was the strength of their bodies and the vigor of their minds sapped by dissipation, but the corruption of the national life caused a most alarming decrease in population.

Let us take this lesson to heart and apply it to our own country and our own times. We are as rich and as powerful as Rome in her palmiest days, and the census informs us that only about 40 per cent of our people profess any religion. If luxury, divorce and irreligion caused the fall of Rome how can America hope to escape unless we profit by her example and mend our ways before it is too late?

We have seen how in Rome celibacy, childlessness and infanticide followed in the wake of divorce. The grim statements of Petronius and other Roman

writers of the empire sound strangely like the language of Dr. M. S. Iseman, who has given the subject deep study and investigation and who says in his book, "Race Suicide," referring to this unnatural crime:

"Slowly and surely the contagion has spread over the land until it has honey-combed the entire nation. The practice is just as prevalent in New Orleans as it is in Boston. It is as unblushing in Atlanta as it is in Providence; as common in Richmond as it is in St. Louis."

Let these words strike home. In Rome with the frequency of divorce and the growth of luxury came childlessness and infanticide, and on the heels of these twin evils followed the gradual extinction of the native Roman stock and the depopulation and downfall of the Roman Empire. Shall not the United States take warning from Rome's example?

The most pitiful aspect of the present divorce situation is the suffering inflicted on the thousands of innocent little children of these divorces. The figures issued by the Census Bureau show that 41,009 of the divorce cases of 1916 reported having children. If we assume an average of four children to each case we find that there were about 164,036 children whose homes were broken up during that one year without fault of their own. What can we expect of them when they grow up?

I doubt if laws would go far toward curing this disease unless we can have positive prohibition of divorce, such as prevails in South Carolina, Spain, Italy, Argentine Republic, etc., or such practical prohibition as exists in Ireland. Public sentiment in many parts of Canada is strong against divorce and it has been very hard to dissolve the marriage tie there. We must in some way create a similar sentiment against divorce in this country. It is considered too respectable now. We must frown upon it and people must look askance at those who are divorced.

The churches must all join in an earnest effort to so train their members in the love of God and home that all their predilections will be unfriendly to divorce. The effect would be marked if all ministers of the Gospel should refuse to perform the marriage ceremony when either of the contracting parties had been divorced, in which case, if the wedding must take place, it could be con-

tracted before an officer of the law, and not an officer of God.

Our country must be maintained in its pristine strength and purity to continue its great mission for humanity. Divorce is the greatest enemy of the home, which is the base and foundation of the republic, and all who wish to save the republic should unite to destroy this enemy and save the home.

A NEW BEAST OF BURDEN.

Brahma cattle, the sacred oxen of South Asia, are now being used on the Pierce ranch in Wharton and Matagorda counties, Texas, for beasts of burden.

They are said to have greater pulling power than mules and can travel with exceptional speed. Much of the hay hauling on the Pierce ranch is done by spans of mature Brahma bulls, while younger ones are used to draw backboards across the broad gulf coast prairies. Their endurance is remarkable.

This herd of pure Brahma cattle were imported from India after infinite trouble and expense. The breed is also proving popular as beef cattle.

A HAND ON YOUR SHOULDER

When a man ain't got a cent,
And he's feeling kinda blue,
And the clouds hang dark and heavy
An' won't let the sunshine through,
It's a great thing, O my brethren,
Fer a feller just to lay
His hand upon your shoulder
In a friendly sort o' way.

It makes a man feel curious,
It makes the teardrops start,
An' you sort o' feel a flutter
In the region of the heart!
As you look up in his eyes,
And don't know what to say
When his hand is on your shoulder
In a friendly sort o' way.

Oh, the world's a curious compound,
With its honey and its gall,
With its cares and bitter crosses—
But a good world after all.
An' a good God must have made it—
Leastways, that is what I say
When a hand is on my shoulder
In a friendly sort o' way.

—James Whitcomb Riley.

BRIEF TEXAS NEWS

FROM OVER
THE STATE

COL. ALVIN M. OWSLEY
Of Denton, Texas, Elected New Commander
American Legion at New Orleans,
October 20th.

Alvin M. Owsley was born in Denton, Texas, June 11, 1886. He is the son of Mr. and Mrs. Alvin C. Owsley, the former a well-known criminal lawyer in North Texas and a pioneer citizen of Denton.

Receiving his early education in Terrill School, a private institution of Denton, he entered Denton State Normal School in the first year of its existence. In September, 1904, he enrolled in Virginia Military Institute, after one year in the normal school. He was graduated from the military school with highest honors, being ranked as first captain of his graduating class. During his four-year period in Virginia Military Institute, he received every office within the power of the student body of bestow, being in his last year the president of the Y. M. C. A. and of the final students' ball.

At the beginning of the next school year, he became commandant of cadets at Rugby Military Academy in New Orleans, while studying law in Tulane University. In the fall of 1911 Mr. Owsley entered the school of law of Texas University and in the same year received his license from the State. He made the highest grade among applicants for entry to the bar in that year.

Returning to Denton, he entered the law practice with his father, the firm being Owsley & Owsley. In 1913 he was elected to the State Legislature from Denton county. After serving there one term he became County Attorney of Denton county and was holding that place when the nation entered the World War. He had received appointment in 1914 as a Lieutenant Colonel on Governor Ferguson's personal staff.

Resigning his post as County Attorney, Mr. Owsley entered the first officers' training camp at Leon Springs, Texas, April 2, 1917. In July of the same year he was commissioned a Major in the Federal service. He was assigned to the Thirty-Sixth Division Aug. 5, 1917, and later took command of the 142d Infantry.

Sailing for France on the U. S. S. George Washington, July 4, 1918, Mr. Owsley, upon his arrival, was made assistant adjutant of the Thirty-Sixth Division. He became adjutant of the division Oct. 1, 1918, and served with this branch of the overseas forces throughout the war.

He received promotion to the post of Lieutenant Colonel for distinguished service while in France. Later he represented the Thirty-Sixth Division at the Paris conference. Before returning to the United States he made a trip through England, Scotland and Ireland in military service.

When he received his honorable discharge from the army, Mr. Owsley was appointed Assistant Attorney General of Texas and held that position for one year, resigning in January, 1921, to become the head of the American Legion, with headquarters at Indianapolis, Ind. He has continued in this position since that time.

STAMMERERS TO HAVE INSTRUCTOR.

Professor O. H. Ennis of Los Angeles, Cal., instructor of stammering children, who is prominent in educational circles of the United States, has been appointed to teach a special class of stammerers in the Dallas public schools and is now in Dallas to take up his work immediately at the Bryan Street High School. No charge will be made for the instruction of the students, as the Dallas Board of Education will bear the expense of the lessons.

IMPORTANT INDUSTRIAL PROJECT

About one year ago the Colorado Valley Irrigation Project of Western Texas was started. A geological survey has been completed at a cost of \$25,000, of which \$5,000 was raised by the towns to be benefited and \$20,000 was contributed by the State Water Engineers and the U. S. Geological Survey. Rapid progress has been made and the present year may see the formation of an irrigation district, which will be a separate political entity, maintaining its own tax assessor, collector, board of supervisors, engineers and other officers.

This is to be a huge irrigation project, exceeded, it is claimed, only by two of like character, both outside this country. An immense dam is to be constructed two miles west of Bronte, in Coke county. It is to be 2,000 feet long and 100 feet high, and will back the water of the Colorado river for a distance of 24 miles. The reservoir will hold sufficient water, according to the estimates, to irrigate at least 200,000 acres of land. Indirectly it is expected to affect tributaries of the Colorado so that between 200,000 and 300,000 acres along those waterways may also be irrigated. Coke, Runnels and Concho counties will be immediately benefited, and Tom Green, Sterling, Nolan and other counties indirectly.

INEQUALITY IN STATE TAXES.

Gus Reiniger, secretary of the State Tax Assessors' Association, has submitted a mass of data to Governor Neff, showing what he termed the "gross inequality in taxation in the State," and recommending that the Governor ask the next Legislature to remedy the situation.

"Most of the counties are paying taxes far below a fair average," affirms Mr. Reiniger, "thus imposing on the other sections of the state and on the people generally. The country is paying proportionately less than the cities."

He suggests that the Legislature pass a law empowering the present State Tax Commission to enforce uniform assessments throughout the State; that is, that all counties in a given year be required to assess their property at 40 per cent of its valuation.

POISON GAS MAY ELIMINATE WEEVIL.

A new usage for poisonous gases seems to have been discovered by Brigadier General Amos A. Fries, chief of the Chemical Warfare Service of the United States War Department where continued experiments have been made since the close of the war, in efforts to find a means of controlling the boll-weevil by poisonous gas. Some tests have already been made in the laboratories and cotton fields, and while the results and best methods of using have not yet been determined, General Fries believes that the boll weevil and many other pests eventually will be exterminated in this way in the future, and that all danger to human beings and domestic animals while using gas will be eliminated through proper precaution.

WOMEN BUILDING CHURCH.

The Baptist women of Electra determined to have a new church building. They had no money, but knew they could get it. So they started to work. Dividing into five circles, one circle for each week, they started out first to buy the materials and next to provide the wages for the workmen at the end of each week, soliciting funds to be paid as called for. They have kept ahead of the outgo in fine shape, the walls of the new church are up and it is expected the roof will be in position before cold weather comes on.

NATURAL GAS IN TEXAS.

The discovery of natural gas in large quantities at many places in Texas has resulted in the laying of many mains that carry the gas to cities and to factory centers for lighting, heating, cooking and industrial purposes. A perfect network of gas mains covers the state. Natural gas in large quantity is found all along the Texas coast from Orange to Corpus Christi; it extends up the Rio Grande to Laredo and Eagle Pass; it is found in the chaparral sections of Southwest Texas and is now being piped 68 miles from McMullen county to San Antonio; it is found in North Texas, in West Texas, in the Panhandle, along the Pecos river. In fact, there seems to be hardly any place in Texas where natural gas may not be found.

WILL AID IN FLOOD CONTROL.

Promises of co-operation in the work of conservation and flood prevention in Texas, and expressions of sincere sympathy are contained in letters from every Texas member of Congress received by Homer D. Wade, assistant manager of the West Texas Chamber of Commerce. According to Mr. Wade, nothing can be done until Congress meets in December beyond interviewing members of Congress to obtain appropriations for geological and similar surveys of the watersheds of Texas in connection with the work being done by the Board of Water Engineers and the State Reclamation Department.

CHRISTIAN ENDEAVOR CONFERENCE.

The Graded Christian Endeavor Conference held at the Dallas City Temple on October 1 has been productive of splendid results. E. F. Huppertz, field secretary for the Texas Christian Endeavor Union, with headquarters in Dallas, and Harold R. Singer, field secretary for Oklahoma, worked with W. Roy Breg, the Southwestern secretary, to make a representative and forceful gathering. Leaders from the Dallas city churches who are working out this graded plan were heard, and societies were seen in action at the City Temple.

The Second Presbyterian Church of Houston has undertaken the reorganization of Graded Christian Endeavor and already has several societies organized. They are inspired by the leadership of Rev. James R. Herdie and Miss Reba Einstein.

The Broadway Presbyterian church at Fort Worth, under the leadership of the Rev. Dr. McConnell and Bryan Blacklock, have planned for a thorough reorganization.

BRINGING PECANS FROM MEXICO.

Owing to the fact that the Texas pecan crop is a short one this year, many carloads of Mexican paper shell pecans have crossed the border into Laredo from the pecan groves of Monterey, Linares, Bustamanta and Montemorelos, Mexico, and are shipped from there to San Antonio. From San Antonio they are shipped direct to St. Louis, Chicago, New York, Houston, Dallas and Fort Worth.

SURVIVOR OF WAR WITH MEXICO DIES.

Robert Kincheloe Davis, 94 years old, one of the few survivors of the United States army which fought against the Mexicans, died in Houston at the home of his daughter, Mrs. R. E. Harris, 108 Adams street.

Mr. Davis was one of the ninety-four men who, the War Department said, survived the army that went into Mexico in 1848. He also was a veteran of the Confederate army.

TEXAS CONGRESS OF MOTHERS.

The Texas Congress of Mothers and Parent-Teachers Association will meet in their fourteenth annual convention at Waco, November 20 to 23. It has about 600 units in the state and a large attendance is expected. Child welfare will be the subject about which most of the discussions will center. Hygiene, health, physical education, community recreation, home education and legislation affecting children will have consideration.

NEGRO WORKS NEW SWINDLE GAME.

A new bunco game was played in Fort Worth recently by a negro. He would sign up to pick cotton at some point in West Texas and, going to the station just before train time, would be supplied with a ticket. Claiming a sudden illness, he would rush away to a drug store and linger there until after the train departed, then cash in the ticket that had been given him and go on his way seeking some other victim to defraud in the same manner.

SOUTH PLAINS FAIR.

The South Plains Fair was held recently in Lubbock. It was the ninth annual fair and was marked by a wonderful display of Plains products. It is claimed that the plains of West Texas are especially adapted to hog raising, and the exhibit of hogs was very fine. Farm products shown included sorghums, wheat and other grains, alfalfa and various other forage crops, cotton, melons and a great variety of truck crops.

NATIONAL WOODMEN SANITARIUM.

A National Woodmen Sanitarium which is to cost upwards of one million dollars is being projected and a committee has been visiting various sections of the country looking at proposed sites. Five sites in Texas are under advisement and all are to be visited by the committee. These sites are adjacent to San Antonio, Comfort, Kerrville and San Angelo, and Amarillo in the Panhandle.

NO RESPECT FOR THE LAW.

In charging the Sixth District Court grand jury at Paris, Texas, Oct. 9, Judge Ben Denton said: "It seems like the whole country wants to violate the law and has no respect for it. The people have a don't-care attitude about what happens. Men who look like they want to see the laws enforced go out and take the law in their own hands. Good men are in these things, but I tell you they are doing wrong. They may not see it now, but they are going to see it after a while."

FARM LABOR UNION TO MARKET COTTON.

Organization of the National Cotton Sales Agency of the Farm-Labor Union of America with headquarters in Dallas at 1412½ Commerce street, was announced recently by Ed Willcoxson, sales manager for the enterprise. The organization was effected at Bonham, national headquarters of the Farm-Labor Union of America, several weeks ago by the executive committee of the organization.

The National Sales Agency will handle the business of six states, including Texas, Arkansas, Oklahoma, Alabama, Louisiana and Mississippi, Mr. Willcoxson said. W. W. Fitzwater is national president of the organization.

HOW TO USE MODEST INCOME.

Students at the Texas College of Industrial Arts are taught how to use modest incomes, according to members of the faculty, who anticipate that a majority of the girls studying there will go through life with only moderate incomes, and that it is better to have these taught properly than to assume that all will enjoy wealth and luxury and start them with false hopes. They are taught how to adapt themselves efficiently to simple home conditions and how to make happy homes. Practical experience in housekeeping is given all the girls, each learning how to be hostess, cook, housekeeper and waitress, how to entertain friends and how to get all the joys of a simple life out of a modest income.

WANTS SQUIRRELS IN CAPITOL GROUNDS.

V. O. Weed, a business man of Austin, provided one hundred squirrels for the State Capitol grounds, but they did not like the quarters or else were enticed away, for all have disappeared. Mr. Weed has asked the State Board of Control to share with him the expense of repopulating the park with squirrels and giving them protection.

EVEN THE BABIES CHEW.

Even the babies chew and they are very partial to chewing telephone receiving cords when their mothers fail to provide them, when teething, with something more sanitary. Both the telephone people and the health authorities deplore the practice, for it is destructive to telephone equipment, increases fire risk, and is harmful to baby's health.

TEXAS YOUTH WINS EIGHT MEDALS AT SHOOT.

John Quinn, 18 years old, son of Mrs. Mabel Quinn of Big Springs, Texas, won eight medals at Camp Perry, Ohio, while a member of the national champion C. M. T. C. team of the Eighth Corps area, in the national rifle tournament. At the close of the tournament Mr. Quinn left for Berkeley, Cal., where he entered the University of California.

NEW HOME FOR CHILDREN.

The State home for neglected and dependent children, which is located a few miles northwest of Waco, is nearing completion. Furnishings and equipment for the home will soon be purchased by the State Board of Control, which has charge of the institution. Superintendent McMordie says that the opening day is near at hand.

CITY EMPLOYEES ACCOMMODATED.

Beaumont is setting a fine example to other cities and has loaned nearly \$20,000 to its employees during the last three years. City Manager Roark says not one cent has been lost by this plan, and he believes in a municipality taking care of its employees as private corporations usually do. No interest was charged to the employees.

TEXANS DRINK MUCH COFFEE.

Galveston is reported in fifth place among ports of the United States in the volume of coffee received from the port of Santos, in Brazil. The number of bags brought in during the fiscal year was 194,325. These figures were obtained from a commercial bulletin of Santos. No figures have been received showing what commodities were exported from Texas for delivery at Santos.

WILL LOWER FARES FOLLOW?

Strong hopes of lower street railway fares prevail in San Antonio since the Texas supreme court set aside an injunction that restrained the city from re-routing jitney lines in accordance with the terms of a new ordinance. Lower fares were promised by the street railway management if the ordinance was enforced, and it is now up to them to keep their word.

CANNED PRODUCTS CONTEST.

The Nolan County Farm Bureau and merchants of Sweetwater held a novel contest recently to select five girls to be their guests for visits to the State Fair in Dallas. The selections were determined by a canned products contest and more than 500 cans of fruits, vegetables and meats were submitted in the trial and placed on exhibit in Sweetwater. It showed the progress being made in canning operations.

HIGH CONCRETE CHIMNEY TOWER.

The Fort Worth Power & Light Company recently completed a new chimney at its Fort Worth plant which is said to be the tallest concrete structure in the United States. It rises 328 feet above the ground surface and is fixed on a concrete foundation that extends down 30 feet to the rock level. Twenty-five hundred barrels of cement were required for the entire construction.

ON THE HEAD OF A PIN.

For work that requires nicety of touch, just consider this: An engraver in Dallas, H. J. Plath by name, has engraved the Lord's Prayer on the head of a pin one-tenth of an inch in diameter. There was a little space left after he had finished the prayer, so he added his name and the date. He engraved 282 letters so small that they could not be read by the unaided eye and he did the work in about two hours.

HOBOS USING THE HIGHWAYS.

Tourists passing along the King Trail have declared that the hobos are keeping up with the march of progress and are now using the automobile instead of the side-door "Pullmans" and the bumpers. They are rapidly abandoning the cross-ties for the public highway automobile, largely because of the friendly attitude of motorists.

They have made it a practice to relay from automobile to automobile by lying in ambush for the coming car, and then seemingly walking, coatless, in the direction taken by the car. By removing the coat they disarm suspicion on the part of the motorist who is always fearful of "hi-jackers."

NEW FREIGHT EQUIPMENT.

The need for additional freight equipment in Texas is to be supplied, in part, at least, by the Rock Island Railway, which has placed orders for new cars, etc., to cost about \$5,000,000.

ONE-MAN CARS INCREASING.

One-man cars on the street railways in Texas cities appear to be increasing in number. They run faster, but make more noise than the larger two-men cars, are more economical in operation and cause less wear and tear to the tracks.

NEW SCHOOLS PROVIDED.

San Angelo is to have a Mexican and a negro school which will cost \$15,584, exclusive of wiring, roofing and painting. The two buildings will be alike. The contract was awarded recently by the San Angelo Board of Education.

EASTERN STAR STATE MEETING.

More than five hundred members of the Eastern Star gathered in Dallas the latter part of October for the state convention. It is claimed to have been the largest Eastern Star convention ever held in Texas.

BUSINESS SLOGAN ADOPTED.

"Better Business—Better States." This is the slogan adopted for the Southwestern Business Conference held recently in Tulsa, Okla. The slogan was suggested by Earl Stovall of Forney, Texas, who was awarded a prize of \$50 for the slogan.

WEST TEXAS TAKES RIBBONS.

Eight blue ribbons were offered at the Dallas State Fair to the counties making the best agricultural exhibits, and all were captured by West Texas counties. Four-fifths of the county agricultural exhibits also came from West Texas.

NEW ROPING RECORD.

A new record, a world's record for roping, was made recently by D. S. Smith of Bastrop county, in an exhibition at the Gonzales County Fair. He roped a calf in four seconds, which was one-fifth of a second faster than made last year in a roping contest at the Nixon fair.

BAYLOR PLANS BRANCH STUDIO.

Plans for opening a branch studio of music and other arts at Temple have been made by the faculty of Baylor College at Belton. Dr. Hardy, president of the college, says the institution has thought it best to yield to the demand of the people of Temple for such a department which, it is expected, will open soon.

STUDENTS FORM RIFLE CLUB.

Students at the University of Texas have organized the Longhorn Rifle Club and propose to develop sharpshooters. They have been encouraged to this by the government, which will furnish the ammunition for practice shoots. Regular practice will be carried on at the Camp Mabry Rifle Range, just a few miles out of Austin.

RED CROSS EXAMINER NAMED.

Denton now has a Junior Examiner of Red Cross Life-Saving, Southwestern Division, American Red Cross, in the person of Taylor Cash, who was recently appointed to that position. Cash is assistant scoutmaster of Troop Two, and one of the dependable young men of that city.

HOW DID IT GET THERE?

Palestine had a surprise of a novel kind recently when a real, live alligator which measured seven feet was caught in Anderson creek, near that city. Albert Walker, who made the capture, said the creature put up quite a fight. This is believed to be the only wild alligator in Anderson county.

VETERAN OF 73 TAKES BRIDE OF 62.

Romance does not always begin and end with youth, for P. M. Ferguson of Fort Worth, age 73, and member of Lee Camp No. 158, United Confederate Veterans, and Mrs. Sallie E. Keith, age 62, also of Fort Worth, were married at the Dallas Fair, Confederate day, under the trees near the veterans' headquarters.

Mr. Ferguson was born in Georgia and has lived in Fort Worth twenty-eight years. Mrs. Ferguson is a native Texan, having been born in Hunt county.

Mr. Ferguson was a member of Glenn's Battalion, Wofford's Brigade, Johnson's army, during the Civil war. He says he took part in fourteen engagements and a number of skirmishes.

BIG NATURAL GAS FLOW.

The Laredo country is claiming to be a great gas producing area. The center of it appears to be near the Mirando field, in the northeastern part of Webb county. The wells vary in their flow from the small producers of 25,000,000 cubic feet daily to the large producers which flow between 75,000,000 and 85,000,000 cubic feet daily. There are a number of small producers, some 5,000,000 or so cubic feet daily, on the outskirts of Laredo. Most of the wells have been capped and the gas supply stored against the time when it will be needed and desired for use in industrial development.

15,000 PERSONS WITNESS PARADE

BIGGEST THROG IN HISTORY OF BELTON CROWDS TO SEE DEM- ONSTRATION OF KU KLUX

Belton, Nov. 10.—The greatest crowd ever assembled, estimated at between 15,000 and 20,000 people tonight witnessed the parade of the Ku Klux Klan through the city streets.

Unique in the demonstration was the posting of statue-like robed klansmen on the traffic blocks of the intersections of the streets traversed by the parade. These white figures held aloft banners, such as: "Married Men—Spend your affections at Home," "Purity of Womanhood," "Better Schools," "We Stand for the Protestant Religion," "Gamblers and Bootleggers—Look Out," and "100 Per cent Americans."

The parade was lead by a mounted man in the regalia of the clan, bearing an American flag. He was followed by six other robed figures on horses. A fiery cross about six feet high was carried by seven klansmen in an automobile and a second automobile followed with six klansmen in it. Then followed the marching parade, the robed men walking single file. The Telegram's representative counted 246 klansmen walking in the procession.

The parade formed at the ball park and marched through the principal streets, reaching the business section about 9 o'clock. After the parade, the crowds followed the procession to the city park where three robed speakers addressed the crowd on the tenets of the Ku Klux Klan. It was stressed that the Knights of the Ku Klux Klan "are not a military organization" and are "not taking the law in our hands but are working with the law to help enforce the law." One of the speakers declared that the Klan has "as much right to organize" as other organizations which have opposed it. The second speaker to address the crowd removed his head gear and said that he was from North Texas but did not introduce himself.

The entire demonstration was handled without any disorder and the crowds received the parade and talks

enthusiastically. It was reported that a man from the crowd attempted to dislodge one of the klansmen stationed on one of the street corners with a banner but was stopped by persons standing near him.

LODGE MAY QUIT AS SENATOR LEADER.

Washington, Nov. 10.—A thorough shakeup of the Republican organization in Congress as a result of Tuesday's election was regarded as inevitable today by Republicans of all shades of opinion in Washington.

The Republicans will organize both Senate and House despite their slim majorities, but new faces will be at the helm in the next Congress.

Senator Lodge as majority leader of the Senate is virtually certain to go. He probably will be succeeded by a younger and more vigorous Senator.

Three names were mentioned prominently today in connection with the leadership of the next Senate—Watson of Indiana, Curtis of Kansas and Wadsworth of New York. Watson and Curtis have divided much of the leadership in the last months, although Lodge has lost the title.

The house, too will offer many changes in leadership and in the chairmanship of important committees.

There is a possibility of a three-cornered fight for the leadership of the house of Representatives. The house, now vacant through the re-election of Ohio, Representative James R. Mann of Illinois and Representative Sidney Anderson of Minnesota, a leader in the farm bloc. Anderson will have the backing of many western and midwestern members.

HAS BILL TO REQUIRE POLITICAL PREFERENCE SHOWN ON POLL TAX

Austin, Texas, Nov. 11.—Representative L. J. Rountree of Brazos County was here Friday and announced that he will offer a bill in the next Legislature to amend the poll tax law so as to require voters to indicate their political preference when they pay their poll taxes and to have that preference recorded in the receipt.

Mr. Rountree expressed the opinion that such a law would tend to keep men within their own parties and to stop the heated political con-

troversies in Texas, like that recently engendered in the Senatorial Campaign.

"The receipt will show whether the man is a democrat or a republican, or what party, and he will be required to show that receipt when he votes," said Mr. Rountree. "and in that way he would not be inclined to offer a republican receipt in a democratic primary or vice versa."

Mr. Rountree said that he will be joined by Representative John E. Quaid of El Paso in offering a resolution calling a constitutional convention for Texas.

"It will not submit the matter of calling the convention to the people," explained Mr. Rountree, "but will actually provide for the holding the convention and fix the basis of representation, the date and the place the convention will meet. After it drafts a new constitution, the people will be given the opportunity to approve or reject the document. In that way only

one election will be had, that direct on the Constitution, instead of submitting to the people the question of calling a convention and another election for them to pass on the Constitution constructed by the convention."

Tentatively, Mr. Rountree thinks the convention should consist of a delegate from each of the 150 Representative Districts and one from each of the eighteen Congressional Districts. The basis of representation can be fixed by the Legislature, he

said. "Above all" declares Mr. Rountree, "I am going to stand for education of the highest type in this state. I want the University of Texas and the A and M College of this State to be institutions of first class, and all of our other educational institutions to be of the same kind."

Studebaker

At its new low price of \$1275 the Studebaker Special-Six Touring Car maintains Studebaker ideals of quality and performance, with added features that make it even a greater value than before.

It is known for its striking beauty just as it is for its thorough dependability. Luxurious comfort is assured by the nine-inch seat cushions of genuine leather and the long semi-elliptic springs, front and rear.

Power, flexibility and ease of handling are combined to make the Special-Six the most highly regarded five-passenger car on the market.

By manufacturing complete motors, transmissions, bodies, tops, castings, forgings and stampings, middlemen's profits on such items are eliminated and one profit only is included in Studebaker prices. Highest standards of workmanship are maintained and materials are the finest the market affords.

In the Special-Six Touring Car you will find such value and satisfaction as only Studebaker can offer.

The name Studebaker is your assurance of satisfaction.

NEXT SENATE HAS 52 G. O. P., 41 DEMOCRATS.

New York, Nov. 9.—Latest figures today shows that the next senate will have 52 republicans, 41 democrats and one farmer-labor representative with results of two senatorial contests—one in Washington and the other in North Dakota still undecided.

New York, Nov. 9.—Continued republican control of congress, but with a senate majority cut in two and a house majority of 160 slashed to a scant handful, appeared today as the net result of Tuesday's congressional elections with returns almost complete, not affecting the general result and delays in counting, however threatened to postpone the general result and final figures until tomorrow.

The general picture of Tuesday's storm of ballots was virtually finished early this morning when belated Montana returns sent the republicans over the top in the house contest.

Election of R. Scott Leavitt, republican in Montana gave the republicans the 218 votes necessary to control the next house, but even these republican tidings were coupled with news of defeat of Representative McCormick, republican, Montana by his democratic opponent John M. Evans.

Hated returns did not add to the fifty per cent cut in the senate republican majority sustained in the earlier tallies. They brought word, however of the definite re-election of Senator King, democrat of Utah over Ernest Bamberger, republican; of Senator Jones democrat of New Mexico and of another democratic victory in Montana where Burton K. Wheeler was elected over Carl W. Riddick, republican, to succeed Senator Meyers, democrat. Only two senatorial contests remained greatly in doubt, those in Washington, where former Representatives Dill democrat was leading Senator Poindexter, republican, and in North Dakota where the democratic candidate, J. F. T. O'Connor was with a waning majority as more rural returns came in, leading former Governor Lynn J. Frazier, republican. Non-Partisan League leaders were claiming Fraziers election.

Late returns also brought news of the defeat of another republican veteran of the house, Representative Halvor Steenerson of Minnesota, chairman of the post office committee by a Farmer-Laborite, Knud Wefald. This gave the Farmer-Labor party representation in both branches of congress for the first time. Dr. Henrik Shipstead, Farmer-Laborite, having defeated Senator Kellogg of Minnesota.

In the few remaining contests the fight was so close that talk of contests recounts and official counts was rife. Most notable, perhaps was a statement from Colonel William A. Gaston that he would demand a recount in the race against Senator Lodge of Massachusetts, republican leader, despite the latter's increased lead through correction of a tally from 1,945 to 8,425.

Senator Dupont of Delaware, republican defeated on the face of returns, by Thomas F. Bayard, democrat. refused to concede defeat and his managers said an official recount would be sought.

Senator Poindexter in Washington also was asking a re-canvass while the

house race in the remaining Kansas district the third, was so hot that it was said an official count might be necessary to tip the scales decisively.

PEDDY MAY NOT FILE ACCOUNT OF EXPENSE.

Dallas, Nov. 10.—George E. B. Haddy, defeated candidate of the Fusionists for United States Senate, many not be required to file an expense account of his campaign or his manager, Henry Lindsley making a report. Haddy probably will claim he was not a candidate legally, because his name did not appear on the ballot, it was said. There is considerable speculation in political circles here as to what amount was spent for the Paddy campaign.

STOP THAT ACHE!

Don't worry and complain about a bad back. Get rid of that pain and lameness! Use Doan's Kidney Pills. Many Cameron people have used them and know how effective they are. Ask your neighbor! Here's an Cameron case.

Mrs. S. A. Gjedde, gave the following statement June 26, 1915: "I am glad to endorse Doan's Kidney Pills for they have done me lots of good. My back ached constantly and I wasn't able to do my work. I was down in bed part of the time and suffered constantly. My head ached and I could hardly see from dizziness. Rheumatic pains darted through my back and sides. My kidneys acted too often and most of the time not freely

enough. I was caused much pain and there were other signs of kidney weakness. I was in bad condition when I read about Doan's Kidney Pills and sent to the City Drug Store for them. Two boxes of Doan's put my kidneys in good order and rid me of the pains in my back."

On July 2, 1919, Mrs. Gjedde added: "All I have previously said in recommendation of Doan's Kidney Pills, I gladly confirm. I feel I owe my good health in my advanced years to Doan's Kidney Pills."

The merchant who advertises constantly turns his stock oftener because he can offer lower prices than the non-advertiser.

**The Cameron
Herald**

HAVE DARK HAIR AND LOOK YOUNG

**Don't Stay Gray. Nobody can tell when you darken
gray, faded hair with Sage Tea and Sulphur**

Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Tea and Sulphur. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied, with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, improved by the addition of other ingredients, all ready to use, at very little cost. This simple mixture can be depended upon to restore natural

color and beauty to the hair. A well-known downtown druggist says everybody uses Wyeth's Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through the hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color, and looks glossy, soft and beautiful.

UP GOES SUGAR WHEN IT SHOULD BE GOING DOWN.

Sugar has steadily risen in price since the passage of the Fordney-McCumber profiteers' tariff act, and a new advance has been announced by the refiners. Already the retail price of sugar in certain parts of the country has gone to eight cents a pound. What the price will be in another month or two depends entirely on the disposition of the refiners and the profiteers.

Producers of beet sugar in Europe have a surplus of 800,000 tons, it is reported from Paris. There is not likely to be any shipment of American beet sugar to European countries. The Cuban crop, it is announced from Havana, is so large that grinding of the cane will begin a month earlier than usual. If the economic laws of supply and demand were unhampered by the prohibitive tariff law enacted by the Republican Congress six weeks ago, sugar would be cheaper instead of dearer at this moment.

The tariff on sugar prevents fair competition and gives the American Sugar Trust an opportunity not only to profit by the increase of 43 per cent in the sugar tariff but to grab twice that much from the pockets of the American consumers.

Women especially will understand what these higher prices of sugar mean in the expense of the household. They will be reminded daily of the Republican tax on the sweetening for little delicacies of the table. They will be convinced of the truth of the New York Herald's statement that the American people will have to pay, as a consequence of the profiteers' tariff some \$260,000,000 annually to put sugar in their teacups.

FOOD, CLOTHING, FUEL, ETC., HIGHER THAN A YEAR AGO.

Wholesale prices of food, clothing fuel and basic commodities are more than 8 per cent higher this month than they were in October, 1921, and the tendency is still upward. Notwithstanding this rise in the cost of living, there is not only no compensatory revival of business and industry, but instead there is an unmistakable continuance of the depression that has been felt in all lines during the last eighteen months.

Fuel has shown a slight decline in price, and this produced a corresponding drop in the average of wholesale prices. But coal of all kind costs more this month than in October, 1921. As a consequence of the advance in the wholesale prices of all commodities, there has begun an upward trend in retail prices.

Republican promises to decrease the cost of living have brought no more substantial results than Republican promises of prosperity. The tariff was offered as a recipe for restoring industrial and commercial health. It has succeeded only in putting common necessities farther out of the people's reach.

Dad, Mother, Ironized Yeast for Rheumatism

Do You Realize What Ironized Yeast-Vitamines Will Do for Rheumatism and Lumbago?

Do you know that vitamins and iron are part of your very life? Do you know that the tissue-and-blood factory in your body needs these two materials, and needs them badly? Do you know that if your body furnace does not get enough of these, that

"Whoopie! Rheumatism Pains and Agony All Gone. Ironized Yeast Is Surely Wonderful!"

queer poisons, joint poisons, muscle poisons, acid poisons are formed instead of the healthy flesh and the rich blood you used to have in days gone by? If you hobble in your gait, if pains distort your body, if bending over is an unspeakable agony, if dull aches make you grumble at the roughness of the day, smile sweetly, there is a rainbow ahead. Things are different now than they used to be, in the days of liniments, salves, complicated drugs, and all that—remember? The happy secret today is ironized yeast, one of the greatest body-and-blood builders of all time. Begin taking Ironized Yeast today. Beware of imitations and substitutes, because Ironized Yeast is not a mere combination of yeast and iron, but is yeast ironized, which is a substance all by itself. There is only one Ironized Yeast in all the world. Sold at all drug stores at \$1.00 a package and containing 60 tablets, each tablet sealed. They never lose their power. Mfg. only by Ironized Yeast Co., Atlanta, Ga. Say goodbye to rheumatism from now on!

For Sale by JACKSON & READ PHARMACY, Cameron, Texas.

COMMERCIAL CLUB.

Directors meeting of the Cameron Commercial Club Friday night, Nov. 3rd:

Roll call showed the following present:

Officers—C. W. Lawrence, president; R. H. McIntosh, vice president; W. B. Skelton, secretary.

Directors—J. T. Parma, Robt. McLane, W. G. Gillis, W. M. Cobb, C. R. Phillips, Geo. T. Graves.

Committee Chairmen—Edwin York Minutes of previous meeting were read and upon motion adopted.

A report was read from the Collector of the club, Miss Mary McCown, on collections for October and delinquent members for that month. It was a splendid report, there being only five delinquent for the month. On motion from R. H. McIntosh, seconded by W. G. Gillis Miss McCown was highly commended for her good work.

The Finance Committee reported that no canvas had as yet been made of the town in an effort to secure the balance of the Refinery site money but some work would be done next week.

The committee appointed to raise funds to put the band on its feet financially until the first of January reported good progress and were granted further time to complete this work.

The President called attention to that part of the Constitution and By-Laws which provides for the dropping from the Board of Directors the names of all members thereof who are absent from three successive meetings without excuse and urged all officers, directors and committee chairmen especially to attend the meetings more regularly.

No Worms in a Healthy Child

All children troubled with Worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS CHILL TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a General Strengthening Tonic to the whole system. Nature will then throw off or dispel the worms, and the child will be in perfect health.

To Cure a Cold in One Day

Take LAXATIVE BROMO QUININE (Tablets) for the Cough and Headache and work out the cold. E. W. GROVE'S signature on each box.

ELECTION NOTICE

State of Texas. County of Milam. The petition of G.

C. Black and others for a stock law election having been presented to the Honorable Commissioners Court of Milam County, Texas, on October 11, 1922, the same being a regular term of said court, the court having ascertained that said petition contained the requisite number of freehold voters ordered an election to be held at Hanover and Marlow on Monday November 27th, 1922 for the purpose of determining whether horses, mules, jacks, jennets and cattle shall be permitted to run at large in the following described territory, in Milam County, to-wit:

Beginning at the S. bank of Little River in Milam County, Texas, at the Faubion bridge across said river on the Gause and Branchville public road, thence down Little River with its meanders to the N. W. corner of Wash Davis 27 acre tract on the S. bank of said River, same being the N. W. corner of the Pedro Lopez Grant; thence Westward with the line of said Pedro Lopez Grant to its S. W. Corner on the N. line of the Francisco Ruiz TwoLeague Grant; Thence S. 60 W. with said N. line of the Ruiz Grant to the N. E. corner of the T. S. "THE FRAUD OF MEN"

By WILLIAM ALLEN WHITE

Copyright, 1922, by the Macmillan Co.

IT WAS in the reception room of a club house in an inland city, where the two young men had met by chance that evening. There was a stuffy profusion of leather furniture in the room that gave it a heavy cast. Men were talking in knots of two or three, apparently on business, and when an outsider entered a group, conversation was distinctly and painfully suspended, or lagged in cold formalities until he had drifted away. The men there were clearly business men, and were there by business appointment, and the element of sociability was manifested only in the click of the billiard balls that echoed in from some invisible rear room, where the younger men, too tired to go to the theater, or to the evening gathering with their wives or sweethearts, were walking uncounted miles after the ivory balls.

It was a brisk autumn evening, and the clock on the mantel was striking eight when two young men pulled their fat chairs to the window, where they could see the theater-goers hurrying by under the arc light, and where they might not be interrupted.

"Well, old man, what d'you think of the East," asked the shorter of the two, a very stubby little man with a red face, red lips and a bristling, close-cropped mustache. His companion was a tall man with skinny features, square shoulders, a head poised too far back at times, but capable of bending, and he had a habit of picking at his mustache.

"Oh, d—n the East," said the tall young man. "Jim, I'll tell you what's a God's truth, they are the worst lot of jays back there—absolutely the worst that grow on earth. They don't know any more about this country, and what's in it, than a satrap of Persia. When I told them about our scheme, showed them the map of all this land that is to be foreclosed, and how the whole thing can be watered by a central ditch, and all—you remember how it is out there—one old rooster who hasn't been out of his barnyard in all his life, he up and said: 'Yes, all very good, very good. Indeed, but supposing there is an Indian outbreak—then where's all our money for your improvements gone?' Say, Jim, I just fell right over dead. I met old man Wilson there—say, hold on here, what's this I hear? There goes Martin and his kids, taking them to All Baba; see what you're coming to. So you finally got your nerve with you, did you? Go-o-o!"

With this outburst the bubbles of the promoter's enthusiasm subsided. His companion reddened slightly at the raillery and put one side of his under lip over his stubby mustache in an embarrassed silence that ended in a smirk.

"Well, Harris," he responded addressing the taller friend, "you've guessed it the first time, I suppose. But we must all settle down sooner or later, and anyway a man don't find that kind of a girl every day in the year." He paused a moment and Harris broke in:

"Oh, yes, if it comes to that, I suppose he must. I ain't a-kicking any, am I? Now, Jimmy, that's a good boy, come and tell ownest own all about—" He was interrupted in his mock coddling by one of the drifters—who had been knocked from half a dozen groups, and had floated around in front of the formidable chairs. He was a pretty old man, who had been a country banker in his day, and had come up and put new life into a wobbling institution after a local panic. He cut in with: "Well, what are you kids gassing about? Hello, there, Harris, did you make your irrigation scheme go?"

Harris looked up with annoyance written unmistakably on his face as he said, hardly civilly, "Yep," and lapsed into silence.

There was a pause, in which Jim addressed a remark to Harris about the big crowd that was going to the theater. A street car had just unloaded at the corner. The Kansas man took the remark as general, and replied:

"Say, ain't they though; been that way, too, every night this week."

"Lookie quick!" exclaimed Harris to his companion. "No—this side—there goes Cameron; who's that with her? Got a new 'mash'?"

"Why, you don't mean to say that you haven't heard," replied Jim, as he shifted his position in his chair. "She's going to get married, too. All the old birds going home to nest."

"Why, do you boys know Mrs. Cameron?" asked the banker with some surprise. "I didn't know she was in your set."

"Ho! Ho! And so you know the widow, too? L. No. 384 of the Cameron series, eh, Jimmy?" said Harris.

The woman, holding to a rather slender young fellow, perhaps thirty-five years old, dark and serious, who was watchfully bending over her, to catch her chatter, passed the club window, and disappeared in the cover of darkness that surrounded the arc light. She was a woman who, even on close inspection, showed little age, though instinct would have told a man—where a dozen other things would have told a woman—that she was thirty-three or thirty-four years old. As she scurried under the light, she seemed to cling to the man's figure,

and tripped, rather than walked along. One would have said that she was very happy as she passed.

"Me? Oh, yes, I knew Mrs. Cameron when she was a little girl," said the elder man. "She came from my town—down in Baxter. Say, how is she making it here? I haven't seen her for going on two years now—two years next December, I think," mused the banker. The two young fellows looked quizzically at the old man, and then at each other. Then Harris shook his head and the short, fat, little man nodded back. They were satisfied that the old man was telling the truth.

"Well," began Jimmy, "she wasn't cut out for a vagabond, and she hasn't been making it very well, I guess."

"What's the matter?" said the old man, who did not grasp the young fellow's meaning.

"Well, Mr. Martin, if you care to know, it's nothing more unusual than wolves," replied Harris, as he swung his feet over the arm of the chair; "just plain, old-fashioned wolves. But I'm mighty glad she is going to break for shelter. I'm mighty glad for her." Harris added in broken sentences. "Who's the fellow, Jimmy?" he asked a moment later.

"Byers," put in Jimmy, in answer to Harris' question, as Martin rubbed his chin, and pulled up a chair to sit down and get the idea firmly fixed in his mind.

"Going to get married!" continued the old banker, thinking aloud. "Well, if that don't beat all! Well, boys, I've known her since she was a little slip of a girl—couldn't a been more'n ten years old—when they moved to Baxter. I see her graduate at the high school—handed her the diploma, as president of the board, myself. And she's going to get married again. Well, that gets me. I went to her wedding with old Cameron. She was the oldest of seven children, four of 'em girls, and Mrs. Griggs was mighty glad to get Mattie off her hands, though she wasn't more'n eighteen when she was married; but every one thought she done so well, getting old Cameron, and his fine house that he'd built her—and all. But I'd a thought she'd a got enough of marrying when she got done with old Cameron. If ever a woman lived ten years in h—l, that woman did. And such a nice little woman, too. Seemed like she tried ever so hard to make it pleasant; done all her own work, flaxed around and fixed up the house, putting little odds and ends here and there, keep-

was the first time he had ever done anything of the kind, and when she was getting supper for him, she told my wife, he set the table with the new things, and put the trinkets at her place, and the saccue in her chair, and then called her to see it. She come in and shook her head, and turned to the kitchen door without a word. And she told my wife if she'd 'a' tried to said a word, she would 'a' burst out crying."

"It was hard for her, but she did what was for the best, I guess. 'Twouldn't 'a' been six months before old man Cameron would 'a' been up to his old tricks again. She knew that then, just as well as I know it now. But he was so big and strong, and I suppose he was tender, too, when he felt like it. But that was a mighty brave thing to do, and I shouldn't wonder if she cried that night for the first time in years—he'd hardened her that way, you know, for so long before."

There was no one with a voice to speak, when the old man paused, so he sighed and continued: "And now she's going to get married, eh? Who's the fellow?"

Morrison was the first to speak. "A man named Byers, of Denver," he said. "Did you know her after she came down here, Mr. Martin?"

"Only a little; she was trying to learn to be a trained nurse or something; used to see her at the theater, with young fellows from the club. She came back to Baxter, now and then. Wife saw her there, and said she appeared to be cheerful. And the old ladies were ticked to death to see her. Made up a tea-party for her, about six months ago, when my wife and she happened to be back together at the same time, and my wife said they, every one of them old people—made over her like she was their own child, and she did seem to be so happy. What about the wolves, Harris? Tell me," said the elder man as he lighted a cigar and looked grimly at the charred match before throwing it away.

"There isn't much to tell, I guess. If every man would only tell what he knows, himself, there would be blame little. But as every other man tells what he thinks a lot of other fellows know—it's the old story, and a good deal too long. The chief trouble with wolves, you know, is their noise."

"It occurs to me, Harris," said young Jimmy Morrison with a knowing look sideways, "that you are getting mighty high-minded all of a sudden. I say it's a shame about young

"I See Her Graduate at the High School—Handed Her the Diploma, as President of the Board."

ing up with the Chautauquy, and having the young folks around her, and being just the world and all to them babies of her'n. Hardly anyone knowed they was anything wrong, until she filed her suit. And we didn't know it, ourselves, living right there, until two years before, when old Cameron come home and chased her out of the house, one cold winter night, and she had to come over to our house or freeze. Many and many's the time she's stayed out all night of summers, when he'd come home full and ugly, rather than let the neighbor's know. Well, I must tell mother she's a-going to get married again."

"Old Man Cameron, he warn't so mean with men, that way. Take him in the bank, and though he was in the opposition concern, I can say that I never heard a man say an unkind thing of him, and that's a good deal for a banker. My wife says Mrs. Cameron told her that there was times when he would be awful sorry, and promise to do better, and be as rational as you or me. But he got them jealous spells and was a regular devil, she said. Used to beat her, I guess, though she never said so. One time—so she told my wife—after one of his tantrums—that was pretty near the end—he had went down to Cincinnati, and while he was gone, she made up her mind to leave him. When he came home, he wanted to be sugar and spice, and he seemed so penitent. She hadn't been more than civil to him, for a year before, and the bad streak he took made her see things couldn't go on that way. Well, sir, when he was down to Cincinnati he turned in and bought her a sealskin saccue, and a new set of solid silver knives and forks and spoons, and any amount of little trinkets to wear. It

Byers, of Denver. He seems to be a pretty decent fellow."

"Has a little money, hasn't he?" chipped in Harris.

"Sheep-buyer for a packing house, I believe. We had some dealing with him," said the banker, as he puffed, and put his hands back of his head as a pillow for a moment.

"Something like that," said Jimmy. "Anyway, he looks like an honest fellow. Somebody ought to tell him about Cameron. It's tough to see him going into this thing—like an ox to the slaughter."

"Oh, you do, do you? Well, Jimmy Morrison, maybe you would like to have the same man, who tells what he has heard of this woman, tell the same thing to the future Mrs. Morrison, a few weeks before the cards are out."

"Do you boys know you are talking of a human being? This business that is so funny to you, it is all of that woman's life! It's your farce, maybe; but, great God, it's her—her tragedy!"

After an abashed silence, Marth walked slowly away from the two friends. Each one thought, for an instant, of a face that he remembered, lighted up by the warm glow of the grate fire. Each knew the story as the old man had told it. Each thought of the way he had heard it. It was fully a minute after the old man walked away with his hands behind him, when Harris spoke:

"Funny thing, this life, ain't it?" he said.

"Yes, damned funny—the more you know of it," said Morrison as he arose. "Isn't it getting about 'that time'? Whose turn is it to buy the old Falernian?"

JOIN THE RED CROSS

The Greatest Mother!

She Binds Up the Wounds of the World

If a man were hit by a car in front of your home, would you be able to give first aid?

If one of your children should swallow poison, could you give emergency treatment that would save his life?

If an epidemic should strike your community, do you know the preventive measure to help keep your family well?

In order to prevent the thousands of needless deaths through accident and preventable sickness, your Red Cross is teaching first aid to families throughout this broad land.

Already over one million people have received the First Aid Instructive Courses from the Red Cross.

Is this work important? You will agree that it is when you consider that there are annually in the United States over 400,000 deaths from PREVENTABLE diseases and accidents—eight times the battle deaths of the American Army in the World War.

The Red Cross must increase its membership—not grow less. The work must go on. Join the Red Cross or renew your membership during the

RED CROSS ROLL CALL

Sixth

NOVEMBER 11 to 25 1922

MONEY SHORTAGE MAY HAMPER MILAM SCHOOLS

LIMITED FINANCE CAUSE OF CONCERN FOR RURAL SCHOOLS.

Austin, Texas, Nov. 6.—"Milam county schools will be hurt if Texas adopts the idea that the state should not give more to the schools of a county than the county gives to the state," said Peyton Irving, Jr., managing editor of the Texas School Journal in a communication to the Governor, discussing a report of Gus Reininger of the State Tax Assessors' Association recently filed with Governor Neff asking a revision of state tax laws.

"We long ago abandoned the idea that the rich man should provide only for his child's education and the poor man must bear all the cost of his child's teaching. I am sure Mr. Reininger does not now approve the state giving more support to schools in rich than those in poor counties. Yet he leaves the inescapable inference that Milam, Red River, Hopkins and other counties, with more children than money, ought to receive less to support their schools than other counties with an equal number of children and more money.

"This is no defense of unequal assessment. The point is that children in Milam county should not be penalized for such an inequality. If any one is committing a wrong it is not the children; certainly then their schools should not be shortened regardless of who may be guilty of error or worse. Mr. Reininger's figures befog the question. He cites values of farm buildings as evidence of financial ability to support schools. Yet Johnson county's values in this line are about equal those of Milam,

though the latter has 4,000 more children in its common schools than Johnson. What should be received from the state should be determined by the number of children to be taught rather than the wealth of the county in which they live.

"Our tax scheme ought to be revised. But in the heat of the combat interests not now contributing their share to support the schools must not be permitted to continue escaping their duty. And then the people back of legislature must hold their representatives to a recognition of the principle that it is the state's duty to educate, primarily, and in a minor degree that of the community. That duty must be performed regardless of the wealth of poverty of the community in which a child may live, before we can be proud of Texas."

DEMOCRAT WINS TO LEAD FIGHT

Big Rapids, Mich. Nov. 9.—Senator elect Woodbridge N. Ferris, democrat announced today his intention to work in the United States Senate for the unseating of Senator Truman H. Newberry of Michigan.

"It would be premature to state my plans at this time, and details are not yet completed, but my first official act upon taking office will be to begin steps for rehearing of Mr. Newberry's case, Mr. Ferris said."

"I feel it my duty to the people of Michigan to straighten this matter."

FORMER BELL CO. GIRL IS ELECTED

Belton, Nov. 9.—Mrs. Bird Estes Hobby, a former Belton girl, was elected county recorder of El Centro county California, according to a message received here by Mrs. Y. P. Yarbrough a relative. Mrs. Hobby was running on the democratic ticket and was elected by an overwhelming majority.

Mrs. Hobby has been a resident of El Centro for several years and moved to that city from here.

THOUSANDS WATCH BELL COUNTY INITIATION

Temple, Texas, Nov. 9.—More than 1,000 automobiles lined the Belton-Temple road in 90 degree parking along both sides of the road in front of the Sam Catlar pasture, and it was estimated that at least 4,000 people were present to witness an open air initiation ceremony of the Ku Klux Klan last night.

Three hundred robed nights formed a hollow square, the north end facing the crowd being left open so that the spectators could view the ceremonies from a distance. Led by several robed figures, 23 rows of men in street clothes, four abreast, the candidates marched around the square beneath a smaller fiery cross of red.

ADAMS OFFERS EXPLANATION OF G. O. P. LOSSES.

Washington, Nov. 9.—Retention of republican majorities in both senate and house was declared to be "very gratifying" to republican leaders in a statement issued today by John T. Adams, chairman of the republican national committee reciting some of the causes which he considered responsible for the outcome of Tuesday's election.

The spirit of unrest following after the world war, an unusual prominence of local issues over national issues to befog the general situation, and the natural tendency of a large class of people to vote for a change in office years were credited by the party chairman with responsibility for the paring down of the republican majorities of two years ago.

RENEW FIGHT ON NEWBERRY

Detroit, Mich., Nov. 9.—The democratic successes in Michigan in Tuesday's election appeared even more pronounced today when belated returns showed that in addition to electing a senator, a member of the house of representatives and five members of the legislature, the party had gained ground in numerous counties of the state. In several instances the majori-

ty of the county offices went to the democrats for the first time in history.

The big fight, however was centered in the senatorial contest and the victory by 1,000 votes of Woodbridge N. Ferris, former governor over Senator Charles E. Townsend, was looked upon by democratic leaders as the outstanding result.

Throughout the campaign Mr. Ferris brought the Newberry matter to the fore, declaring it was the "big issue in Michigan" and that by his

election Michigan voters would "perge themselves of Newberryism."

Whether the senator-elect planned to raise the issue in Washington was not definitely known today. He had been quoted as saying that if elected he might reopen the Newberry case in the senate.

If Kidneys and Bladder Bother

Take Salts to flush Kidneys and neutralize irritating acids.

Kidney and bladder irritations often result from uric acid, says a noted authority. The kidneys filter this acid from the blood and pass it on to the bladder, where it may remain to irritate and inflame, causing a burning, scalding sensation, or setting up an irritation at the neck of the bladder, obliging you to seek relief two or three times during the night. The sufferer is in constant dread; the water passes sometimes with a scalding sensation and is very profuse; again, there is difficulty in voiding it.

Bladder weakness most folks call it, because they can't control urination. While it is extremely annoying and sometimes very painful, this is often one of the most simple ailments to overcome. Get about four ounces of Jad Salts from your pharmacist and take a tablespoonful in a glass of water before breakfast; continue this for two or three days. This will help neutralize the acids in the urine so it no longer is a source of irritation to the bladder and urinary organs, which then act normal again.

Jad Salts is inexpensive, harmless, and is made from the acid of grapes and lemon juice, combined with lithia, and is used by thousands of folks who are subject to urinary disorders caused by uric acid irritation. Jad Salts is splendid for kidneys and causes no bad effects whatever.

Here you have a pleasant, effervescent lithia water drink, which often quickly relieves bladder irritation.

Your Business And Ours

There is a saying that "a good customer won't change his shop, nor a good shop lose its customer."

We run this Bank in the same way you conduct your business—to keep old patrons and gain new ones.

Only by good service is this possible. We invite you to test our facilities.

Citizens National Bank

"The Largest Bank In Milam County"

You Wouldn't Pay \$800 to \$1000 For Such Things

Yet That is Exactly What You May Do,
if You Don't Know the Facts.

Everything that goes into or on a motor car costs money. The buyer must pay for it.

So when you consider the two types of closed cars that sell under \$2000 think of what you are buying.

If you use a closed car to impress by its luxury appearance, then get the most you can for your money in the way of dome lights, vanity cases, clocks and such fittings.

But if you have first regard for car performance, look to the chassis. All reliability and low cost of operation begins there.

What Hudson Gives.

The Hudson Coach is mounted on the famous Super-Six chassis. More than 120,000 owners know its reliability. And now with the new improved Super-Six motor, there is found a smoothness and motoring charm that thrills.

The \$1625 you pay for the Hudson Coach goes for qualities that are essential to genuine utility. Closed bodies mounted on cars comparable to the Super-Six in performance and enduring reliability cost \$800 to \$1000 more than the Hudson Coach.

Confirm this by comparing open car prices.

The difference between open and closed car prices, for the most part, represents what you pay for fancy body fittings.

The Coach Endures.

The Hudson Coach provides every closed car comfort. It is sturdy, long lasting, and good to look at. You will be proud of it.

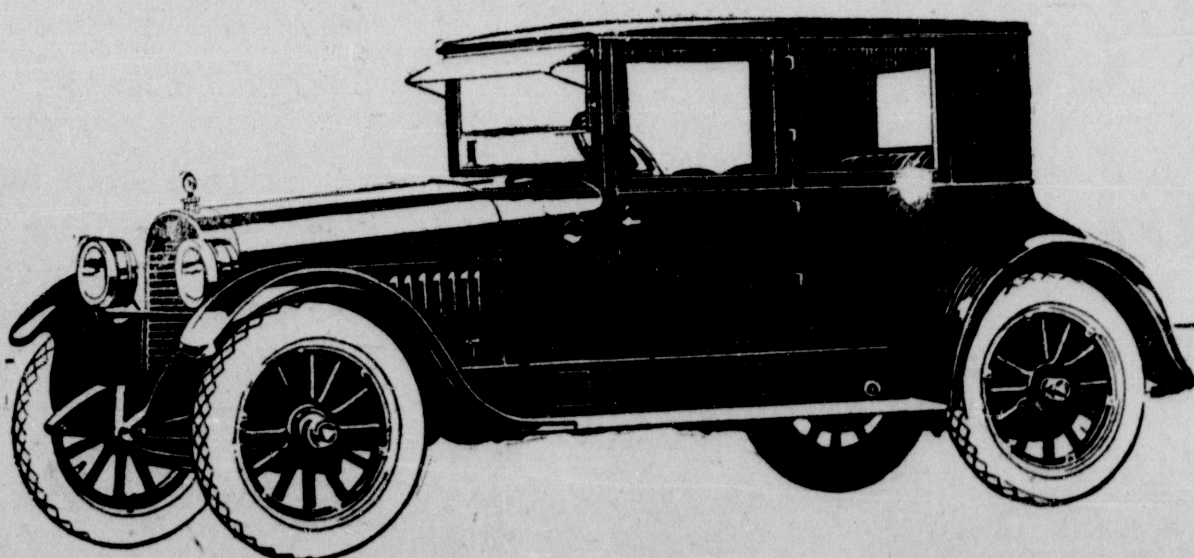

But your great gratification will come from the performance of the car. In the Super-Six no one ever need give way when real motor performance is concerned.

A Wish

"I HAVE TAKEN Cardui for run-down, worn-out condition, nervousness and sleeplessness, and I was weak too," says Mrs. Silvie Estes, of Jennings, Okla. "Cardui did me just lots of good—so much that I gave it to my daughter. She complained of a soreness in her sides and back. She took three bottles of Cardui and her condition was much better.

"We have lived here, near Jennings, for 26 years, and now we have our own home in town. I have had to work pretty hard, as this country wasn't built up, and it made it hard on us.

"I WISH I could tell weak women of Cardui—the medicine that helped give me the strength to go on and do my work." This card fulfils her wish.

CARDUI
The Woman's Tonic

VETERAN OF WORLD WAR IS ACCIDENTALLY KILLED

Belton, Nov. 9.—Samuel Clinton Humphrey, well known in this city, was instantly killed at the home of his brother-in-law, G. F. Pierce, four miles west of this city, this morning at 10:30 o'clock, when the entire load of shot from a 12-gauge shotgun penetrated his left side near the heart.

Humphrey, who was 30 years old, had been hunting and had stopped by the Pier's home. Mr. Pierce was making a doubletree and indications point that the dead man, in placing the gun to the ground, struck the hammer against the doubletree of a mowder, which caused the discharge. He died instantly.

The deceased was a veteran of the World war, having enlisted in this city, Sept. 19, 1917. He sailed for France July 6, 1918, and returned to this country June 7, 1919. He was attached to the 315th ammunition train, 165th Field Artillery brigade of the 90th Division. For some time he was a member of the police force in the city.

A funeral service will be held at 2 o'clock Friday afternoon, with interment in the North Belton cemetery. Services will be conducted by Rev. J. C. Byars at the grave.

He is survived by his father, S. F. Humphrey; his mother, one brother, Paul, of this city, and four sisters. They are Mrs. Lula Lamar, Mrs. Bulah Pierce, Mrs. Donie Burk and Miss Lera Humphrey.

H. W. VAUGHAN FOUND DEAD.

Honolulu, Nov. 10.—Horace Worth Vaughn, judge of the First District of Hawaii, and former member of Congress from Texas, was found dead in his home here Friday with a bullet wound in his neck and a revolver by his side. He had been ill six weeks with a nervous break down.

Judge Vaughn was born in Marion County, Texas in 1867.

Lived in Texarkanna.

Texarkanna, Nov. 10.—Judge Worth Vaughn whose dead body was found today in his home in Honolulu, a pistol wound through the neck and a revolver by his side, was a resident of this city for 28 years, coming here born in Marion County. After his death in 1886 from Cass County. He was feat for re-election to Congress by Eugene Black in 1914, he went to Honolulu, where during the first year of residence he was assistant district attorney, then receiving the appointment as Federal Judge of the Hawaiian district, which position he held for the full term of six years. During his residence here, Judge Vaughn played a prominent part in the political life of Texarkanna and Bowie County. He held the offices, at various times, of city attorney, County attorney, district attorney, State Senator and Congressman. He is survived by his widow and two daughters, Jean of Honolulu, and Mrs. W. E. Enler of Haworth, N. J.; three brothers Homer of Houston, and Houston of this city and H. D. of Fullerton, La., and by two sisters, Minta and Mrs. W. C. Brown of El Paso. Relatives of the deceased in the city received their first news of Judge Vaughn's death from the Associated Press.

JROVE'S TASTELESS CHILL TONIC

Secures vitality and energy by purifying and enriching the blood. You can soon feel its strength. Quins, indigestion, etc. Price 15c.

It is a powerful and scientific combination of sulphur and other healing agents for the relief and cure of diseases of the skin. It is especially effective in the ITCHING VARIETIES; giving instant relief from the itching and smarting sensations and by its germ-destroying properties it exterminates the microbe which is the cause of the eruption, thus curing the disease completely. Little's Liquid Sulphur Compound is used in all cases of Eczema, Tetter, Barber's Itch, Psoriasis, Herpes, Rash, Oak and Ivy Poisoning, also for relieving the annoyance caused by chiggers and mosquito bites. In the treatment of ECZEMA—the most painful and obstinate of all skin diseases—it is one of the most successful remedies known. Small size 50 cents bottle. Large size \$1.00. JAMES F. BALLARD, Prop. St. Louis, Mo.

JUAN CARRASCO KILLED.

City of Mexico, Nov. 9.—The regent-general, Juan Carrasco, was killed at 6 o'clock this morning at Huamachilto, in the State of Durango. Eight other rebels were killed in the same battle in which Federal troops were victorious under Gen. Juan Torres.

The Federals also took six prisoners. Two Federal soldiers were wounded.

President Obregon tonight declared that the killing of Gen. Carrasco, who was known as the "terror of Sinaloa" means that there will be no further troubles with the rebels in the Pacific Coast States.

A DESIRABLE CHRISTMAS GIFT.

Young folks, here is a Christmas present for you if you will put the matter squarely up to your parents in the right way. In fact, they can't turn you down, for it is the best proposition you ever put up to them; it is the thing that will win your independence, give you an insurance policy against poverty with a paid up premium for life. It is a scholarship in the Tyler Commercial College of Tyler, Texas, America's largest school of Bookkeeping, Business administration, Shorthand, Cotton Clashing, Telegraphy, Penmanship, Business Training and Finance and Radio;—the school that not only prepares its students most efficiently for the best positions in the largest business offices, but secures those position for them.

The cost of a life scholarship in a course of Bookkeeping is \$65.00, shorthand, \$65.00, or the two \$110.00. Telegraphy \$65.00, Cotton Clashing \$65.00. Penmanship \$65.00, Business Administration and Finance \$65.00. Radio \$45.00. Board and Room is from \$17.50 to \$25.00 per month. The average time for completing the Shorthand Course is three and one-half months, our telegraphy five months. Figure cost of room and board and tuition and you will be surprised to find how little it will cost you to obtain a cash production education that you will use throughout life. It is a Christmas present that you will always appreciate.

because you will never cease using it. It is something of every day need. It makes you a useful citizen.

If you are your parents, haven't the cash to pay for the course, write us about our loan fund or note plan; the old saying "Where there's a will there is a way" is quite true. If you can't get money to pay board, do what thousands of other are doing; take a correspondence course until you can enter for personal work.

Talk about the Christmas gift. Dis-

cuss it seriously. Convince your parent you are determined to be a success, and that to achieve a success in business you must get a business training. Mail coupon for our large catalogue. It is free and it will convince you and your parents of the importance of our suggestions.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over thirty years, has borne the signature of *Chas. H. Fletcher* on the wrapper all these years just to protect the coming generations. Do not be deceived. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

Never attempt to relieve your baby with a remedy that you would use for yourself.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

THINKS TRUCKS WILL SOLVE SHORT HAUL TROUBLES.

The chief impediments to progress have been at least partially removed prospects for general business expansion in the South are good. Settlement of the labor controversies on the railroads, in the cotton mills and the coal fields, putting a million men back to work, higher wages in some industries and excellent harvests have given the people an increased purchasing power. This is the opinion advanced by Frank H. Gibbs, president of the Gibbs Machinery Company of Columbia, South America.

"This will make particularly heavy demands on local transportation facilities," Gibbs further pointed out. "Shippers in the South should, therefore, exercise the utmost care in the selection of their hauling units to be sure that they are able to dispatch their goods with promptness and economy."

"I venture to say that in the majority of cases it will be found that the motor truck is the most valuable unit available for short haul distribution. The fact that 1,000,000 of them are in use today is proof."

"One particular large shipper that I know of stated that the reasons for this pronounced preference for the truck were that large loads could be carried by trucks; the combined loading and unloading time per unit was far less than for the number of horse-drawn vehicles required to handle the same load; and, less running time was necessary to handle the same amount of material."

"The American Railway Express, probably the largest user of local transportation units in this country, has found that increased economy, larger volume of business and greater satisfaction result from truck usage and that the truck is not affected by weather or road conditions."

"I am told that the Postoffice Department at Washington after seven years' experience with motor vehicles has come to the conclusion that they have many advantages over horse-drawn equipment, even where the distance to be traveled is short. In one city alone \$30,000 was saved by the motorization of a portion of the letter-box collections and parcel post delivery services."

OCTOBER CAR OUTPUT GAINS 20 PER CENT.

Production of motor vehicles running 20 percent above September was reported to the directors' meeting of the National Automobile Chamber of Commerce in New York last week. The total output for the entire industry for October, based on statement of shipments, is estimated at 244,400 cars and trucks. The best previous October record was 200,000 in 1919.

Increased availability of coal, which was relatively scarce in September largely accounts for the unusual October increase. The production of the latter month met a number of filled orders, as well as supplying October sales, which were about 25 per cent under September in most sections of the country. The fall months, though seasonally less than the summer, are expected to register the best autumn trade on record.

Six States—Massachusetts, Ohio, Maine, Colorado, New York and South Dakota—report improvement in the movement of used cars. Shortage in freight transportation is maintaining the truck market at the September level, with Massachusetts, Pennsylvania and Ohio showing increases.

16 PER CENT OF CARS IN USE NOW CLOSED.

Comparing the number of closed cars in operation at present with those running in 1916, brings to light the fact that there are now 1,536,000 closed cars on the roads, or 16 per cent of the total car registration of the country.

In 1916 the percentage of closed to open models was only 1 per cent. Of the closed models at present in use, over half are light cars. In 1918 only 71,000 closed cars were turned out; in 1919, 197,000 or 10 per cent of the total registration. Two years later, 1921, production of closed models had risen to 335,000, or 20 per cent of all the cars built in that year. It is believed that the output this year will approximate 635,000.

Today there is a gradually mounting demand for tires in the winter season, according to tire men. Contrary to the practice of a few years ago, when machines were stored for the winter, people now require them the year around.

CONGRESS CALLED IN EXTRA SESSION NOV. 20.

Washington, Nov. 9.—Congress was called by President Harding to-night to meet in extra session Nov. 20, exactly two weeks in advance of the regular session.

The call set forth as is usual in the

form of a proclamation, declared the extra session was made necessary by public interest.

The call of the special session two weeks in advance of the regular meeting has been approved generally by republican leaders in congress, who have felt that by getting an earlier start on legislation that would be afforded by the regular session, practically all important bills, including appropriation measures could be disposed of by next March, when the 67th congress must adjourn sine die.

Although the nature of the president's recommendations to be presented at the extra session when it convenes Nov. 20, has not been definitely outlined, the opinion of republican leaders has been that the house will proceed immediately to consideration of the merchant marine bill.

The senate has several important measures left over from last session, including the Dyer anti-lynching bill, which has been passed by the house, and it is probable that President Harding will make some definite recommendations at the outset of the session as to changes in the transportation act.

NEW TARIFF BRINGS HUGE IMPORT TAXES.

Washington, Nov. 10.—A Federal revenue of approximately \$445,000,000 this fiscal year from import taxes, or about \$100,000,000 more than ever before in the Nation's history, was forecast by customs officials. This is on the basis of returns under the new tariff act for a month as a half of its operation and the almost unprecedented income which immediately

preceded the enactment of the Fordney-McCumber statute, when there were heavy withdrawals from bonded warehouses and a rush of imports so as to avoid the higher duties carried in the new law.

The actual revenue for the first month of the operation of the protective measure of \$40,868,266 or at the rate of nearly \$500,000,000 a year. Officials said this was the first time that customs receipts had reached \$40,000,000 in the month after enactment of a new tariff. They expected some recession from this monthly total, but said there was little or no indication of the slump in imports which usually has occurred during the first six months protective rates.

GEOLOGY FRAT INITIATES.

New members of Sigma Gamma Epsilon, honorary geological fraternity in the University of Texas, have recently been initiated into the organization. The following men were elected to membership because of excellent work as advanced students of geology: Lon D. Cartwright, Beaumont; Guy E. Green, Mason; Harold H. Henderson, New Braunfels and Alfred Know Tyson of Maysfield. Sigma Gamma Epsilon was founded as an honorary geology, metallurgy and mining fraternity at the University of Kansas in 1915, and the University of Texas chapter was established in 1920. The following members of the University faculty are W. Simonds, F. L. Whitney and H. P. Bybee, Dr. J. A. Udden, Dr. J. W. Beede, Dr. E. H. Sellards and P. J. Storm are also members.

50-YEAR TERM ASSESSED IN SLAYING, IS VERDICT.

Crockett, Nov. 10.—The jury in the case of Rice Russell, formerly of Overton, Texas, charged with the slaying of Douglas Crow at Houston last year, this afternoon returned a verdict of guilty and assessed punishment at 50 years in the penitentiary.

Russell, when first tried in Houston, was given the death sentence.

The Standard of Comparison

The Buick They Judge By

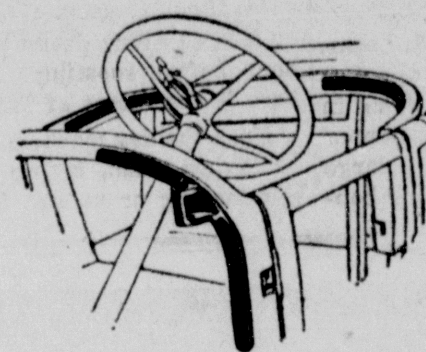

The Model "45" Six Cylinder Touring—\$1195

The famous Buick five-passenger, six cylinder open model today, as in past years, sets the standard of automobile value.

It is the motor car by which others are judged because it represents the best of each year's developments in mechanical refinements, appearance and riding comfort.

The Buick Model "45" combines the characteristic Buick qualities of performance and stability with distinctive beauty and a completeness of appointments not to be found elsewhere.

We'll be pleased to give you a demonstration any time.

Better Body Construction

Braces in the body frames of Buick open models are bolted through the wooden frame work instead of being merely screwed into it. Bolting these braces prevents the joints from loosening under driving strains. Note how the bracket for the windshield post is bolted in seven places, making it absolutely rigid. In mounting the bodies on the chassis more bolts are used to secure the body.

The Buick Line for 1923 Comprises Fourteen Models

Four—2 Pass. Roadster, \$865; 5 Pass. Touring, \$885; 2 Pass. Coupe, \$1175; 5 Pass. Sedan, \$1295; 5 Pass. Touring Sedan, \$1325. Six—2 Pass. Roadster, \$1175; 5 Pass. Touring, \$1195; 5 Pass. Touring Sedan, \$1295; 1 Pass. Sedan, \$1295; 4 Pass. Coupe, \$1295; 7 Pass. Touring, \$1435; 7 Pass. Sedan, \$1595; Sport Roadster, \$1625; Sport Touring, \$1675. Prices C. & B. Buick factories. Ask about the G. M. A. C. Purchase Plan, which provides for Deferred Payments.

PROPER FEEDING AND CULLING OF HENS NECESSARY INSURE EGG PRODUCTION.

BY F. W. KAZMEIER.

Many reasons there are, when your hens refuse to lay. There are so many we can not begin to enumerate them here. One thing is certain, that hens are made to lay eggs. There is no question about this, and when they refuse to perform, it is not because they belong to a union. It is because are not in condition to lay; do not know how to lay, or do not get the raw material with which to make the eggs. In this article we shall discuss this subject very frankly.

First of all, do you expect your hens to make something from nothing? Too many people belong to this class. We repeat the world is full of them. Eggs are not made from air, nor good intentions. Too many people are not willing to get out and rustle the necessary feed for the hens in the Fall and Winter. It is true that in the Spring and Summer many hens will rustle their own feed, not so in the Winter. At that time the man with the feed pail must rustle what it takes to make the eggs.

Many hens do not know how to lay eggs. Either they are so old that they have forgotten how to do it, or they were born without this knowledge. We have found many cases of this. Not long ago we made a trip around to a large number of back yard flocks and also farm flocks. The majority were not laying. What did we find to be the trouble? The first thing we observed was that a large number of the hens were too old to be able to produce eggs. Next we found that many hens were born without the ability to lay many eggs. Third we found that the hens were fed only enough feed to produce half an egg. A hen can not lay a half egg.

With her it is a complete egg or nothing.

If your hens are over two years old dispose of them. They have passed their period of usefulness. Early hatched pullets make the best early Fall and Winter layers. Hens seldom give as good production at this time of the year as pullets. Late hatched pullets do not make good Fall and Winter layers. One of the best ways of getting good Winter layers is to hatch your pullets early and from hens that lay in the Winter time. It stands to reason that if you will hatch from the Winter layers, their offspring will also develop into good Winter layers. A hen that can lay in the Winter can also lay in the Summer and Spring. Now is the time to plan your breeding pen that is going to produce your Winter layers for next year. Leg-band or in any other way mark or designate the hens and pullets that lay in the months of November and December. When you come to hatching eggs, hatch from those that have been laying in the Fall and Winter. This is very important and now is the time to do it. Do not put it off until it is too late. Immature pullets, also sickly ones, are no good, they will never produce enough eggs to pay expenses. They should be culled out at once and sold on the market.

Grade your flock carefully according to size, age and maturity. Do not permit old and young fowls to run together. The smaller and older ones will be crowded away from the feed hoppers and as a result can not get enough feed to produce eggs.

A lack of hopper feeding space is another common cause of poor egg production at this time of the year. You should provide at least one foot of hopper space to every 10 hens in small flocks and one foot of hopper space to every 20 hens in large flocks more feeding space around hop-

pers is still better. Every time a hen has to wait her turn at the hopper she is losing valuable time. Remember the laying hen is like a factory, being fed the raw material and turning out the finished product in the shape of eggs. It does not pay to have her standing idle, because then the machinery is not working.

Have you provided comfortable roosting quarters? Comfort provided laying hens they will repay in the shape of eggs. One successful poultry raiser and egg-producer told me once that in order to get eggs from hens in the Winter it is necessary to keep them comfortable happy and contented. We appreciate the importance of this. For this reason we go out of our way to make our laying hens feel at home. We keep the houses scrupulously clean. The floor is dry and covered with 10 inches of straw or shavings, straw preferred, for litter. It will do your heart good to see a flock of all one size, shape and color, working and digging down into this litter, and singing to their heart's content.

Often you can approach the house and hear them talking to each other. When you can hear a large number singing and working, you know that they are hard at work making eggs. A single hen in the majority of cases is a laying hen. Keep your eye on those individuals that early in the morning hop off the roosts and start to singing and working in the litter. About 9 or 10 o'clock they will be looking for nests. Not so with the ones that stay on the roost until about sunrise and then seem to come off the roosts with regret, to stand around first on one foot and then on the other, more or less discontented. You can feel assured that they are not on the list of workers and layers.

Do not feed scratch grains more than once a day. If you are feeding it more often, that may be the trouble. It is not good practice to feed scratch grains more than once a day if you want eggs and lots of them. The scratch grain does not make eggs. It is merely fed to induce exercise, and thus increase their appetite so they will consume greater quantities of the famous dry mash that makes eggs. Do not feed more than about a quart of scratch grains or less to every dozen hens about an hour before roosting time. Right here is the secret of Winter eggs.

Keep the dry mash, sometimes called laying mash, before the fowls in self-feeding or so-called dry mash

hoppers. This dry mash is what spells eggs and makes the hens shell them out when everything else fails. The hens should eat at least twice as much dry mash as grain. One dozen hens should eat not less than two quarts of dry mash every day. Do not give them things to eat that have no great food value and will only take up room on the inside. This is important—there is only one feed that really makes eggs and that is the dry mash or laying mash. Do not feed too much of such feeds as table scraps, etc., because the same has no great food value, only takes up valuable room in the digestive system and does not make eggs. Remember a little amount of these feeds is all right, but the big idea to realize is that the laying mash makes eggs, and all the rest is more or less of a drawback. The more dry mash the hens will eat without developing digestive troubles, the more eggs they are bound to lay. Too few people realize the fact to yet eggs, feed them the things that make eggs, and not much of anything else.

Remember the little details, like grit, oyster shell and plenty of drinking water sometimes cause a delay in egg production. When fowls are laying they drink twice as much water as any other time. Make your plans accordingly and give them water.

In carefully conducted experiments at the Missouri Experiment Station it was found that balanced rations were a great determining factor in influencing egg production. Many people still believe that one ration is still as good as another. This is far from the truth, because a well balanced ration is sure of more eggs than an improperly balanced ration. Just throwing something to eat for the hens is not going to make them lay. We know of people that have been doing this for 50 consecutive years, but seldom get any eggs from their hens in fall and winter. Remember that hens will lay regardless of the season of the year. All they want is the necessary ingredients with which to make the eggs.

Do not forget the green food. A lack of green food will first decrease egg production followed closely by a rundown condition, only later to contract colds that may develop into roup. Green food colors the yolk that rich yellow so much appreciated by the consuming public.

The use of tonics for laying hens is a useless expenditure of money. The patent egg foods do not make

eggs. The stuff you buy from drug stores do not make eggs. If any egg was made of these things not many people would care to eat them. Honest food makes eggs, especially when it is properly mixed and balanced.

So-called egg makers, muchly advertised now, are not dependable; they are worse, but we do not care to make it any stronger. If you must give them a stimulant, feed a little ginger and red pepper in the dry mash. We do not believe that is necessary or good practice.

If you want to force your hens for extra heavy egg production, add more animal food in the shape of meat scraps to the dry mash mixture and provide such feeds as skim milk, buttermilk or green cut bone. Animal food makes the white of the egg and that is what most feed mixtures are

deficient in.

Fresh meat of any kind when fed to hens will increase the egg production. In some sections of Texas they feed rabbits, in some places they feed calves not good enough to raise or worn out horses. Do not feed spoiled meat of any kind. In warm weather meat will spoil very rapidly.

Postoffice Box 872 COTTON EXCHANGE BLDG. L. D. Phone 434

Bermuda onion growers of South Texas have organized the Texas Farm Bureau and Onion Exchange at Crystal City. The number of acres planted this year is expected to go above 12,000, the market price for which should bring to the growers at least \$3,000,000.

The South Plains Poultry Association is making plans for its annual poultry show in Plainview during the month of December. Over three thousand birds were entered in last year's show, poultry coming from as far as Maine and California. Poultry raising is making big strides in West Texas.

The five-year-old son of W. M. Abbott, who lives on the line of Parker and Hood counties, is believed to be the champion cotton picker of Texas for one of his age. He picked in one day fifty-eight pounds of cotton. His brother, who is seven years of age, picked in one day 101 pounds of cotton.

An epidemic of anthrax has appeared in Nolan county and the adjacent territory. On the Knox ranch, thirty head of cattle succumbed to the disease, and in other parts of the county many head of horses have died. The cases are being investigated by State veterinarians.

Three baby beaves were recently canned at Fort Worth in roasts, steaks, stews and soup by the Pantego Home Demonstration Club, under the supervision of Miss Nette Shultz, county home demonstration agent, at the home of Mrs. W. H. Austin, before an audience of twenty-five.

The Texas bee-keepers want every housewife to add honey to the list of materials she uses in cooking, and are presenting all over the state attractive and valuable recipes for making many tasty and delectable dishes.

Tarrant county won the silk banner for the best exhibit of peanuts entered by ten members of the boys' clubs of the county in the Dallas State Fair. Dawson county took first place for the best ten heads of milo, kafir and feterita entered, while Bexar county took first in the corn exhibit.

Winning the grand championship and thirteen first prizes, Duroc-Jersey hogs owned by George P. Lillard & Son of Arlington swept the boards at the Louisiana State Fair at Shreveport and maintained the reputation made at the State Fairs of Texas and Oklahoma.

The fifth annual Collin County Fair was held in McKinney early in October. A distinctive feature were the community exhibits, twenty-three in all, which presented splendid arrays of farm and orchard and barnyard products, preserves and canned goods, breads and cakes, dresses and fancy goods.

A demand for young heifers was manifested at a recent sale conducted at Sherman by the Grayson County Live Stock Association. Jersey cattle were sold to buyers coming from all parts of Grayson county, chiefly, and some from neighboring counties. Dairying is attaining greater development than ever in North Texas.

Frank Gardner, a farmer who lives a few miles from Granger, has on exhibition at Georgetown several jars of dehydrated corn, beans, turnip-greens and other vegetables, which he cured by a heating process invented by himself. Mr. Gardner has dehydrated many bushels of garden vegetables which his family will enjoy throughout the winter.

TEXAS produced an average wheat crop of 9.35 bushels per acre, this year, and a total production of 9,565,000 bushels from the 1,023,000 acres which were planted. Corn yielded an average of 19.66 bushels per acre, and a total production of 121,235,000 bushels. Average yield of oats was 22.5 bushels per acre, or a total production of 36,923,000 bushels. Condition of rice at this time is 76 per cent normal, and is indicative of an average of 36.16 bushels per acre, or a total of 5,204,000 bushels.

W. A. Walker of Wilbarger county does not borrow trouble when the market fails to make an urgent demand for his products. He merely stores them away until the market is ready for them. He owns a sandy farm near Rayland and planted about 100 acres to sweet potatoes this year. Potatoes grow well on sandy land, and Walker's crop will average 200 bushels to the acre, in all about 20,000 bushels. When he can sell his potatoes at a fair price he sells them, but when the demand is weak he dries them in a specially built house on his farm and gets an even better price for the hydrated product.

D. C. Chapin, formerly for several terms county judge of Zapata county, and also a member of the Texas Legislature, recently returned from California, declaring that Texas has the Pacific Coast state badly beaten in the raising of grapes, peaches, pears, berries and other fruits, vegetables of all kinds, especially potatoes, and even in citrus fruits. He has arranged to build a cold dry storage and dehydrating plant at Granbury, county seat of Hood county, and says he will take all the fruits and vegetables the Hood county farmers raise. He argues that where many Texans are getting a bare living from cotton, they might be getting rich by raising the right kind of products on the fertile lands in this state.

Terracing is considered by a large number of our farmers as a most valuable service the county agent can render, advises J. W. Luker, County Agent in Erath county. There are approximately four thousand farms in this county and each one that the agent has had the opportunity to look over needs work of this character very badly. Terracing and open ditch draining demonstrations have been conducted on the community basis in all sections of this county. Some of the results of this work may be illustrated by the following incident. One of the substantial farmers of the county made the public statement some two years ago that he would not let a county farm demonstrator come on his farm. Through the advice of his bankers, however, a community terracing demonstration was placed on his farm. After the result of this demonstration this same man said to the agent less than three weeks ago, "I would not have the work off of my farm you did, and do without it, for one thousand dollars." There are many similar examples throughout this county. Crop records are being kept this year on farms that were once abandoned on account of the hillside ditch, but which have been reclaimed by proper terracing and drainage, and no doubt these records will reveal some surprising truths this fall.

THE fifth annual Collin County Fair was held in McKinney early in October. A distinctive feature were the community exhibits, twenty-three in all, which presented splendid arrays of farm and orchard and barnyard products, preserves and canned goods, breads and cakes, dresses and fancy goods.

A demand for young heifers was manifested at a recent sale conducted at Sherman by the Grayson County Live Stock Association. Jersey cattle were sold to buyers coming from all parts of Grayson county, chiefly, and some from neighboring counties. Dairying is attaining greater development than ever in North Texas.

NEW TARIFF LAW ON GAME.

The new tariff law fixes a price of eight cents a pound for ducks brought across the Rio Grande river from Mexico into the United States, and the duty on venison will be four cents a pound. The former price was 30 percent of the value for ducks and a cent and a half per pound for venison. According to the new law all venison must be passed by a veterinary inspector before it is brought to this side.

A BOY SCOUT RECEIVES FREE TUITION.

William E. Joor Jr. of Arcadia Park, member of the Dallas Boy Scout Troop, has received free tuition to the University of Texas for his attainment of the Eagle Scout rank in the organization.

Recognizing the splendid training offered in the Boy Scouts' organization, the board of regents at the University have announced that all scouts who receive the Eagle Scout rank will be exempted from matriculation fees in the University.

HARDWOOD INSTITUTE FOR LUMBERMEN.

A hardwood institute for lumbermen of Louisiana and Texas, with headquarters at Rice Hotel, has been opened in Houston. The purpose of the institute is the elimination of waste, the better and cheap production and utilization of hardwood lumber, the securing for the ultimate consumer cheaper and better articles and advancing the cause of forest conservation.

The institute was formed recently at Chicago by a group of manufacturers, and is expected to be of great benefit to both manufacturers and the consuming public.

THE BANKHEAD HIGHWAY.

The Bankhead Highway has been finished through Rockwall county, connecting with Hunt county on the east and Dallas county on the west. The thirteen miles of the road through this county cost an average of \$39,000 a mile.

About 12 miles of the Bankhead highway has been completed in Tarrant county, connecting Parker county on the west with Tarrant county on the east. That part of the highway in Tarrant county is constructed of rock asphalt, well graded throughout, and is a splendid drive-way.

Progress in construction of the Bankhead highway is also being made in several West Texas counties.

FARM LABOR UNION TO MEET.

The annual convention of the Farm Labor Union of America will be held in Dallas some time during December, according to Fred S. Rogers, attorney for the union, who, with R. L. Robertson of Gober and Charles Saville of the Dallas Chamber of Commerce, is making tentative plans for the meeting. It is expected that more than 1,000 delegates will attend this convention from local unions in Louisiana, Mississippi, Arkansas, Oklahoma and Texas. In Texas alone, it is reported, there are 100,000 members of the union, while membership in the five states represents about 80 percent of the total union strength.

DID THEY EXCEED THE QUOTA?

A ship-load of aliens arrived in an American port a few days ago. They were not like the average immigrant who comes with high hopes and eager expectancy of reaching a land of plenty and of promise. They were as homesick as any exile that ever pined for his native land. They had been decoyed, overpowered and made prisoners. Here is the passenger list of the "immigrants":

Thirteen baby elephants, 200 monkeys with 60 monkey babies in arms, two Bengal tigers, two sloth bears, three black panthers, two hippopotami, 56 snakes, and 900 miscellaneous birds. They were all consigned to a Hagenbeck representative and will be disposed of among the circuses and 300 parks throughout the country.

Stories for Boys and Girls

"Can Easily Gnaw Through a Tree Trunk."

THE BUSY BEAVER.

Often on this page you have read the story of clever animal and bird builders, and the skill with which they build their homes and do all in their power to insure that their little ones shall be safely housed in them and free from harm.

One of the cleverest animal builders is the beaver, a little animal much valued on account of its fur.

The beaver is usually about two feet long and weighs 30 to 60 pounds. It is reddish-brown in color, although sometimes black or white ones are found. Its fur is of two kinds—a soft thick fur which grows next to the skin, and long, coarse, glossy hair on the outside. Each foot has five toes, but only the hind feet are webbed, so that in swimming they only are used. The little animal always swims with its fore feet folded under its body. Its tail is large and flat, and, in swimming, serves as a scull.

Beavers always live near lakes or rivers, and where there are plenty of trees, because their food consists chiefly of the roots of water plants and bark. They build their huts or lodges in groups near the edge of the water, scrapping away the earth and mud in front so as to make the water deep. They also dig holes in banks near their huts, with their openings under water, into which they run when their huts are attacked.

When the water is too shallow to make it free from freezing, they deepen it by building across it a dam of small trees, roots, branches, stones, moss, grass and mud. They have such sharp teeth that they can easily gnaw through a tree trunk five or six inches thick.

They always do their work at night, and, like the squirrel and the dormouse, lay in a supply of food in the summer for the winter.

Great numbers of beavers are killed yearly by the Indians and trappers for the sake of their fur. Beavers are easily tamed, and a tamed beaver will answer to its name and follow its master around like a dog. It will even creep up into its owner's lap and behave much like a petted cat.

BREATHING ORGANS OF PLANTS.

All plants, from the humblest wayside weed to the most stately tree, are provided with "lungs" and a regular respiratory system. If a leaf be examined while under the glass of a powerful microscope it will appear almost like a piece of lace work, the entire surface being punctured with thousands of minute openings. These openings may properly be said to be mouths. They are technically known as stomata, but they serve in the capacity of a mouth and it is through their well-guarded lips that all the air passes into the tube that is provided for the purpose of aerating the blood (sap) of the plant or tree in question. Strictly speaking, the leaves themselves are the lungs of a plant and the air comes in direct contact with the sap and aerates it as soon as it passes through the minute mouth or opening in the surface of the leaf.

The botanists say that these stomata are so well protected with tiny bristles that it is absolutely impossible to force a drop of water through them. This is certainly wonderful, when we consider that they are continually opening and closing, in fact always performing the act of inspiration and expiration.

Wagner says that "the average apple tree of five years' growth inhales and exhales as much air in a given length of time as does a full-grown man."

THE ROAD OF HARD WORK.

To amount to something, you must do something, create something.

The champion hen is the one that lays the eggs, not the one with the loudest cackle or the reddest comb or the longest tail feathers.

The champion cow is the one that gives the most milk and butter fat, not the one most fancifully marked, like the cattle in the Bible, or the one with the loudest "moo."

I wish that some man of real eloquence could make the millions of young people growing up in the United States today take of life the serious view that their ancestors took, and realize that the only road worth while is the road of hard work that really leads to something worth while.

"DICK," THE NEWSPAPER HORSE.

For sixteen years "Dick" has been pulling a cart for carriers on a Joplin Globe route through East Joplin, Kansas. Carriers come and go, but Dick always is sold with the route. He has changed hands more than once during his newspaper "career."

Persons to whom the route is sold demand that the horse be included in the deal. There is a reason for this. Dick knows the route. His intelligence in this respect is almost human. The driver never has to touch the reins or to tell him when to stop or start, and he knows when and where to pull close to the curb.

There are more than 600 subscribers on the route and Dick has every one placed. How about new subscribers? Just once does the horse have to be guided to one. After that he goes there without direction.

An average of 600 papers, six days a week for sixteen years, makes quite a large number of deliveries. The route is about six miles long. So the number of miles covered by the horse is about 30,000 or several thousand miles more than the earth's circumference. Dick has not missed a morning that the Globe has been published since he began his service. His present master believes the horse is good for many more years.

INSECT INGENUITY.

The beautiful butterfly has been gifted with an instinct which shows it how to elude its enemies. Have you ever noticed that butterflies fly in a zig-zag fashion? This is for protective purposes, for when it does this a bird cannot easily catch it on the wing.

Then, again, when it rests you will notice that a butterfly always holds its wings upward, thus hiding the bright colors on the upper side, and only showing the under ones. The under wing is often like the leaf or flower on which it alights. This fact, again, serves as a protection from its enemies.

Some ants have stings and some have not. Ants on which you notice two knobs joining the front part of the body to the hind one can sting.

The black ant, which has only one round knob joining its front body to its hind one, has no sting, but it protects itself with a sort of juice called "ant acid," which it can throw out if an enemy comes to disturb its "hill."

Often you will have heard the remark that a bee can only sting once, while wasps sting several times. This is on account of the different way in which their stings are made. A bee sting is made of two little darts with jagged edges, which it keeps in a kind of sheath.

GEN. GRANT ON SWEARING.

One night General U. S. Grant and a companion were sitting by a camp fire. "General," said the companion, "it seems singular that you have gone through all the rough and tumble of army life and frontier service and have never been provoked into swearing."

Grant replied, "Well, somehow or other, I never learned to swear. When a boy I seemed to have an aversion to it and when I became a man I saw the folly of it. I have always noticed, too, that swearing helps to arouse a man's anger, and when a man flies into a passion, his adversary, who keeps cool, always gets the better of him. In fact, I never could see the use of swearing."

MINERAL RESOURCES OF TEXAS

(Continued from Page 2.)

reached what is probably, up to the present time, the maximum production of 36,482 tons of ore, yielding 8,451 flasks of mercury valued at \$992,992. Among publications relating to Texas quicksilver deposits should be mentioned Bulletin 24 and 822 of the University of Texas.

Miscellaneous Minerals.

The minerals occurring in Texas not utilized at present and mined only in a small way are numerous. The following brief note relates to some of these as yet but little developed minerals.

Graphite is found in Llano, Mason and Gillespie counties of the Central Mineral region, where it is being mined to some extent. It is found in the formation known as the Pack Saddle Schist, and is said to exist in this formation in large quantities.

Other minerals found in the same formation include talc and serpentine, neither of which, however, are at present produced in commercial quantities. Mica is found to be present in various formations in the state and has been mined to some extent in the Van Horn Mountains in Culberson county.

Rare earth minerals which are valuable because of their property becoming incandescent upon being heated have been mined to some extent in the Central Mineral region. Among the rare earth minerals of this region may be mentioned fergusonite, yettrioite, allanite and others. Although found at various localities, the best known locality for these minerals is at Barringer Hills in Llano county.

EDITOR'S NOTE—This is the last of the series on "Mineral Resources of Texas." In the January edition of our magazine section Mr. B. C. Thorpe, Botanist of the University of Texas, will write on "Hardwood Timber Resources of Texas."

BRAHMA BULLS PUGNACIOUS.

The prowess of Brahma bulls is attracting the sporting fraternity of Mexico to an extent that more of these bulls are being purchased from the ranches of Kinney county, Texas. The introduction of Brahma bulls into bull fights across the border last fall caused a sensation as well as some physical havoc among the picadors and the matadors.

GRAND OPERA STARS FEATURE KIDD-KEY PROGRAM.

Four members of the Chicago Grand Opera Company provided the personnel of the initial offering of Kidd-Key College to the music-loving public of Sherman on their annual artists' course at the college auditorium Oct. 17. These stars included Irene Johani, soprano; Barbara Wait, contralto; Jerome Uhl, baritone, and Ralph Errolle, tenor. The entertainment which they furnished included both vocal and instrumental numbers.

CORSICANA SEES PAGEANT.

Navarro county's progress was shown during the recent Navarro County Fair at Corsicana by a historical pageant which began with the days when Indians roamed over the country, and carried on down through the several periods of development to the time when the boys marched away to the world war. About 2,000 persons had parts in the pageant, which was seen by 12,000 or 15,000 persons.

FRUITAGE OF SECRET PRAYER.

—But thou, when thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly. For your Father knoweth what things ye have need of, before ye ask him.—Matt. 6: 6, 8.

Do you know that the number of American soldiers killed in the World war was only 48,000, whereas in the past 18 months 91,000 died as a result of automobile accidents in the United States. If you were to be hit by an automobile today and injured, would you have money enough in the savings bank to pay your expenses? And if you were killed, how much money would be left to your family?

GUARDING THOUGHTS:

—Finally, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, if there be any praise, think on these things.—Philippians 4: 8.

TO BUILD GREAT RESERVOIR.

Wichita Falls is about to begin a great irrigation project which will cost four million dollars and will provide water for irrigating land in Wichita, Wilbarger and Baylor counties. It is estimated that the lake will contain 143,374 billion gallons of water and will be 25 miles long, 8 miles across and 121 miles around. The main dam is being built by dredging, the barge equipment requiring 2,100 horsepower, of which 1,600 horsepower is used by the big centrifugal pump that does the excavating. The dam is eight miles from the nearest railroad.

ALWAYS PROTECTED:

—When thou passest through the waters, I will be with thee; and through the rivers, they shall not overflow thee: when thou walkest through the fire, thou shalt not be burned; neither shall the flame kindle upon thee.—Isaiah 43:2.

ANNUAL CONVENTION UNITED DAUGHTERS OF CONFEDERACY.

The following were elected as new officers of the Texas division, United Daughters of the Confederacy, which met in annual convention at Fort Worth, Oct. 19:
President, Mrs. E. W. Bounds, Fort Worth; first vice president, Mrs. W. J. Wilkinson, Houston; second vice president, Mrs. J. Wallace Brosig, Navasota; third vice president, Mrs. C. E. Kelly, El Paso; fourth vice president, Mrs. Merrick Davis, Paris; corresponding secretary, Mrs. C. C. Yancey, Denton; treasurer, Mrs. W. E. Langston, Fort Worth; registrar, Mrs. M. Jones, Austin; historian, Mrs. E. G. Magruder, San Angelo; custodian, Mrs. T. H. Bowman, Austin; recorder of crosses, Mrs. B. B. Knolls, Houston; poet laureate.

It was voted to change the time of the annual convention to the first Tuesday in December. Miss Decca Lamar West was elected to represent the Texas division at the next general convention of the Daughters of the Confederacy.

83-YEAR-OLD CONFEDERATE VETERAN MARRIES.

James Nelson, 83 years old, and Mrs. A. Thompson, 79, were married Oct. 9, at the State Confederate Home at Austin, the Rev. R. A. Rowland, chaplain of the home, officiating. The groom for some years has lived at the Confederate Home, while the bride has resided at the Confederate Woman's Home. The "newly-weds" will spend their honeymoon in Austin and make their home in quarters in the Confederate Home assigned to married couples.

CHILDREN MUST BE HOME BY 9 P. M.

Children must be at home by 9 p. m. or be accompanied by their parents, is an order recently issued to the police by Mayor H. V. Hennen of Denton.

Mayor Hennen said he took this action because of the large number of small children on the streets at all hours of the night and because a number of small boys have been breaking into stores.

TWENTY STATE HIGHWAYS IN BAD CONDITION.

Twenty Texas road projects constructed by county appropriations augmented by money from the Bureau of Public Roads, are in bad condition, according to information compiled by A. R. Losh, Federal Highway Engineer in charge of the Sixth district, including Texas, Oklahoma, Arkansas and Louisiana. The information has been forwarded to Captain J. D. Fauntleroy, State Highway Engineer.

Records are not all of late date, Mr. Losh pointed out, and it may be possible that some of these roads have been properly repaired since they were surveyed by engineers of the bureau. However, Mr. Losh declares that maintenance by individual counties is far from satisfactory.

DEMONSTRATION OF TEXAS PRODUCTS.

Students of home economics in the University of Texas are planning a demonstration of Texas food products. Each girl has chosen a product to can, and will find out the counties in which it grows, its composition, and its uses. In that way each student is expected to become better acquainted with the resources of her home county. Among the canned fruits which will be exhibited are figs from South Texas, Travis county spinach, green beans and tomatoes, and watermelon preserves and pickles from the lower Rio Grande Valley counties. The work is an experiment and it is proving to be interesting as well as helpful.

Women's Department

4194. Girls' Dress.
Cut in 4 sizes: 6, 8, 10 and 12 years. A 10-year size requires 2 3/4 yards of 44-inch material. Price 10c.

4195. Misses' One-Piece Dress.
Cut in 3 sizes: 16, 18 and 20 years. A 16-year size requires 4 1/2 yards of 36-inch material. The width of the skirt at the foot is about 2 yards. Price 10 cents.

4196. Boys' Suit.
Cut in 4 sizes: 3, 4, 5 and 6 years. A 4-year size requires 2 yards of 44-inch material. Price 10c.

HOW TO ORDER PATTERNS

These patterns can be ordered from the Beauty Pattern Co., 1188 Fulton Street, Brooklyn, New York. Enclose 10 cents in stamps with your order and be sure to sign your name and address to order and write name and address plainly. Also write your own name and address in left corner of envelope. Orders frequently go astray from carelessness. Some persons sending in orders fail to sign their names or fail to give bust measure or age, or they fail to enclose stamps, or get pattern number correct. BE CAREFUL. The Pattern company is responsible, but don't blame this newspaper if your pattern goes astray. Should you not get your pattern within ten days after sending in order write the Pattern Company, giving again the bust measure, age, pattern number, and your postoffice address. IMPORTANT—Write the initials "S. W. M." after each pattern number.

FASHIONS FOR NOVEMBER.

As the days grow shorter, skirts grow longer, for even morning costumes reach almost to the ankles, and gowns for afternoon and evening are still longer.

Many new models show the waistline low, but there are some dresses showing the waistline at normal all around, and others raised to that point at one side, producing a diagonal waist line.

The side draped frock will probably continue to share popularity with the straight one-piece dress.

Some of these models are beltless, having a plain bodice joined to the skirt under a fold of the fabric.

With the draped skirt sashes and ribbons are not required.

A new version of the one-piece style has the skirt sections in shaped outline, and the wide sleeve set in at a deep armseye, and slashed to show a peasant sleeve beneath.

Another equally pleasing but plainer style is smart with patch pockets and side plaits at the seams.

A youthful and becoming model shows a long blouse waist with surplice closing and shawl revers.

The skirt simulates the "wrap style," and is finished with plaits at the closing.

The new draped styles are not confined to "grownup" fashions. Pretty cascade effects are seen on dresses for girls. As are also apron tunics and side drapes.

The soft and pliant materials now in fashion lend themselves well to the lines of draperies.

Full skirts and fitted waists are not entirely new, but have heretofore been confined to fashions for young figures and for dresses for formal and evening wear.

The coming months, however, will bring out these lines with various changes and modifications, that will make them more acceptable for general wear.

Circular skirt lines are in evidence. Circular front sections and godets, give increased fullness and width to the skirts.

One noticeable point of the new styles is the unusual large quantity of material that is required.

There is a tendency to place the largest amount of material in front and keep the back plain.

As always, the choice of material decides the styles of the costume, waist or dress.

A very smart coat dress of soft wool velvet, is draped at the side, and made with surplice closing. A collar of fur and an ornament of fur and jet are the only trimming.

A smartly tailored suit of navy blue velours has a long straight line single-breasted coat with a coat collar and mannish revers, and a straight two-piece plain skirt.

The self-trimmed frock is still popular, but one sees many costumes trimmed with rows of narrow braid.

Slim shoulders and long sleeves go "hand in hand." Sometimes the sleeve is long and shaped over the hand.

A very unique draped skirt is smooth over the back, and has the drapery caught in folds at the center front, over a long plain separate panel.

This will be a season for combining materials as well as colors.

A waist of navy blue crepe, long-waisted, with drop shoulders and peasant sleeves is closed at the side in Russian style. It is joined to a skirt of gray velours.

Black duvetnie, and beige color crepe combine to make a very smart dress. Bands of embroidery form the trimming.

Autumn again brings a demand for separate skirts with new and interesting materials. Check and waffle plaids are popular.

Self-belts and pockets are among the skirt features and braid is extensively used for trimming.

Blouses are shown in practical suit styles, of crepe de chine, and georgettes. Dressy types are in lace and georgettes, some elaborately beaded.

Printed Oriental blouses are smart. The best trimming feature is braid of many kinds, with straight and fancy edges, in matching colors and in color combinations.

Narrow flat braids trimmed in rows, also ribbon, is similarly used for borders and bindings.

Girdles will grace the simple line dresses as heretofore.

Metal is a favorite material for girdles.

Women of mature proportions will favor the low waistline, especially with the lengthened skirt.

For a substantial good-looking cloth dress, kasha cloth has much to recommend it.

SOUPS.

Most delicious soups may be made with beans, lentils, split peas and other dried legumes by soaking these over night, cooking until tender, rubbing the pulp through a sieve and adding to the hot milk and seasonings. A dash of onion heightens the flavor, as do also marjoram and sage in such soups. Vegetables like carrots and parsnips, oyster plant and even sweet potatoes are a delicious basis for cream soups. When we know that a generous serving of any one of these soups is equivalent to a large meat portion we should see one way to cut down the meat bill as well as give the family the greatest nourishment.

The second broad class of soups is made with meat stock. And the only principle on which to make good soups is to place the meat and other ingredients in cold water and simmer slowly for a long period. The reason we put cold water on and cook slowly is because we wish to extract the juices. If we place the meat in hot water and cook violently we will not get the juices extracted and we will lose much of the flavor by evaporation.

We are familiar with the pieces that make the best soup stock. They are the shin, which contains a large per cent of gelatin; the hind shank, the knuckle, the oxtail, the beef neck and clod, and the shoulder and neck of mutton or veal. Don't ask for soup meat, but specify the piece that you wish, and always buy or get a large amount of bone. It requires about four pounds of any piece of meat to make soup.

The better practice is to bring the meat slowly to the boiling point after allowing it to stand a half hour in cold water to which salt is added. Let it simmer five or six hours on a very low flame (unless a pressure cooker is used). At the end of this period it should be strained or "skimmed" to remove the scum which has floated to the top. One hour before serving add the vegetables and seasonings that are to be used.

Or the same liquid may be boiled down further, seasoned and used as a stock from time to time because if kept cold and covered it will last several days. It is never a good plan to add the vegetables and seasonings at the beginning, because the long cooking gives them a coarse flavor. It is better to use the meat bones and any meat scraps, such as ham, a bit of sausage, a little fresh pork bones, etc., and boil separately.

It is a mistake to suppose that soup meat is useless. Meat used for soup has lost its flavor, but is still nutritious and may be chopped and made into balls or meat loaf, or used in other ways as well as in the soup when it is served. Some countries make delicious meat patties of it by chopping, seasoning, rolling in fritter batter and serving with the soup.

The common flavoring of carrot, onion and tomato must not be omitted from any meat soup. Celery, and the various sages, parsley, cloves and ocka complete the list. A few slices of fresh green pepper add a novel flavor. Seasonings had better be placed in a fine muslin bag if the soup is a delicate one, like a bouillon.

The soup pot is the housewife's best friend to economy. Many left overs which now go the easy way to the garbage pail should by all means be dropped into the family stock pot. Portions of vegetables which seem too little to save could also be added. And many housewives who no longer make soup because they say it takes too much time or requires too much gas, have not learned the secret of using the little simmer burner, which is a part of every gas range. As for time soup requires almost no watching and once started will go simmering on without attention. One good plan is to start the soup at night possibly while washing dishes; let it stand over night and finish the short boiling in the morning.

HOUSEHOLD HELPS.

A little finely cut parsley and onion added to mashed potato give to that commonplace dish a new zest and interest.

After the lettuce has been washed and is ready to place on the ice it is much more convenient to tie it up loosely in a cheesecloth square than to crowd it into the regulation bag; also this way does not bruise the lettuce.

A good substitute for dumplings and a good way to use up stale bread is to place thick half or quarter slices over the top of the stew and let them steam with tightly closed cover for a few minute before serving.

An egg that is cracked may still be boiled without danger of its running out of the shell. Turn the egg over and lightly tap it on the other side so as to make another crack opposite the original one. It can then be put safely into boiling water for forces are equalized.

Hamburg steak is more appetizing when formed into one large compact flattened cake, and broiled, than when fried in small cakes.

WOULD CHOP OFF "CITY"
The progressive town of Sterling City, Texas, wants to drop the "City" from its name, and a petition to that effect has been circulated by the Sterling City Chamber of Commerce. Just "Sterling" is sufficient to satisfy the people, and they have so informed the postmaster general, whose permission must be obtained for a change in the postoffice name.

The Reading of the Riddle

WILLIAM ALLEN WHITE

Copyright, 1922, by the Macmillan Co.

"Dear, was it really you or I?
In truth the riddle's ill to read,
So many are the deaths we die
Before we can be dead indeed."
—W. E. Henley.

THE town of Willow Creek lies at the junction of a rivulet of that name, with the Big Muddy. But the people of that community being born scoffers, have changed the name of the Big Muddy in common parlance to "Mud Creek," and, transformed by the alchemy of popular depreciation, the name of the town itself has shriveled into "Willow Creek." It might have been something of a town, as towns go in the West, but instead of pulling with its neighbors for the success of the town, each of its founders spent his time making fun of the pretensions of others. When there was talk on the part of "old man" Mead, the primeval postmaster, of securing the government land office for Willow Creek, the Indian trader, and the saloonkeeper, and the blacksmith, made great sport of the old man's ambition. A few years later, when civilization had crowded in with a hotel, a lumber yard, a new saloon, and a barber shop, someone spoke of starting a newspaper; but the laugh that went up from Willow Creek was the only unanimity that greeted Editor McCray when his back was turned. But the newspaper came, and so did the people, and they kept coming, until, when the "boom" of the later eighties struck Kansas, it found Willow Creek with about two thousand scoffing inhabitants.

But, in one way or another, the "boom" seemed to bring wealth to Willow Creek. And with wealth, came some attempts at the organization of polite society. There were innumerable young real estate agents, young doctors, young lawyers, and clerks, all from the East, in the village; and these, with the daughters of the early settlers and such friends as they chanced to make in the high school, constituted the aristocracy of the town. It was a vulnerable aristocracy, and the scoffers made sad havoc with it.

It was said of Flora McCray, who went to boarding school and came back, timid, retiring, and distinctly unsocial, that, "She needn't hold herself so high. If her father would only pay back the money he stole in the school land fraud she would be as common as anybody." But the girl paid no heed to these rumors, if she heard them. She quietly filled her small sphere, bounded on one side by her meek-voiced mother and her busy father, on another side by her church and her "church social," on a third side by a very brief glimpse of a very big world and her memory of it, and on the fourth side by occasional day dreams and night thoughts, pretty much the same as those which come to any young girl of good health, good spirits, and twenty-one years, who has never had a sweetheart.

As the reaction, caused by the decadence of real estate prices set in, Willow Creek became poorer. As the young men, who paid for the orchestras, and halls, and flowers, gradually left town, the young women, who formerly frequented receptions, parties, and balls, were seen more and more often at the "church socials." After a two years' ineffectual struggle Willow Creek gave it up, the town could no longer support two branches of society, and the "church crowd" and the "dance crowd" merged into one.

When it was announced that the entire social body of Willow Creek was going out to Robinson's for a "taffy pull" one Saturday night, the rest of Willow Creek laughed. The town people sneered at the young women who had planned the party, and intimated that the night ride out to Robinson's and back was a heroic measure; and they laughed at old man Robinson and his family for tolerating people who would snub them if they came to town, and lastly they laughed at the young men who would have to pay the livery bills.

Saturday morning, John Howard, Mr. McCray's partner in the stock business, came up from the farm on Dry Creek, and after going over some details of business, McCray asked his partner to Sunday dinner, as was his custom, when the young man was in town, and the invitation was accepted. During the "boom" Howard had made money. He had mingled with what is known as the "swell set" of Willow Creek, and though not a favorite at the flood of the "boom," the very fact that he had the social instinct, made him a necessity in society at its ebb.

Soon after leaving his partner's office, he had learned of the plans for the "taffy pull," that evening. He was urged to go, and finding that all the "legs" were full, and that all the girls of his "set" were provided with escorts, in a moment of despairing inspiration the young man sent a note to his partner's daughter, asking for "the pleasure of her company." His invitation was accepted, and late that afternoon, Flora McCray stepped into a buggy with the first beau she had ever had, and headed a long procession for Robinson's.

Someone had stopped the clock that night, and the young women, putting on their wraps, guessed that it was

nearly midnight, when the "taffy pull" at Robinson's broke up. As Flora McCray sat alone in the Robinson parlor waiting to hear the grinding of wheels across the gravelled path that would herald her escort's buggy, she went over the evening's impressions in her mind. She decided that it had been a very pleasant evening. She had never before found herself surrounded by the masterful attentions of a young man. She was pleased with his business-like devotion to her coffee cup, and was amused, yet a little startled, when he piled a monument of cake upon her plate and called on everyone to pass things down his way as Miss McCray was very hungry. It was a new sensation to find herself a part of the merriment. Heretofore, she had been only a spectator at such scenes. And thus, with a mind isolated from the vain world by such reflections, she started with Howard on their homeward ride.

It was a blustering, cloudy night. At first they chatted on about the commonplaces of Willow Creek. Flora McCray tried again and again to associate her recollection of the familiar face of her father's partner with the smooth-shaven face so near her in the night. Her repeated efforts were tantalizing. Little by little, did the wizard of the night weave her fancies, and then herself into the woof of his uncanny spell. Not only was she with a stranger, but she was herself a stranger to herself. It may have been the utter loneliness of the night that drew her close to him, but she came, and was not afraid.

Again he reached over her, and again tucked the wraps closer than ever about her, and the fumbling touches of his hands awakened the girl's new self to a delightful realization of the fact that a new being had come to her out of the darkness. She came even closer to this new-found presence, and almost cuddled against the man's great coat, and snuggled under his arm, that rested loosely upon the cushions behind her. Their talk, which had been growing more and more serious, gradually stopped.

"Are you cold—dear?" the young man asked, when he felt her come close to him. His words and his tone startled the girl and almost broke the spell. Flora McCray struggled a moment with the Girl in the Dark, and shuddered in despair as a voice from

put the hat down. She did not look at it again, but blew out the light and went to bed with her face turned from the guilty reminder. And all night long Flora McCray lashed herself for the folly of the Girl in the Dark. As she remembered it, she had made all the advances; he had only been kind and good to her.

The next morning, all of Willow Creek knew that John Howard had taken Flora McCray to Robinson's the night before, and that he was going to eat Sunday dinner with the McCrays that afternoon. But the town, as usual, was divided. One-half claimed that the McCrays had to have all of Howard's money, or they would fail; and the other half that John Howard was going to marry Flora McCray to keep the old man from prosecuting him for running off mortgaged cattle and reporting them as dead. And in the whole town no one could have been so thoroughly surprised as was Mr. McCray, when his daughter said to him, "Father, if Mr. Howard says anything to you about me, you will tell him—that I cannot marry him."

McCray and his daughter were walking along the narrow, rough sidewalk toward the church, when these words were spoken. The mother had dropped back, and was not in hearing distance. McCray could not find voice for a few exclamatory "whys" and "whats" before his daughter had said firmly, "You will be sure, won't you, father?" and was waiting for her mother to catch up with them. After the service, the women, Flora and her mother among them, hurried home to attend to the feast of the day.

At the dinner table the young people met for the first time that day. Flora McCray felt keenly, and with a twinge of anguish, that the young man's cordial suavity in greeting her was only inspired by gratitude for her generosity in releasing him from any obligation.

She met his eye, and thought she read there a recollection of everything that had been. Then, as she looked down and away, all the sweetness and unreality of the night's ride was made real to her.

After dinner the men went into the parlor, where they smoked and talked alone, while the women put away the best china, afraid to trust it to the "hired girl." Finally, young Howard

"She Came Even Closer to This New Found Presence, and Almost Cuddled Against the Man's Great Coat."

the Girl, who felt a strong arm quiet her, answered: "A little."

As the lights of the town came in sight the young couple grew silent. A turn in the road brought the buggy under the white glare of an electric light. Flora McCray was sitting upright with her hands folded under the robe, and Howard, with the whip and the lines in his hands, was consciously clucking at the horses. Each saw the other's face clearly, and as they crossed the circle of light the man spoke:

"It must be two o'clock."

The girl did not reply, and the young man leaned over to look out of the buggy, as if to scan the clouds. The prospect did not altogether satisfy him and he said:

"It's going to be a pretty gloomy Sunday, I guess."

As Howard put out his arms to help her from the buggy she barely touched his outstretched hand, and her decided shyness surprised him. In a bewilderment of confusion he said:

"You have made me very happy tonight, Miss McCray. Shall I speak to your father when I come out to dinner tomorrow?"

The girl did not reply, but went up the steps and into the house, while the young man climbed into the buggy, and beat time with the whip to the tune he was whistling, as he gave the horses the rein for the stable.

Flora McCray locked the door and slipped the bolt as quietly as she could. She blew out the light in the parlor and stole noiselessly upstairs. Just before going to bed she started to put away her hat. She picked it up. The velvet and the ribbon seemed crushed. She put out her hand to smooth them. A hot flush of recollection swept over her, and she

and Mr. McCray thought that the evening mail would be in and distributed. They put on their overcoats and were in the hall, when the elder man opened the dining-room door and said: "Mother, John thinks it's time to go, and I am going to walk down to the post office with him."

When the front door closed Mrs. McCray said:

"What a nice young man John Howard is, isn't he?"

"Oh, yes, he is nice enough, I guess," answered the daughter, rising to go to her room.

As she neared the top of the stairs, Flora McCray quickened her pace. She ran through the upper hall. Once in her room, she went straight to the dresser, where the rumpled hat was still lying. The lonely girl stood before it a moment, and then, stooping awkwardly, touched the crumpled velvet with pursed, uncertain lips, as one ashamed. It may have been the dusk in the room, or it may have been the ghost of an odor from a cigar, that transported this unschooled heart back to the darkness, and the joy of a first caress. But dusk, or ghost, or something, came to this shy girl there, and nerved her whole being, so that she was no longer awkward, no longer uncertain, nor in any wise ashamed. The pretty velvet toy she made her shrine, and in her worship she kissed it, rubbed it with her burning cheek, and buried her face in its sacred folds.

In Willow Creek where they scoff and higgled over sordid things, in Willow Creek the hard, the arid, the barren, they say—no matter what, but in and out of the narrow ways, turning the sharp corners with the rest, with tired feet, and timid, unsure hands, there goes a woman whose womanhood came to her as a dream—in the night.

LOCAL AND PERSONAL

Mr. and Mrs. J. D. Dwyer, Houston, Texas, with their three children spent the week end visiting Mr. and Mrs. E. A. Oliver of this city. Mr. Dwyer is connected with A. Baldwin & Co., of New Orleans, La.

Just received 3 cars coal. Must Sell. Batte Grain & Fuel Co. 29 2t

Mr. and Mrs. L. Wilson are visiting their son Oakie Wilson in Houston this week.

Armour Star Hams, fine, only 29c per pound.

C. N. Green & Bros.

Miss Estelle Burke visited her sister, Miss Emma Burke, in Houston the past week.

Mr. Walter Sharpe spent several days in Waco this week.

Mrs. O. D. Adams returned to Dallas last Friday after a pleasant visit with her parents, Mr. and Mrs. Wm. Ross.

Mr. Bradberry, popular manager of Louis S. Pierce Dry Goods Co., is a victim of the dengue fever this week.

Bring us your chickens and eggs, will pay 40 c trade for all fresh eggs. C. N. Green & Bros.

Rev. C. T. Talley, Presiding Elder of Marlin Conference, was a Cameron visitor last week.

Miss Juanita Caldwell, teacher in Rockdale, spent Saturday and Sunday with her parents, Mr. and Mrs. C. C. Caldwell.

Swifts Premium Hams 32c, Sliced Bacon Box 50c.

C. N. Green & Bros.

Rev. Ira F. Key left the first of the week for a few days business in Houston.

Expecting two cars of corn every day. See us before buying. 29-2t Batte Grain & Fuel Co.

Mrs. Jim Coleman and daughter, Miss Sallie, attended the annual "Turkey Trot" at Cuero last week and were the guests of Mr. and Mrs. Earl V. Evers.

Just received 3 cars coal. Must Sell. Batte Grain & Fuel Co. 29 2t

Mr. and Mrs. I. G. Menshew and little daughter of Waco, attended the marriage of Miss West and Mr. Otis Burke last Thursday evening.

Try a bottle of Orange Nip, fine. C. N. Green & Bros.

Miss Cordie West of Oklahoma is a guest of her aunt and uncle, Mr. and Mrs. J. C. Mayfield.

Good red seed oats for sale, 80c per bushel free of Johnson Grass. 29-2t Batte Grain & Fuel Co.

Seed oats 75c per bushel, barley, rye, rape, turnips and other seeds. C. N. Green & Bros.

Mrs. J. T. Bryant of Abilene is visiting her many friends in Cameron and vicinity.

Mr. and Mrs. John Owens and Misses Richardson and Scott and Mr. Dal DeWeise spent Sunday in Temple.

For Montevallo coal, the best mined, see Batte Grain & Fuel Co. 29 2t

Mrs. Mary Lankford returned last week from Waco where she spent ten days visiting relatives.

Miss Louise Adams, a student in Baylor College, Belton, spent the week end at home with her parents, Mr. and Mrs. P. O. Adams.

Mrs. S. P. Cross is convalescent from a severe attack of dengue fever.

For Montevallo coal, the best mined, see Batte Grain & Fuel Co. 29 2t

Mrs. L. J. Hefley came in from Oklahoma Friday when she had been visiting with her children, and is visiting her children, and is also visiting this week with relatives in Rockdale.

Expecting two cars of corn every day. See us before buying. 29-2t Batte Grain & Fuel Co.

Mr. and Mrs. F. R. Dunlap had as pleasant week end visitors Misses Eva Posey of Teague, sister of Mrs. Dunlap, Annie Cary and Vera Robb, of Houston.

See Batte for your fuel requirements. Batte Grain & Fuel Co. 29 2t

These young ladies are students of Baylor College, Belton, Misses Posey and Cary favored the Methodist congregation Sunday morning with a duet, accompanied on the violin by Miss Robb.

Miss Ruth Cammer, teacher at Bryant Station, spent the week end with her mother, Mrs. Cora Cammer.

Joyce Cox, student in State University, spent Saturday and Sunday in Cameron visiting his parents, Mr. and Mrs. M. G. Cox.

See Batte for your fuel requirements. Batte Grain & Fuel Co. 29 2t

Miss Bettie Lindsey, of Kerens, is a guest in the home of her sister, Mrs. John Hays.

Stove pipe, oil heaters, coal and wood heaters, Florence Oil Cook stoves. Let us show you. C. N. Green & Bros.

D. R. Criswell of Buckholts was a business visitor in Cameron Thursday and while here called at the Herald office for a brief visit.

Toys arriving daily. See our beautiful dolls. C. N. Green & Bros.

Toy books, novels, bibles, childrens story books, all manner of holiday goods. Come and see. C. N. Green & Bros.

Let us frame your pictures. Fine line of mouldings. C. N. Green & Bros.

T. G. Pettibone, vice president and general manager of the Santa Fe railroad from Galveston; W. E. Maxon assistant general manager of Galveston; and J. S. Purdy, of Temple, division freight agent, were in Cameron Saturday, November 11, on their annual visit. While here they were guests of H. C. Keith, local agent. They were in Cameron about two hours to call upon the business men and make new acquaintances.

Mr. and Mrs. J. M. Davis of Calvert were Cameron visitors last week.

Club House Red Pitted Cherries, fine sifted peas, Little Kernel Corn. The best canned goods in the world. C. N. Green & Bros.

Shelled pecans, shelled walnuts, citron, orange and lemon peel. C. N. Green & Bros.

1 dark grown 14 1-2 hands, 3 years old, fresh roached.

Brown mule has wits cut above hoof on left front foot.

Thy Dollars reward for information leading to their recovery.

BURNES PHANIX, Cameron, Texas.

Or P. H. FREEMAN, Rosebud, Texas. 29 3tp

EVANS' Corner

This corner is devoted to business, politics and general news.

One of the surest signs of old age is when a man gets to the place where he finds no enjoyment in a game of base ball or foot ball. Sam Hefley is usually wrong on all big issues, but he is a good sport when Cameron goes up against another town in a foot ball game. It is amusing to watch Albert Green on the side lines at a game. The sheriff had to make him be quiet over at Rockdale, so the boys could hear the signals.

Rockdale wants to play the game over and we are all willing for them to come over and get beat again.

We will be glad to have you come in and have your eyes tested. You might have a school boy or girl that needs glasses, if so do a good part by them and have their eyes examined and properly fitted.

We repair broken spectacle frames. Bring me your watch for repairs.

GUS EVANS

Jeweler and Optometrist

Geo. A. Thomas & Sons, Drug Store.

\$700,000 SPENT BY RED CROSS IN SOUTHWESTERN DIVISION IN A YEAR

Money Was Used in Relief and Rehabilitation Following Disasters in the District.

During the fiscal year 1921-22, ending June 30th, the Southwestern Division, American Red Cross expended \$730,936.79 in disaster relief. Part of this came from the National Red Cross funds secured from memberships, part from chapters and parts from individual contributions. This money was expended in disasters in various parts of the division, especially in the flood areas along the west bank of the Mississippi, in Missouri and Arkansas, in Texas, around Fort Worth, and in the Rio Grande Valley, at Burlington, Kan., and at Pueblo, Colo.

The greatest amount of time and effort in any of these disasters went into the rehabilitation of Pueblo and of the district covered by the Rio Grande Valley flood of last June, according to a report from the Southwestern Division, American Red Cross, in St. Louis. Fifteen hundred and ten families were affected by that flood.

The manner in which the Red Cross undertakes these disasters depends upon the conditions to be met. In some cases the local chapters and citizens' committees take charge and the division office goes in an advisory capacity. In others the situation is reversed, and in still others the work is handled jointly by the Red Cross and the citizens.

Relief work in the Rio Grande Valley flood, which was the last disaster of real importance in the division, has been practically closed and the auditing committee, as well as the advisory committee, with the Red Cross director, Henry M. Baker, are compiling their reports, to be submitted to the citizens and to the division. The wide area affected in this disaster has caused the work to be continued longer than would have been necessary, it is believed, but that it has been thoroughly done and has created friendship for the Red Cross among the citizens of the section is evidenced by the letters received at the division office.

The Young Men's and Young Women's Christian Association of Little Rock, Ark., both have thriving life saving classes which were started during the summer by the director of life saving of the Southwestern Division, American Red Cross.

LIFE-SAVING CAMPAIGN IN SOUTHWEST DIVISION

American Red Cross Organized and
Trained Many Corps in This
Section Last Summer.

More than 34 chapters have been visited during the months of May, June and July by Captain Norbert E. Raacke, first aid and life saving representative of the Southwestern Division. While visiting these various chapters, Capt. Raacke gave first aid demonstrations before Rotary, Lions and Kiwanis Clubs, as well as life saving demonstrations and instructions at Y. M. C. A., Y. W. C. A. and many outdoor pools and lakes. At the majority of the pools and lakes visited, the Captain has noted particularly that practically little or no life saving precautions are taken. A large lake at Nevada, Mo., is owned by an old Indian, who believes that if a person were drowning someone near at hand would come to the rescue.

Many letters of commendation have been received from chapters visited by Capt. Raacke. Salina, Kan., was particularly well pleased with his demonstrations at the Country Club outdoor pool. The following is an extract from a letter recently sent in by the life saving examiner of that town:

"Capt. Raacke's clever work at the large outdoor pool of the Country Club was watched in breathless silence, only to be broken by wild cheering at his many extraordinary feats of swimming and life saving. Capt. Raacke, to us, is a marvel of efficiency and his crawl stroke is still the talk of the town. He not only has been a great help in the Life Saving Department, but has given even greater interest to the Red Cross in its other lines of work."

There are several well organized life saving corps in the Southwestern Division. Kansas City, Mo., has an excellent women's corps. At the annual banquet, held in May, life saving badges were awarded to more than forty women, service medals to two and the life saving bar to one.

On July 30th the river patrol of the St. Louis Chapter gave an exhibition and races at Lincoln Beach, on the Meramec River. This exhibition was witnessed by probably the largest crowd ever gathered at Lincoln Beach. More than 500 canoes fringed the sand when the first event, the canoe singles race, was announced. Capt. Raacke had charge of the life saving demonstration, showing the various methods of breaking death holds encountered in rescuing a drowning person.

Eight life guards, after his demonstration on the barge, struggled viciously with each other in a practical illustration of life saving tactics.

The Galveston, (Texas) Life Saving Corps have frequently exhibited their skill in first aid and life saving. Owing to the prompt and efficient first aid administered by three members of the Galveston Life Saving Corps on June 4th, the life of John D. Wheeler, 23 years old, of Houston, Tex., was saved. Mr. Wheeler was overcome while bathing in shallow water and was found floating in an unconscious condition. The three members of the life saving corps succeeded in reviving Mr. Wheeler through the application of the Schaeffer method of resuscitation. He was taken to the hospital in a very weakened condition. As Mr. Wheeler was found in comparatively shallow water, it is believed his mishap was due to a fainting spell.

RED CROSS ROLL CALL AND CHRISTMAS SEAL SALE ARE DISTINCT

At a joint meeting of the National Committee of the American Red Cross and the National Tuberculosis Association, held recently, an agreement with regard to the campaigns conducted annually by each organization, which follows each other only a day apart this year, was reached. The American Red Cross will conduct its Roll Call from November 11th to November 30th. The National Tuberculosis Association will conduct its nation-wide sale of Christmas Seals from December 1st to January 1st.

A statement issued jointly by the two organizations says that undoubtedly the effectiveness of the mutual understanding depends in large measure upon the extent to which the local workers of both organizations adhere to the agreement. Overlapping of effort will be injurious to both causes, the two national organizations believe, and it is of great importance that this idea be thoroughly understood by the local workers in both, according to John Barton Payne, chairman of the American Red Cross, and Dr. Alexander Miller, president of the National Tuberculosis Association.

The official statement of the two organizations follows:

1. There is no official connection between the campaign of the National Tuberculosis Association and that of the American Red Cross.
2. There is to be no use of the Red Cross emblem by the National Tuberculosis Association.
3. The title of the American Red Cross is not to be used in the sale of Tuberculosis Seals.
4. The dates of the American Red Cross Roll Call are to be November 11th to November 30th, inclusive; and the National Tuberculosis Association's sale of seals begins December 1st and continues until January 1st.

Pernicious Teaching of The K K's

TO ALL CITIZENS OF THE UNITED STATES:—
GREETING:

Whereas it has been brought to our attention that there is concerted and organized effort now under way in this country to break down our existing order of Government, to bring about social and political chaos, and to displace the Christian ideals, standards and traditions handed down to us by our Forefathers, who were the founders of this Republic; and

Whereas such revolutionary movements as Bolshevism, Socialism, Syndicalism, I. W. W. ism, Liberalism and Nationalization are contrary to the fundamentals of our Democratic form of Government; and

Whereas all of these movements are gaining headway in this country and thereby jeopardizing the best interests of the American people; therefore,

Be It Resolved that this Klan in regular Klunklave assembled hereby condemns all such revolutionary

movements and pledges itself to take an active part in combatting the sinister influences, propaganda and growth of all such movements; and

Be It Further Resolved that this Klan pledge its whole-hearted support to national headquarters of the Knights of the Ku Klux Klan and to all fellow Klansmen in ridding our beloved Republic from the curse of these elements of disorder; and

Be It Further Resolved that a copy of these resolutions be forwarded to our Imperial Wizard and to our local newspapers.

READ AND ADOPTED THIS 14TH DAY OF NOVEMBER NINETEEN HUNDRED AND TWENTY-TWO.

EXALTED CYCLOPS.

Those Who Seek The Truth

ALLIES SEND SHARP NOTE TO GERMANY

Paris, Nov. 13.—The allied Council of Ambassadors today presented a severely worded note to the German Embassy in which an immediate apology is demanded for the recent incident at Nassau, Barvaria, and several previous disturbances.

The text of the note was not given out, but is understood to be one of the sharpest ever sent by the allies on the subject of Germany's attitude toward the military control exercised under the treaty of Versailles. It makes clear that Germany cannot expect withdrawal of the control commission for a long time unless the policy of evasion and interference "ceases at once."

In the Nassau incident two allied military officers were attacked by a mob while attempting to search a Reichswehr barracks for arms.

PENNSYLVANIA AT TOP OF LIST IN HEADS OM HOUSE.

Washington, D. C., Nov.—Pennsylvania, with seven, will top all the States in big house committee heads in the new Congress, unless the seniority rule is abrogated.

All told there are 60 standing committees, but some of them have little to do with important legislation. The seven important chairmanships which Pennsylvania is expected to have are: Banking, Claims, Foreign Affairs, Judiciary, Naval, Post Office, a gain of two.

Iowa will have four—all big ones. They are: Ways and Means, all powerful of itself; Roads, Agriculture and insular affairs, although Chairman Townier of the latter could relinquish control there to take Education, lost to Ohio through the shift of Representative Fess to the Senate.

MOTION IS FILED IN MAYFIELD CASE

Austin, Texas Nov. 13.—Motion for withdrawal of the writ of error pending in the supreme court, filed by Luther Nickels and others, protesting the action of the fifth court of Civil appeals at Dallas in acting upon the Groesbeck injunction suit, in which Secretary of State Staples was enjoined from certifying Earle B. Mayfield as democratic nominee to the office of United States senator, was filed in the supreme court here Monday.

This action is understood, is being taken by the anti Mayfield forces in order to clear the courts of all litigations in connection therewith. It is understood however that the fight against the seating of Mayfield will be continued in the senate.

The motion filed Monday will be acted upon next Wednesday, the regular hearing day in the supreme court.

SUPER X-RAY IS DEMONSTRATED BY A NOTED DOCTOR

New York, N. Y., Nov. 13.—The first public demonstration of Columbia university's new super X-ray machine with which it will be possible to measure the ray used in the treatment of cancer and other diseases, was given yesterday, by Dr. Frances Carter Wood director of the University's institution of research as part of national cancer week which began Sunday.

Guinea suffering from tumors were used as "patients." They were heavily jacketed with lead save for the part to be X-rayed. The machine, said to be the largest and most powerful in the world, has a voltage of 200,000 and is so powerful that pictures of the bones of the hand may be taken 300 feet away.

OBJECTION RAISED TO ANTI ALIEN LAW PROPOSED.

Paris, Nov. 13.—Various foreign States, will it is understood, make Governments, including the United diplomatic representation to France against the bill proposed to forbid foreigners to hold real estate in France.

The proposed law, it is pointed out, appears to be in contravention of the treaty of 1853 between France and the United States.

The purpose of the measure was generally is to carry out the desire of the French parliament to prevent Germans from establishing themselves in France.

CLEMENCEAU CAUSES TOURIST TO ARISE EARLY.

13.—Almost every passenger aboard the steamship Paris is honoring the maxim, "early to bed and early to rise," in order to watch Georges Clemenceau take his early morning walk on the decks. The former French premier gets out of bed at 5 o'clock paces up and down the ship awhile and then goes back to his cabin.

At dawn on Monday he was up in the bridge watching the sun rise. He intimated that he could not attend the ship's concert Thursday evening, preferring not to break his custom of re-

tiring at 8 and rising at 5. When this information was whispered about the ship there was much disappointment, as everyone had been confidently expecting that he would talk to the passengers at the Thursday evening rendezvous.

MADE HOLE IN JAIL DOOR; GOT CAUGHT IN IT

Lubbock, Texas Nov. 13.—An attempt to follow four of his fellow prisoners in an escape from the Lubbock county jail Sunday morning nearly resulted in the death of H. W. Spradling when he became caught in the hole through with which others had made their getaway. Two of the prisoners, a negro and a Mexican were later recaptured.

Shorty Hunter, convicted of larceny and T. A. Smith, who was awaiting trial on a larceny charge, are still at large.

Hunter it was said, was responsible for a jail delivery. He sawed a hole through a steel door permitting him and his three companions to escape, but Spradling became lodged in the opening and was finally abandoned by his companions, when they were unable to pull him through. He was nearly dead when found by the jailor.

\$8,000,000 FINE UPHELD BY HIGHER COURT

Jackson, Miss., Nov. 13.—The State supreme court approved the findings of a lower court in the Mississippi anti fire insurance case, in which penalties aggregating \$8,000,000 against some 60 organized fire insurance companies, were assessed.

The justices of the supreme court were divided, three for affirming, and three for reversal, and the case stands affirmed.

Notice was served that the case would be carried to the supreme court if the United States.

College Station, Texas.—A special tractor and farm machinery course will be given at Agricultural and Mechanical College here on January 8 to 20 by the department of engineering.

Temple, Texas.—An ordinance just enacted by the city commission imposes restrictions upon the operation of intercity motor bus lines that practically limits them to side streets and prevents solicitation of business on business thoroughfares. Regular jitney lines operating within the city are not affected by the ordinance.

CONSTABLE SHOT AND KILLED ON EVE OF HIS RETIREMENT

Carutherville, Mo., Nov. 13.—Matt Stubblefield, 45 years old, a constable was shot and killed here last night by Ben Wade, a grocer, during a prohibition raid. Other officers in the raiding party seriously wounded Wade. Constable Stubblefield was to have relinquished his office to a successor today.

CASE AFFECTING 20,000 EX-SOLDIERS ADVANCED.

Washington, Nov. 13.—A precedent affecting 20,000 or more former service men and involving from six to eight million dollars, will be laid in a case which the supreme court today advanced for hearing on February 19. The case was brought by the government against Nelson W. Rider and involved the construction of certain sections of appropriation acts fixing the pay of enlisted men in training for officers of the reserve corps.

RAILROAD YARD GUARDS AT FORT WORTH DISMISSED.

Austin, Texas, Nov. 3.—State Railroad Commissioner Clarence E. Gilmer left today for Washington to represent Texas at the hearing before the interstate commerce commission on November 20 on application for increased express rate. He will attend the annual meeting of the National Association of Railway and Utility Commissioners at Detroit as representative of the Texas commission.

NOTICE!

This is to give notice to the public that cotton receipt No. 44659, issued in the name of Ford and Thigpen on the 19th day of October, 1922, by the Cameron Compress Co., for One Bale of Cotton delivered by them to that Company, has been lost, and that the undersigned is the legal owner and holder of said cotton, and the public is warned not to accept said receipt or to deal with same in the hands of any other person.

DECISION RULES AGAINST RIGHTS TO CITIZENSHIP

Washington, Nov. 13.—Japanese are not of the "white" race and under Federal laws are not entitled to citizenship by naturalization, the United States Supreme Court decided today.

The opinion of the court set at rest a vigorously contested dispute which arose on the Pacific Coast and which has waged there for years.

Associate Justice Sutherland delivered the decision of the court, it being his first opportunity since becoming a member.

The court held that the Federal statute limiting citizenship to free white persons and Africans or those of African descent had not been repealed or modified by any subsequent legislation and that Japanese are not of the Caucasian race.

The court affirmed a decision by the Washington state courts holding this opinion.

In another decision the Court also affirmed a decision of Washington state courts denying to Japanese articles of incorporation for a Japanese real estate holding company on the ground Japanese were not entitled to citizenship by naturalization.

GERMANY TO MAKE LOAN PROPOSALS

Berlin, Nov. 13.—The German cabinet, according to the Ahtuhr Abendblatt has decided to make new proposals to the allied reparations commission based on the readiness of the Reichbank to participate to the extent of several million gold marks in an international loan to stabilize the mark.

DEMOCRATS WIN BY MARGIN OF 1 IN PENNSYLVANIA

Washington, Pa., Nov. 13.—Unofficial returns were upst today when the official count showed G. B. Sprowls democrat, the winner by one vote. Col. J. E. Barnett, republican, was returned the victor in the unofficial count. Sprowls is credited with 12,766 and Barnett with 12,765.

COME TO Cameron DR. MELLENTHIN

SPECIALIST
in Internal Medicine for the past eleven years.
DOES NOT OPERATE
Will be at
AUDITORIUM HOTEL
Saturday, December 9th.
Office Hours: 10 a. m. to 4 p. m.
ONE DAY ONLY.

No Charge for Consultation.
Dr. Mellenthin is a regular graduate in medicine and surgery and is licensed by the state of Texas. He visits professionally the more important towns and cities, and offers to all who call on this trip free consultation, except the expense of treatment when desired.

According to his method of treatment he does not operate for chronic appendicitis, gall stones, ulcers of the stomach, tonsils or adenoids.

He has to his credit wonderful results in diseases of the stomach, liver, bowels, blood, skin nerves, heart, kidney, bladder, bedwetting, catarrh, weak lungs, rheumatism, sciatica, leg ulcers and rectal ailments.

If you have been ailing for any length of time and do not get any better, do not fail to call, as improper measures rather than disease are very often the cause of your long standing trouble.

Remember above date, that consultation on this trip will be free and that his treatment is different.

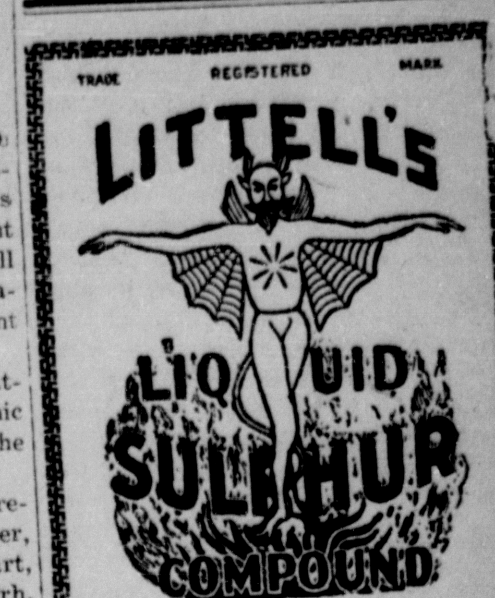

Married women must be accompanied by their husbands.
Address: 336 Boston Block, Minneapolis, Minn. 29-3tp

SAYS NEXT CONGRESS WILL PASS BONUS BILL

Washington, Nov. 13.—Confidence that a soldier's bonus bill would be enacted by the congress which comes into existence after next March 4,

was expressed today by John Thomas Taylor, legislative representative of the American Legion, in a statement which declared the election demonstrated that the sentiment of the country was behind compensation legislation.

Grove's Tasteless CHILL Tonic
restores vitality and energy by purifying and enriching the blood. You can soon feel its strengthening invigorating power.

It is a powerful and scientific combination of sulphur and other healing agents for the relief and cure of diseases of the skin. It is especially effective in the ITCHING VARIETIES; giving instant relief from the itching and smarting sensations and by its germ-destroying properties it exterminates the microbe which is the cause of the eruption, thus curing the disease completely. Little's Liquid Sulphur Compound is used in all cases of Eczema, Tetter, Barber's Itch, Psoriasis, Herpes, Rash, Oak and Ivy Poisoning, also for relieving the annoyance caused by chiggers and mosquito bites. In the treatment of ECZEMA—the most painful and obstinate of all skin diseases—it is one of the most successful remedies known. Small size 50 cents bottle. Large size \$1.00. JAMES F. BALLARD, Prop. St. Louis, MO.

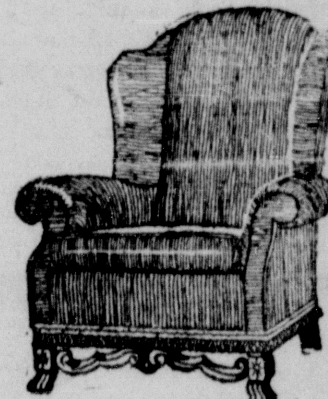

Christmas Is Just A Few Weeks Off

Make your selection now while the stocks are complete. We have many pieces in the furniture line bought especially for Christmas Gifts. Also have a full line of toys for the children We invite you to give our store a visit.

Royal Easy Chairs---

This is a present that any man would appreciate. They make a fine rest or reading chair. Are easy to adjust to any position you wish to be, by simply pressing the button. Buy one now for his Christmas Gift.

If you have never seen a Royal Easy Chair, come in and let us show them to you.

Hoosier Cabinets---

Nothing would make a better present for the housewife. They will give her 365 days of pleasure every year, because they cut the daily work into.

Buy one today, we will send it up Christmas eve. We have them in solid white enamel finish or oak finish.

The YOEMAN'S PAGE

A SENIOR'S SURVEY OF THE SCHOOL SITUATION.

By Mildred Y. Moore.

Next Saturday tags will be sold for the benefit of the Yoe High School Library Fund. Every patron of the school and every loyal citizen of Cameron should wear a tag. Show your appreciation for our well equipped high school by making a small donation, which will go toward placing more books in the high school library.

The characters of a group of people may be easily judged by glancing through their library. Thus we can tell what a family really is by the books which we find in the home.

We go into the home, say, of the Browns. The family library consists of such volumes of those commonly known as "dime novels," a few "best sellers," perhaps of volume of Shakespeare, mouldy from disuse, and an accumulation of magazines and periodicals. What sort of people do we expect the Browns to be? Thriving? Industrious? Studious? But, no. They are inclined to be self-satisfied, complacent people; not slovenly, but just careless, and certainly not well-read.

Next we go into the home of their neighbors, the Smiths. We find the complete works of Shakespeare, some old Greek classics, and other old volumes, fairly reeking with antiquity. How would we characterize the Smiths? One would judge them—to use a popular expression—to be rather "high-brows" the kind which looks down on the multitude from heights of learning; rather condescending, even to their most intimate friends.

Now we enter the home of the Joneses. We find volumes of Browning, Shelley and Keats; a rare old "First Edition" of some forgotten author; the reprint of a famous manuscript. Our interest is aroused. On looking further we find copies of the best English classics; next, a popular novel of the day—not just an ordinary one, but one well chosen. We also find some choice source books of history, treatises on science, and some good biographies. To show that the Joneses keep up with the thought of the day, we find perhaps a small volume of Amy Lowell's works, or of Chicago's poet, Carl Sandburg. Already we have formed our opinion of the Joneses. They are thoroughly modern, yet keenly appreciative of the old gems of our literature. They keep well abreast of the times, yet love to meditate on the society of the past generations. One would expect the Joneses to be awake to the great problems of the day; kind of people that determines the trend of civilization.

Our Yoe High School Library resembles the library of the Joneses. In our library are found the best and latest collection of history books, and our collection of English literature is equally as complete. Volumes of sociology, astronomy and science line the shelves. To make the library more thoroughly up-to-date we have the best modern fiction, the latest discussions on science and much valuable material on the disappearing frontier of our nation.

But there are many more books which we need. We have a choice collection, but it is small. We need more books for our library, and we want you to help us buy them. To you, it will mean the gift of a mere piece of silver; to us, it will mean a priceless treasure in books.

Tag Day, Saturday the 18th. Buy a Tag.

ARMISTICE DAY.

Friday morning, November 10, the pupils of the Yoe High School and the Grammar School met in assembly in the Yoe High auditorium to commemorate the fourth anniversary of the signing of the Armistice. Patrons of the school were guests for the occasion. The program was as follows.

Invocation—Rev. H. R. McFadyen.

Chorus—America.

Speech—T. S. Henderson, Jr.

Chorus—Marsellaise.

Speech—J. B. Baskin.

Chorus—Star Spangled Banner.

Benediction—Rev. R. C. White.

The faculty and students of the Yoe High School greatly appreciate the attendance of the patrons of the andwinesincerely hope that shrdluupupp school at our little memorial service and we sincerely hope that oftener in the future they may see fit to join us in our activities.

CAMERON DEFEATS ROCKDALE.

Revenge is sweet and twelve months is a long time to wait to get it, but the time had come and the Yoemen

didn't fail to get it. The Yoemen won the flip and chose to defend the south goal. The Rocks chose to receive. According to the first quarter seemed evenly matched and neither eleven made any large gains. In the last part of the first quarter the City was dampened by a heavy shower, but only affected the spectators, who were forced to find shelter. The teams continued playing; the Regal City was doomed to defeat. Terrific line-plugging and end-runs brought the pig skin to the shadow of the Regal's goal. Only by the heavy downpour kept the Yoemen from registering a score. Playing through the second quarter of rain, the second half ended 0 to 0, in favor of the Yoemen. In the third quarter the locals kicked off and for some reason the Regals opened up a series of passes in the shadow of their own cross-bars. In that series of ambitious aerial attacks their last one was interested by one of the Yoemen's sub-halves, Joe Hefley, who by perfect interference raced forty-five yards for the initial touchdown. This was the last of the scoring for the Yoemen, although prospects along the last of the game were more than favorable. In the last period the opponents cried, "kamerad," but the Yoemen ears were deaf to the plea; it was too late. Yoemen ears were resolved for victory. It was a test in strength and in school spirit, and the Yoemen were superior in both. To point out the stars the most just method would be to name the entire eleven and all substitutes, for all played a wonderful style of foot ball. For the Regals, there were none, according to the editor's idea or the or the reporter's. The Yoemen simply out-classed and out-smarted them and they should not have any regrets, for the two teams weighed about the same. A large crowd from Rockdale, Cameron and Thorndale witnessed the tilt. The game was officiated by former University men Coach Hughs and his crew of crumples should thank the God Pluvius for sending them rain.

The line-up was as follows:

Rockdale—Hal Lyons, end.

Thomas right tackle.

Smith right guard.

Ashby center.

W. Shribner left guard.

Rolan left tackle.

E. Shribner left end.

Joe Green quarter.

A Rosenberg right half.

W. Blackburn, left half.

Dymkle full back.

Substitutes—Caldwell for Smih.

Cameron—Willis right end.

Taylor right tackle.

Thompson right guard.

Joynes center.

Yoe left guard.

Dusek left tackle.

Watson left end.

McGregor quarter.

Baggett right half.

McCall left half.

Green full back.

Substitutes—Hearrell for Taylor,

Ely for Thompson, Flinn for Yoe,

Helfey for McCall, Childress for Baggett.

The game play by play:

Cameron wins the toss and chooses

to defend the south goal. Taylor for

Cameron kicks off 45 yards. Greene

returned 15 yards. Rockdale's ball

on her own 30 yard line. Blackburn

made 1 yard around left end. Rosen-

berg made 11 around right end for

first down. Rosenberg made 2

around left end. A pass, Blackburn

to Lyons was grounded. Blackburn

made 1 around right end. Blackburn

kicked 35 yards and McCall returned

2. Green hit center for 2 yards.

Baggett made 8 over center and

made the first down. Baggett sous-

ed right tackle for 9 yards. McGregor

smeared right tackle for 3 and first

down. Green made 4 over left

tackle. McGregor made 1 over right

tackle. Cameron was penalized 5

yards for offside. Cameron drew

another 5 yard penalty for offside

Taylor kicked 44 yards, Greene for

Rockdale returning 15. Dymkle fum-

bles but recovers. Rockdale's ball on

11 yard line. Rosenberg fails to

gain around left end. Blackburn

makes 7 yards around right end.

Blackburn kicks 25 yards. McCall

returns 8 yards but fumbles, Rock-

dale receiving, on her own 22 yard

line. Rosenberg made 5 around left

end. Dymkle loses 3 around right

end. A pass, Blackburn to Lyons was

intercepted by McCall who was

downed in his tracks. Green made 2

over center. McCall gained 11

was penalized 5 yards for being off

sides. Green hit center for 2. Mc-

Gregor hit center for 5 yards. Green

kicked 30 yards. Rockdale failed to

return. Rockdale's ball on her 4 yard

line. Blackburn kicked 40 yards. Mc-

Gregor returning 13 yards. Amidst

a heavy shower Cameron brings the

ball up to Rockdale's 3 yard line.

Rockdale holds Cameron for downs,

Blackburn kicking 30 yards out of

danger. Cameron's ball on Rockdale's

30 yard line. Quarter up. Score:

Cameron 0, Rockdale 0.

Second Quarter—Cameron's ball on

Rockdale's 30 yard line. Baggett

fails to gain around left end. Green

fumbles on a line buck. Rockdale re-

covering. Blackburn fumbles, Willis

recovering for Cameron. McCall

skidded 7 yards past left tackle. Mc-

Gregor slid thru center for first

down. McCall hit center for 4 over

guard. McCall hit center for 2 yards

and first down. Baggett made 3 yards

over center. McGregor made 1 over

center. McGregor hit center for 3

yards. Ball goes over. Blackburn

kicked 25 yards. McCall failed to

return. Green got his mud chains to

working and smeared center for 6.

Green hit center for 4 more and first

down. McCall made 1 over center.

McGregor made 4 over right guard.

Green fumbles, Rockdale recovering

ball on her own 20 yard line. Rosen-

berg made 4 over center. Dymkle

lost 2 over right tackle. Blackburn

kicked 22 yards. Baggett returning

9. Half up. Score: Cameron 0 and

Rockdale 0.

Second half, Third Quarter.—Black-

burn kicks off 25 yards. Green re-

turning 8 yards. Green ploughed

thru center 7 yards. McGregor hit

center for 3 and first down. Chil-

dress lost 10 around right end. Chil-

dress smears center for 6. Green

lost 10 on a fumble. Green kicked 35

yards. Rockdale returning 6 yards.

Rockdale's ball on her 30 yard line.

Pass, Blackburn to Lyons nets 12

yards and first down. Rosenberg

circles left end for 3. Green smears

Togo for 7 yards, and first down.

Hefley intercepts Blackburn's pass

and sprints 55 yards for a touchdown.

McGregor fails to kick goal. Taylor

kicks off 35 yards. Rosenberg re-

turning 15. Blackburn hits Joynes

for 7 yards. J. Green hits center for

3 and first down. Blackburn fails to

gain over center. Rosenberg fum-

bles, but recovers for a 1 yard gain.

Green hits right guard for 6. Green

gains 2 yards over center. Green hits

center for 2 and first down. Rosen-

berg circles right end for 1 yard.

Dymkle plunges 5 thru right tackle.

Blackburn loses 1 around right end.

Blackburn kicks 18 yards. McCall

returning 2 yards. Baggett made 2

around right end. McGregor gained

2 around right end. Green hit left

tackle for 4 yards. McGregor makes

2 thru right tackle for first down.

McGregor smeared center for 4 yards.

Green thru center for 4. Watson

gains 1 around left end. McCall hit

left tackle for 4 yards and first down.

Green asked right guard for 3 and got

9. McGregor plunges Ashley or 2

and first down. Baggett asked right

tackle for 4 yard and takes it. Mc-

Gregor dived over left tackle for 3

yards. Baggett throws mud in right

tackles eyes and slips by for 2 yards

McCall maneuvers his tug boats for

2 yards thru right tackle and first

down. McGregor goes 2 over center.

Green hit left guard for 2.

Quarter up. Score: Cameron 6 and

Rockdale 0.

Fourth Quarter—Green penalized 5

yards for crawling. McGregor kicks

15 yards. Rockdale returns 0. Rock-

dale's ball on her 12 yard line. Cam-

eron blocked Blackburns kick and

McGregor recovers ball on 20 yard

line. McCall lost 8 around left end.

McGregor hit center for 1 yard.

Green kicks 10 yards, Rockdale re-

turns 5. Rockdale's ball on her 22

yard line. A pass, Blackburn to

Lyons nets 8 yards. Rosenberg hit

right guard for 3 yards and first

down. Rosenberg asked right guard

for 10 yards and gets nothing. A pass,

Blackburn to Scribner netted 6 yards.

A pass, Blackburn to Scribner was

grounded. Blackburn kicked 25

yards and Baggett returns 15. Mc-

Gregor hits left guard for 2 yards.

McCall goes 4 yards over right tackle.

McCall jack knifed 5 yards over center

and lands in the lake, first down.

McCall lost 4 yards around left end.

Green asked right tackle for 5, took

7. McCall dived under right guard

for 5 yards, first down. Cameron

penalized 5 yards because the back

field was in motion before the ball

was snapped. Green kicked 20 yards.

Rockdale failed to return. Rock-

dale's ball on own 20 yard line. A

pass, Blackburn to Lyons was ground-

ed. Blackburn kicks 30 yards. Mc-

Gregor returns 5 yards. Cameron's

ball on own 45 yard line. McCall

fails to gain around left end.

McCall wades 3 yards around left

end and finally bogs up, first down.

Baggett made a beautiful swan dive

over left tackle for 7 yards. Mc-

Gregor hits left tackle for 2 yards.

McCall smeared left end for 15 yards

and first down. Cameron's ball on

Rockdale's 15 yard line. McGregor

hit Ashbey for 3 yards. Green made

3 over center but Cameron is penali-

zed 5 yards for being offside. A

pass, McGregor to left end was

grounded. Rockdale's ball on her own

15 yard line. A pass, Blackburn to

Scribner was grounded. A pass,

Blackburn to Lyons was grounded.

Blackburn kicked 20 yards out of

bounds. Game over. Score: Cam-

eron 6 and Rockdale none.

HUSBAND SLAYS OTHER MAN AT STORE DOORWAY.

Fort Worth, Texas, Nov. 13.—A. C. Glenn, 32, of Forest Hill, a suburb, was shot six times at 5:30 o'clock Monday afternoon and died in an ambulance en route to a hospital.

The shooting occurred in the doorway of a local department store in the heart of the downtown business district.

H. B. Green, also of Forest Hill, was immediately taken into custody and charged with the killing. He was taken to the district attorney's office, where he made a statement in which he declared that he had "caught Glenn kissing my wife."

Glenn and Mrs. Green were found not guilty of adultery recently.

The shooting drew thousands to the scene, the streets being jammed with those on their way from work and traffic was congested for half an hour.

</

SHEPPARD FORECASTS
ANTI-DRY DEFEAT

Dallas Texas, Nov. 12.—Reduction of taxes and limitation of armament will be the leading issues taken up by the new Congress when candidates elected in the recent election take office, in the opinion of Morris Sheppard, junior senator from Texas, who arrived in Dallas, Saturday to visit his sisters, Mrs. Cullen Thomas, and Mrs. W. F. Skillman.

Among other things the new congress will do will be to unseat Senator Newberry, to repeal the Esch-Cummins railway bill and to pass a soldier bonus measure, according to Senator Sheppard. He thinks no attempts will be made to repeal the Volstead act to otherwise modify the prohibition laws. The result of the election is not, in his opinion, a victory for the "wets." The prohibition forces he said, still hold a big majority. Senator Sheppard declared the election is fully recognized victory for the democrats and means that chances are very good for the election of a Democratic President.

Senator Sheppard, who has been ill recently, stated that his health is improving. He intends to stay in Dallas several days and return to Washington for the special session that has been called by President Harding. All new issues, he said will be held over for the new congress.

"The democrats have gained a great victory, and have increased their power not only through election of Democrats, but by disaffection in the ranks of the Republicans," said Senator Sheppard. "A number of the Republicans in the new congress have radical tendencies and will vote with the democrats on some of the main issues."

So far as the Texas Senatorial race is concerned, Senator Sheppard said he could not comment on it.

"I don't know all the issues in the case and not qualified to discuss them he said.

"The prohibition act is safe so far as the result of the election is concerned," he stated. "Before the election the dries had a majority of about three to one and that majority has not been changed very little if any. While Volstead himself was defeated, his defeat will not affect the prohibition issue, for the man who beat him is also a "dry."

"The revival of the Democratic party is not caused by the Wilson supporters or any faction. It is simply a victory for the Democratic party as a whole. My opinion is that McAdoo is now the strongest possibility for President, although there are others, including Smith of New York and Governor Cox.

COUNTY JUDGE AT
EASTLAND WINS SUIT

Sustaining the action of the trial court in refusing to oust County Judge C. R. Starnes and County Commissioners E. H. Webb, J. W. Camp and M. G. Robertson of Eastland County, a judgment was handed down here Saturday by the Second Court of Civil Appeals.

The case originally filed at Eastland was transferred to Parker County on a charge of venue. In Parker

County it was held that in as much as the County Attorney had not joined in the quo warranto proceedings against the officials which alleged "Official misconduct" such proceedings were illegal.

According to records of the second court of Civil Appeals, those who filed and prosecuted the suit were Briggs Owen, P. G. Wright, J. R. Higgins, Col. H. Smith, W. C. McGough and J. E. Kuykendall, all of whom are Eastland County taxpayers.

Citing the opinion recently rendered by the Supreme Court of Texas in the Earle B. Mayfield injunction from Corsicana, the judgment says that it is unnecessary for the County Attorney under the Texas statute to join in quo warranto proceedings against any official before he can be removed legally.

LIGHTNING SETS MILLION
BARRELS; MORE IN DANGER

Three tanks already are burning and the whole Gulf Production company farm of 20 tanks is threatened by a spectacular fire in the Humble field. Lightning struck a tank shortly after 5 p. m. and started the blaze.

Six tanks are right together in this farm and it is said no hopes are held for saving any of them. More than 2,000,000 barrels of oil will be destroyed if the farm burns.

The farm is built into the ground and rain during the day is forming an artificial lake over which the boil-

ing and blazing fire is traveling rapidly toward the tanks.

Late reports said that more than 1,000,000 barrels of oil already were burning. The underground tanks hold 400,000 barrels of oil each. Heroic efforts are being made to pump oil from the other three tanks in the immediate vicinity of those on fire.

THE STATE OF TEXAS.

To the Sheriff or any Constable of Milam County—GREETING:

You are hereby commanded to cause the following notice to be published in a newspaper of general circulation which has been continuously and regularly published for a period of not less than one year preceding the date of the notice in the County of Milam State of Texas, and you shall cause said notice to be printed at least each week for the period of ten days exclusive of the first day of publication before the return day hereof:

NOTICE OF APPLICATION FOR
PROBATE OF WILL.
THE STATE OF TEXAS.

To all persons interested in the Estate of J. P. Woodall, deceased, notice is hereby given that Mrs. Lena B. Woodall has filed in the County Court of Milam County, an application for probate of an instrument in writing purporting to be the last will and testament of said J. P. Woodall, deceased, which will be heard at the

so.

Herein fail not, but have you then and there before said Court this Writ, with your return thereon endorsed, showing how you have executed the same.

Given under my hand and the seal

of said Court, November 13, A. D. 1922.

WILL T. YATES,

Clerk County Court Milam Co., Tex.

A GIRL'S FACE IS HER
FORTUNE

Because it is the greatest of all womanly charms, a skin which is fresh, smooth, and alluring with the radiance of health, predicts a happy future.

Don't be content to have a listless, sallow and blemished complexion—begin at once to remedy these defects.

Every girl can have a beautiful attractive skin if she will only learn to give it proper care.

Thorough cleansing with a fine mild soap once a day, is the secret. Coldcream is beneficial when applied to a clean skin, and rouge and powder are harmless beautifiers—but start clean every day on a clean foundation.

Keep your skin active and it will be clear, fresh, youthful and attractive.

Soap to be thorough need not be harsh. The mildest toilet soap is the most thorough of cleansers, as you will know after you try Palmolive.

Its mildness and thoroughness are due to the same cause—the scientific blending of Palm and Olive oils, the natural cleansers discovered thousands of years ago in ancient Egypt and made use of by Cleopatra.

Palmolive freshens, livens and stimulates the skin, leaving it delightfully fresh and rosy.

You can buy Palmolive Soap at all first class groceries and drug stores.

"Let me carry KELLOGG'S, Jack! I say I will! Mother said you could buy KELLOGG'S, but I could carry 'em home! I say I will—I will!"

Our word for it!
*You'll never know how delicious
Corn Flakes can be till you
eat Kellogg's*

Positively—the most joyously good any-time-cereal any man or woman or child ever put in their mouths! Such flavor, such crispness! Such big sunny-brown Corn Flakes! How you'll relish a generous bowl-filled-most-to-overflowing; and a pitcher of milk or cream!

Never was such a set-out! Never did you get such a universal vote as there'll be for Kellogg's Corn Flakes! Big folks and little folks will say "Kellogg's, please, mother!" Leave it to their tastes—and yours! Prove out all we say!

For, Kellogg's Corn Flakes are a revelation in flavor; a revelation in all-the-time crispness! Kellogg's are never tough or leathery or hard to eat! Insist upon KELLOGG'S—the original Corn Flakes—the kind in the RED and GREEN package!

SOCIETY and Club

By MISS DELPHIA SCOTT

THE MAN WHO DOES HIS DUTY WELL.

The man who does his duty well need ask no odds of anyone, For he can face the whole wide world and pay his way and travel on; There may be richer men than he, and greater men who've come to fame, But richer man or greater man cannot excel an honest man.

The man who does his duty well and gives his best to every task Has given all in service here that life of any man will ask; The man of talent may excel the humbler hand in point of skill, But should he grow too proud to toil, the genius is a failure still.

The final test of life is not the distant heights that man has reached, The captain's reputation fades if once the ship he sails is beached, And he who rises high to fame may come at last some day to see That humbler men by patient toil have lived far nobler lives than he.

There are degrees of skill and fame; not all men's learning is profound, But honesty is honesty no matter whereso'er it's found, And he who does his duty well, is honest, faithful, clean and true, Is doing in life's real tests all that the genius can do.

—G.

HISTORY CLUB.

Mrs. S. A. Cottle very charmingly entertained the History club Tuesday afternoon from four to six o'clock.

The reception suite was beautifully decorated with autumn leaves and Paul Neron roses which made a scene of very delightful hospitality.

Miss Amelia Williams was the efficient leader for this occasion. Mrs. T. J. Denson read an interesting paper on "Could a woman be a successful home-maker and a business woman at the same time" and was enjoyed by all present. Mrs. A. N. Green paper on the "Armenian Relief" was a subject dear to the heart's of all present, and was well handled.

The hostess, assisted by Mrs. Alex salad course consisting of Jelly Triggs, served a most refreshing Chicken, Bread and Butter sandwiches Crackers and hot tea. Plate favors were miniature artificial autumn leaves.

Besides the club members present there were the following guests: Mesdames W. A. Bonds, Ira F. Key, Vernon McIntire, of Marathn, W. L. Ledbetter, of Dallas, Alex Triggs, G. C. White and Claude Triggs.

The Club will hold its next meeting with Mrs. T. J. Denson on Hefley Heights.

PRESBYTERIAN AUXILIARY

The members of the Presbyterian auxiliary did not have their regular meeting at the church Monday afternoon of this week, but instead gave an hour each day to Home Mission visiting upon the sick, shut-ins, etc.

Their pastor, Rev. McFayden, was to have given a lecture each evening at the church at 7:30 o'clock on Home Mission Work, but owing to bad weather has been prevented. The weather permitting, there will be a talk each evening hereafter this week at the church along this line. A cordial invitation is extended to any who wish to attend.

WEST-BURKE.

The marriage of Miss Eva West to Mr. Otis Burke was solemnized last Thursday evening, November 9th at 8:45 o'clock at the First Baptist church, Rev. R. C. White reading the impressive ring ceremony.

The wedding had been kept very quiet, only members of the families and a few close friends were invited.

Miss Cordia West, sister of the bride, and Miss Lucile Gregory were the bridesmaids, and came in with Mr. Joe Burke, brother of the groom, and Mr. Leland Burke, cousin of the groom. Mrs. Jeff T. Avera presided at the piano, and in her own charming manner, rendered Lohengrin's Wedding March for the processional, softly playing Schubert's Serenade during the ceremony, and Mendelssohn's Wedding March for the recessional.

The bride was pretty in a becoming gown of midnight blue crepe with

shower bouquet of white roses. The bridesmaids looked charming in dainty gowns of pale pink crepe and carried bouquets of white roses.

After the ceremony the happy couple received their friends at the home of the bride's aunt and uncle, Mr. and Mrs. J. C. Mayfield.

Mr. and Mrs. Burke will make their home in Cameron, and have the good wishes of countless friends.

BAPTIST AUXILIARY.

Circle No. 1 met with Mrs. M. G. Cox for Bible study with Mrs. L. B. Arnold as leader. There were four present. Circle No. 3 met with Mrs. Ed Adams with lessons on Bible study. Standing committees were appointed for the ensuing year. Attendance was small owing to the bad weather. Circles Nos. 2, 4 did not meet owing to bad weather.

LITTLE SEWING CLUB.

The little sewing club will hold its next meeting Saturday afternoon with little Miss Henriem Hefley.

This little club was organized for the purpose of the members to become efficient in needlework, and also to spend their Saturday's in social pastime.

The club is composed of the following members: Little Misses Henriem Hefley, Katherine McIntosh, Beulah Collier, Madie Watson and Jan Tyson.

METHODIST MISSIONARY.

Last Monday afternoon Mesdames R. L. Batte, Sr., and Mack Harvey were joint hostesses to the Methodist Missionary society at the home of Mrs. Batte.

The hour was given to Mission study after which the following musical program was rendered:

Vocal Solo—Mrs. J. L. Clinton.

Piano Solo—Mrs. Ira F. Key.

Vocal Solo—Mrs. Mack Harvey.

Each number was greatly enjoyed by all in attendance.

The hostesses served an appetizing salad course to a goodly number of members.

ST. RITA'S CIRCLE

The St. Rita's Circle met last Thursday with Mrs. Ralph Michalka. There were 19 members present. The circle planned to give a box supper at the old church hall Nov. 22nd.

After the business meeting Mrs. Michalka served coffee cake with coffee. The next meeting will be held with Mrs. F. C. Fahrendorf, November 23rd.

A pleasant party composed of Mrs. T. S. Henderson Sr., Misses Ada Henderson, Winnie Henderson, Ruth Henderson and Sallie Kate McLane motored to Belton last Saturday and was accompanied home by Miss Katie Henderson who teaches in Baylor College.

Misses Rose Rischar, Annie Lorenz, Marie Lorenz and Mrs. B. P. Motocha spent last Sunday in Taylor and were initiated in the Catholic Daughters of America.

Dr. Lukovsky, of Omaha, Neb visited in the home of Mr. and Mrs. B. P. Matocha last Friday.

DR. W. W. GREER IMPROVING.

It is with pleasure that we report to the many friends of Dr. Greer who has been a resident for some weeks in Scott and White's Hospital, that he has improved to the extent he is able to be wheeled out upon the lawn at the hospital. His daughter, Miss Lola, is with him and has been since the beginning of his illness.

Mr. Irvin Clary and Miss Mabel Jeter motored to Temple Saturday and spent the day with their friend, Miss Lola Greer.

SULPHUR SOOTHES UGLY, ITCHING SKIN

The First Application Makes Skin Cool and Comfortable

If you are suffering from eczema or some other torturing, embarrassing skin trouble you may quickly be rid of it by using Menthos-Sulphur, declares a noted skin specialist.

This sulphur preparation, because of its germ destroying properties, seldom fails to quickly subdue itching, even of fiery eczema. The first application makes the skin cool and comfortable. Rash and blotches are healed right up. Rowles Menthos-Sulphur is applied like any pleasant cold cream and is perfectly harmless. You can obtain a small jar from any good druggist.

RED CROSS JOINS IN MOSQUITO CAMPAIGN

Two Texas Communities Are Rid of Malaria After Year's Work.

Two communities in the Southwest Division infected with malaria have been rid of this pest in the last two years by the work of the American Red Cross, according to statements made by citizens of these communities. One of these sections is around Calvert and Hearne, Tex., where the Robertson County Chapter of the American Red Cross and the local health authorities worked hand-in-hand to rid the district of the malaria-spreading mosquito.

According to the official report of the work done in this district, the initial step in the campaign was the draining of all pools, ponds and depressions retaining stagnant water. This was done the first year. It required the opening of original ditches and other semi-engineering feats. Water impossible to drain was treated with crude oil at intervals during the summer of 1921 and bodies of water so located as to be too expensive for draining or oiling were stocked with Gambusia Minnows, a local product found in prolific quantities in that section, which is a deadly enemy of the mosquito larvae.

Inspectors were employed and periodically visits were made in a house-to-house inspection. These inspectors looked particularly to rain water, accumulations in open cans and other vessels, gutters, etc., and an oiler accompanied the inspectors, oiling all these waters. Particular attention was paid to old wells, cisterns and vats of various kinds. The results have been most gratifying. It is reported and the mosquitoes are almost completely eradicated from the locality.

A similar campaign in Cherokee County, Tex., had a similar result. During the early fall of 1921 a malaria survey of the county was made by the American Red Cross Chapter. A report was compiled and charts made showing the exact percentage of malarial infection in each school district. These findings were taken as a basis for the work, which has been extensive since its beginning. Two sanitary engineers, a physician and two public health nurses are in charge of the work of malaria control, under the general direction of J. A. LePrince of the U. S. Public Health Service and Bureau of Child Hygiene of the Texas State Board of Health and the Cherokee Chapter of the American Red Cross.

The campaign is too new as yet to report complete success, but gratifying results have been obtained and the malarial infection in that district is very much decreased over the conditions of the year previous.

APPRECIATION BY GOVERNMENT OFFICIALS

Probate Attorney Commends Red Cross For Work Among the Indians.

William Shims, U. S. Probate Attorney, in charge of the Indian District of Oklahoma, has sent the following letter to the Southwestern Division, American Red Cross:

"The activities of the Craig County Chapter, extending into Delaware County, Okla., have been of great value. Mrs. Myra T. Earhart, executive secretary of the Craig County Chapter, accomplished more good for the Indian soldiers in the one day when she extended her work into the adjoining county than has probably been done since the war.

"Mrs. Earhart and Mrs. Myrtle Griesham, the public health nurse of the Craig County Chapter, spent an entire day in Delaware County at my request and, believe me, those ladies had no time for recreation.

"Indian children were brought in to be inspected, weighed and measured and preparing the claims of disabled Indian soldiers was accomplished. These two women rendered such good service in this work that I am hoping that some day they will be able to get back to that county and furnish further help.

EX-SOLDIER GETS PENSION AND INSURANCE

Through more than two years of unwinding of official red tape and other efforts the Red Cross of Waco, Tex., has obtained compensation for permanent total disability and government insurance for a veteran of the World War. This soldier was wounded in a peculiar way. A piece of shrapnel which tore away the muscles of his back and injured his vertebrae also exploded his cartridge belt, thus inflicting an additional injury which required many operations and more than a year in the hospital, most of the time lying on his face.

The operations were not successful, the shock and other contributing causes caused heart trouble, all of which have made him a permanent invalid.

Through an error in his record, this soldier has been allotted only \$27 a month and it required more than two years to correct the error and obtain for the man the compensation which was his due, as well as to obtain for him and his aged mother the insurance which also was coming to him.

WANTED—1000 people to try Orient Pomade. Do you suffer from dandruff or falling hair?

Orient Pomade relieves and removes the cause of dandruff and stops falling hair in a few applications—will you send 50 cents—stamps, money order or coin for \$1 worth and BE CONVINCED?
